WEATHER CONDITIONS

SAN FRANCISCO, Sept. 3.—Forecast: San Joaquin valley—Fair Sunday; light north winds.
GENERAL CONDITIONS
During the last 24 hours the barometric pressure has risen over California and the Colorado valley while it has fallen sharply over the entire Northwest with the center of disturbance over the Klamath region. A trough of moderate NW winds extends from Arizona northward to the lake region. However, the areas of high and low pressure within the United States are of very slight intensity, an arrangement of the pressure that has resulted in unsettled weather over practically the entire country with much cloudiness and widespread rainfall in California, generally. Fog has appeared along the coast and the temperature is lower over the interior.
It is believed that the threatening conditions of the last 24 hours are now past and that fair and cool weather may be expected in Fresno and vicinity tonight and Sunday.
W. E. STUNNETT, Local Forecaster.

BOY SHOOT 4-YEAR-OLD
SISTER WITH A .22
CALIBRE GUN

Graham Hayes, Aged Eight,
Climbs Upon Chair and
Secures Rifle.

Playfully Pulls Trigger After
Pointing Barrel at
Baby Sister.

MERCED, Sept. 3.—A distressing accident occurred at the home of Mr. and Mrs. G. W. Hayes near Athol yesterday morning, when little Graham Hayes, 8 years of age, shot his little sister, Luella, aged 4 years, with a .22-calibre rifle. The ball entering the child's groin and passing through the spinal column. Dr. W. E. Lilley was summoned at once and drove to the scene, where he administered aid to the suffering child. Dr. Lilley's investigation disclosed the fact that the ball had passed entirely through the child's body, missing the spinal column by a very narrow margin. The wound is a most serious one and fears for the little one's life were held, but this morning Luella was resting easy, having passed a good night. The child's temperature this morning was normal and her condition was considered very satisfactory. Dr. Lilley does not believe that the ball pierced any of the vital organs.
The children were playing about the house when little Graham climbed up on a chair and took a .22 calibre rifle down from the wall. Without thinking of the danger the little fellow cocked the gun and pulled the trigger, the result being as stated above. The boy feels very badly over the accident, and the little injured girl is receiving every care that can be bestowed upon her.
The Mercier Hotel Company yesterday served notice upon J. T. Hagsdale, who has a lease on the Yosemite stables on Main street, asking him to vacate the premises within the next sixty days, the company desiring to commence the tearing down of the building and the clearing of the ground for the erection of Merced's new hotel building.
Mr. Hagsdale will comply with the request of the company without delay, stating that he willingly gives up the lease and the well known straw in the way of the early starting of work on the new hotel, believing that the erection and completion of such a building in this city will be one of the best things that could happen for Merced.
Already Mr. Hagsdale has contemplated this request and has secured plans for the erection of a new stable on his property, at the corner of Front street and Court House avenue, where his sales stable is now located. The plans for the proposed new stables include the erection of a building 165 feet long and 100 feet wide, and a decision has not been reached as to the character of material to be used, but cement blocks and brick are being considered. Mr. Hagsdale contemplates building a stable to cost in the neighborhood of \$5500.
The call for the vacation of the Yosemite stables means that the hotel company is getting things in shape for the starting of work on its proposed new hotel building. This new building will occupy a site with 150 feet of frontage on Main street, extending 150 feet back to the alley between Main and Eighteenth streets. The proposed building will be of three stories, will contain 100 rooms, and will be supplied with every modern hotel convenience.
E. M. Fenwick, head of the Yosemite Lumber Company, which corporation recently purchased the Minor tract of timber land in the South Fork river country in Mariposa county, passed through Merced yesterday, accompanied by A. R. Starbridge and A. Block, two civil engineers, for El Portal, where he will look after matters pertaining to his recent purchases. Here in Merced, the party was joined by G. H. Nickerson, chief engineer for the Yosemite Valley railroad. Thomas Turner, treasurer of the Yosemite Valley Railroad Company, also accompanied the party, coming from San Francisco.
Nothing was given out by any of the party while they were in Merced, but word from El Portal is to the effect that the engineers are preparing to locate a site for the big saw mill to be built for the company, and will also locate the site for the incline cable road from the top of the mountain down to the river below El Portal.
Much local speculation is rife as to the intentions of the new company, some believing that the corporation will find it necessary to establish its distributing yards here, as well as dry kilns, etc., the argument being put forth that there is not room enough in the Merced river canyon below the probable site of the mill for such works. Such a decision upon the part of the Yosemite Lumber Company would mean much for Merced. That factory plants of some description are to be established in this city seems to be a foregone conclusion.
C. H. Douglas of San Francisco, who for ten years has been the Edison company, and connected with the largest film exchange on the Pacific coast for the past two years, has taken a lease on the Canal street theater from A. H. Wilbur and will at once have the building put in first-class condition for one of the best motion picture places in the San Joaquin valley. The inside will be remodeled and ceiled. Beautiful decorations will be made and the place given a much more pleasing appearance.
The theater will be equipped with all of the latest records of all of the grand opera singers. New and comfortable opera seats will be installed. The auditorium will be furnished with a baby grand piano and none but the very latest and best music will be used. The equipment for the motion picture part will be the very latest models of machines, to be in the aim of Mr. Douglas to give the people of Merced a first class theater, where entertainments may be had which will be not only entertaining and amusing, but also instructive. A large part of the proper presentation of vaudeville and novelty acts will be built. Mr. Douglas also contemplates the enlarging of the present building by extending it to the Odd Fellows building, thereby doubling its present capacity. His plans also contemplate the building of raised floors. One of Mr. Douglas' brothers is vice president of the Victor Phonograph Company. Mr. Douglas himself is a thorough theater man, knowing every

AUTO HITS BUGGY,
CRUSHING WHEELS

Mrs. M. E. Jack Has Narrow Escape
When Machine Dashes Up
Behind Her Rig.

While driving along Mariposa street, between I and J, yesterday afternoon, Mrs. M. E. Jack, residing on White's bridge road, was run into and her buggy smashed by an auto. Patrolman Al Hayes secured the number of the machine, 1934, which is registered to Tobias and Davidson Furniture Company of Los Angeles. It was learned later that a man named Du Priest, who runs a candy store at 810 J street, was driving the car.
The collision occurred on Mariposa street, near J. The auto struck the buggy from the rear, crushing the wheels. The woman was not injured. The presence of mind of bystanders in taking hold of the reins of the horse prevented a runaway.

SERVES HIS TIME;
IS BACK IN JAIL

Robert Lawless, Who Claims to be ex-Pugilist, Fights With Two Patrolmen.

Robert Lawless, who claims to be an ex-pugilist, was arrested last night in Chinatown by Patrolmen Davis and Maher on a charge of disturbing the peace. Lawless was in a fighting mood and resisted the officers, who were compelled to handcuff him and then haul him to jail in an express wagon. Lawless was arrested several weeks ago for the same offense. He was given ten days in jail and his term expired at 2 o'clock yesterday afternoon. Inside of six hours, Lawless was back in the toils.

GOVERNMENT GROWS
FASTER THAN CITY

Figures on Expense of Running New York; Church Membership.

NEW YORK, Sept. 3.—That the New York City government has, in some ways at least, kept pace with the city's growth, as shown in the census returns, is manifest from a budget study compiled by the city statisticians. The census returns show an increase in population of 38.7 per cent. In the same ten year period, the city budget has grown from \$94,778,972 to \$163,030,270—an increase of over 74 per cent. The figures estimated for the expenditure of the actual city, as apart from the county, were for 1904, \$79,291,763, and for 1910, \$158,775,146, or 94 per cent increase.
The increased cost in the city government is partly accounted for, according to the budget officials, by the widened scope of the municipal enterprise. For example, ten years ago the domestic relations court in Manhattan and Brooklyn, the special schools for defective children, the tuberculosis patients and the establishment of playgrounds were entirely outside the general conception of what the city government should do.
The expense of maintaining the city's police force has increased more than a third in the decade. The board of education now spends \$1,000,000 as much as in 1900—\$235,000,000 instead of \$74,000,000. The street cleaning department spends 50 per cent more—\$7,500,000 instead of \$5,000,000. The health department's appropriation has grown 125 per cent—from \$1,050,000 to \$2,375,000. The fire department costs 80 per cent more—\$18,600,000 in place of \$10,350,000.
Figures for church membership in Greater New York compiled by local organizations show that the number of church members for the five boroughs is 1,314,221, or 37.2 per cent of the new population figures. In 1900 there were 1,233,677 members of Christian churches. This was 35.9 per cent of the population.
These figures seem to show that the growth in church membership is 1.3 per cent ahead of the population growth. This growth, it is estimated, is divided about evenly between Protestants and Roman Catholics. At present it is calculated that there are 440,783 Protestants to 869,848 Roman Catholics.
A remarkable fact in the religious work of the city has been the growth of the Lutheran church. Its additional churches since 1885 having been 22 per cent of those built in Greater New York. Next to it comes the Protestant Episcopal church, which has built 93 churches to the Lutherans 113.
There are at least 66 separate Christian bodies at work in New York, of which the four which obtain the largest tax exemptions on account of property are the Roman Catholic, the Protestant Episcopal, the Presbyterian and the Jewish.

THORNTON MAY NOT
SECURE HIS SEAT

Precedent Against Confirmation of New Louisiana Senator.

WASHINGTON, Sept. 3.—Governor Sanders' appointment of Judge J. E. Thornton as senator from Louisiana probably will be questioned when Congress convenes in December. In effect the appointment was made to fill the vacancy occasioned by the death of Senator McPherson, who occurred a few days after the adjournment of Congress last June.
The Louisiana legislature was in session at the time and Governor Sanders was elected to succeed the deceased senator. Desiring, however, to devote his energies to the proposed Panama canal exposition in New Orleans, the governor has resigned the office of senator and as governor has appointed Thornton senator.
It is contended that the proceeding violates the rule laid down in the Quoy case which says that a governor of a state has no power to make a temporary appointment as senator to fill a vacancy which may have occurred when the legislature of the state was in session.
Having resigned while the Pennsylvania legislature was in session, Quoy sought election. Failing in this, he was given the appointment by the governor. By a majority of one on a vote of sixty-five, Congress refused to award the seat to him.
part of the moving picture business, and promises to give Merced one of the best moving picture theaters in the San Joaquin valley.

Latest News of Oil Fields

CANADIAN COALINGA CO. IS TO START WORK ON SECTION 8

Security Oil Co. Enters Pay Band at 2830 Feet; Showing Is Good.

Speed Motor to Be Tested for Pumping Purposes; Field Notes.

COALINGA, Sept. 3.—G. L. Hoffman of British Columbia and A. J. Pollack of San Francisco arrived here yesterday and are making arrangements for building a house on section 8-16-16. The Canadian Coal Co. has been formed to operate on this property and it is understood that work will be started immediately. Pollack will manage this property in connection with his management of the British Columbia Oil Company, which is operating on section 16-20-15. The latter company is down 2,300 feet and is a recent California hole having made that depth in forty-seven days. Another rig will be erected on this property as soon as material can be hauled. The Radiance Oil Company, which is about to begin operations in the

MUCH ACTIVITY SHOWN IN VALLECITOS FIELD

New Town of Syncline Having Miniature Boom; Hauling Lumber.

MOLLISTER, Sept. 3.—Sheriff O'Connell, who returned last evening from a trip to the field, reports great activity in the Vallecitos oil field. According to Mr. Cronin, the Range 18 Oil Company has shipped to Mendota four carloads of lumber to be used in building their rig for operation in that field, but which has already been hauled to the scene of operations. The new town of Syncline is having a miniature boom. The hotel and store buildings are rapidly becoming completed, and Mr. Cronin says it will not be long before they are open for business. He also said there were quite a number of men at work on the big furnace at the 2,100 feet, which the owners hoped to have running soon. This is the quicksilver property Mr. Fhean recently purchased from A. Leonard and is about from the New Idria mines about one mile.

Elk hills, is getting in a water supply and will soon have material on the ground for rig and camp buildings. L. C. Alsworth is in charge. The Boychester, section 18-21-15, which was completed off three weeks ago at 2,100 feet in 5-inch casing, will be hauled tomorrow to test the cement and will be immediately drilled in if the water is found to be successfully shut off.

The Security Oil Company, section 8-16-16, went into the oil sand yesterday to a depth of twenty feet, the hole now being 3,200 feet deep. The showing so far being splendid, and Manager Merrill believes that there will be at least 100 feet of this sand, having his figures on the sand of the M. K. & T. James Errington and O. H. Clark of Winnipeg, Canada, are in the city. They are interested in the United Vallecitos Company, the former being connected with the McKenzie banking institution of Quebec.

The Crane Petroleum, section 20-20-15, is down 2,215 feet in 8-inch casing on well No. 1, and to 1,115 feet deep in No. 2 with the rotary. Well No. 2 of the W. K. Oil Company is down 1,400 feet in 12 1/2-inch casing, and No. 3 is 650 feet deep in open hole. The latter is being drilled with a rotary.

The Coalings Water and Electric Company is installing a variable speed motor on the Good Luck property, section 22-18-17, for pumping purposes, and will demonstrate its worth for this work. Another machine will be installed on Associated 24, and a third on one of the M. K. & T. properties.

STEAMER BURNS; CREW SAVED

BOSTON, Sept. 3.—Sixteen members of the crew of the British West Point have been rescued at sea by the steamer Raccoon, due here from Liverpool on Monday.

The West Point, which was bound from Glasgow for Charleston, S. C., caught fire at sea and afterward foundered. The news of the loss of the West Point and the rescue of her crew was received here by wireless.

BABIES SUFFER FROM SUMMER SKIN TROUBLES

Immediately Benefited by Poslam, Which Soothes, Cools and Heals. Mothers and those having the care of infants and young children which are plagued and irritated by skin eruptions, such as rashes, will appreciate the cooling, soothing and healing properties of poslam, particularly during the heated term, when these disorders are the principal cause of fretting and ill humor. Poslam contains nothing which can in any way injure the most delicate skin and may unhesitatingly be used in all cases. "My little boy had a bad case of the most dreadful form for three summers. We spent dollars on various medicines to no effect. After trying sample of poslam I saw an improvement, and in a short while his head was entirely healed," writes Mrs. W. E. Hunt, Kingsport, N. C.

In all skin troubles poslam produces immediately noticeable results, stopping all itching and rapidly restoring the skin to normal condition.

A special 25-cent package of poslam is prepared for minor uses and this, as well as the regular \$2 jar, is on sale by all druggists, particularly Geo. H. Monroe & Co.

But no one is asked to purchase poslam without first obtaining a sample package, which will be sent by mail, free of charge, upon request, by the Emergency Laboratories, 21 West 25th street, New York City.

ATTRACTING INVESTORS TO SAN BENITO CO. OIL FIELDS

Several Companies Are Now at Work to Prove Worth of Land.

Boston Capital Financing Development in New Territory.

The Arnold oil fields in the southern part of San Benito county continue to attract the attention of oil men and investors throughout the country. Several companies are now aggressively at work to prove the worth of their lands as oil bearing ground, and it will be no surprise if a rusher is struck in the near future.

The several companies operating in this field seem to be well fixed and are going right ahead with development work.

The New Bedford company, financed by Boston capital, is an active operator in the Arnold field. George Landry, the superintendent of the company, reports that to a well they are drilling he has cemented off the water and by the first of the month will commence drilling through into the oil sands.

The New Bedford's first well is down 1700 feet. Tools have been thrown out of the hole by several gas blowouts in this well, which became more frequent as they approached the top of the oil sands, making it necessary to keep the well full of water.

Landry says they are almost through the capping of the second oil sands and from all indications he is warranted in predicting a flow of oil. In fact, he is making preparations for a rusher.

The New Bedford Oil Company owns all of section 6. It is in the hands of a few Boston people and is well financed. It is equipped with a standard rig and is prepared and will go to any depth to prove its territory.

There is a well defined rumor that a third Boston party will soon begin the development of a large area in this field under the supervision of Dr. Ralph Arnold, in honor of whom the field was named and at whose instigation the new company was financed.

Encouraging reports have been received from the Vallecitos oil fields and present indications suggest that considerable work in development will be looked for in the near future. The Ashurst Oil Company is preparing to commence operations and work by this company can be expected in a few weeks. Its holdings include many valuable undeveloped tracts which development will convert into profitable oil producing territory. This company has interested a large amount of outside capital and several investors have been made to parties who intend to commence drilling as soon as the material is on the ground.

In the western end of the valley two wells are being drilled, one by the Snelling Oil Company on the land of the Santa Maria Company, where a well was sunk several years ago and at a depth of less than 200 feet an eight barrel well was developed. The Snelling, operating on the same ground with a standard rig, has been as successful, encountering the same sand with an increased flow of oil. This company has been detained for the past few weeks on account of the necessary casing, but this difficulty has been obviated by the arrival of the casing and work will now be continued with renewed vigor. This company is under the management of Fresno and Merced capitalists.

About three miles north of the Snelling is located the Hulsberg Oil Company, where this company has drilled a well and at a depth of 120 feet oil sand has been encountered and from which a good flow of oil resulted.

This property has been examined by competent experts, who speak most favorably of its future prospects. This property is largely held by San Joaquin people.

The outlook in this section of the county is so far encouraging that other industries are attracting attention. Already arrangements have been made to open a general merchandise store in the Vallecitos and following on the heels of this comes the announcement that a similar store will be opened at Pancho, with a branch at Tom McDonald's, near the Union oil wells. A stock of general merchandise, valued at \$10,000, will be placed in the Pancho store by George Berg and Mr. Hus of Merced. This will prove a fine field for a business of the character.

The southeast end of San Benito county is taking a step forward, with the New Idria mines where several hundred men are employed.

LITTLE CHANGE SHOWN IN OIL STOCK MARKET

Reported Sale by Agency May Prove to Be Big Boom for Industry.

The San Francisco Oil Exchange adjourned Friday to open again Tuesday morning after a week's business. The exchange has been very quiet, but with a fair volume of business. The reported sale of surplus Agency oil to the Associated and Standard will have an immediate effect on all listed stocks the moment this report becomes a confirmed fact. A deal of this kind means a heavy disbursement of additional dividend money to the older companies and the declaring of first dividends by many new companies.

Palmer was easily the most consistent trader at from \$1.47 1/2 to \$1.58, buyers sixty days, and 1000 Associated bonds changed hands at \$98.25, the largest single trade for many months. Associated stock was traded in at \$41.00. Republic, on account of prospect of soon beginning in a well, was in demand at \$50 to \$52. Of the local stocks Maricopa National, August, Coalings Lakeview, Belford and Fox Tail were all in demand.

Forty-seven thousand, five hundred shares of Consolidated Midway were traded in on the Los Angeles Exchange on Friday. Practically none of this stock is held locally.

OPERATIONS TO START ON NEW OIL PROPERTY

San Francisco Man to Drill on Holdings in San Benito County.

COALINGA, Sept. 3.—J. H. Pierce has returned from a trip to the Vallecitos country, in the San Benito county hills and has installed Charles Spurlin in charge of the operations to be carried on there by W. S. Hammond, a mining man of San Francisco, who recently secured a large portion of the John Ashurst ranch for developing oil.

Arrangements have been made to get material in for a rig and camp houses, and the work will be rushed. The rig will be built with a view to going deep, and so that, if necessary, 3000 feet can be reached without trouble.

There have been many shallow wells sunk on the Ashurst ranch and it was there that the Union did considerable work. The main trouble, however, seems to have been that most operating in that locality either drilled so close to the seepages that they went into the sand at a very shallow depth, or drilled entirely behind the seepages. Pierce, who has charge of the operations of Hammond, is certain that the sands are heavy and prolific enough to develop oil in large quantities, and believes that in every instance where small holes were drilled there the location was not correct. He is certain that the sands are heavy and prolific enough to develop oil in large quantities, and believes that in every instance where small holes were drilled there the location was not correct.

OIL BOOM IS STARTED IN WASHINGTON STATE

Associated Special Agent Is to Secure Leases on 10,000 Acres.

TACOMA, Sept. 3.—An oil boom has developed about Rochester, Thurston county, forty miles southeast of Tacoma. News that oil has been discovered in quantities sufficient to bring C. W. Abernathy, special agent of the Associated Oil company of California, hurrying to Rochester to secure leases on 10,000 acres of land in the Chehalis valley, between Rochester and Tenino, has been received today.

A mass meeting of farmers numbering more than 200 was held yesterday in a school house at Rochester and great enthusiasm was manifested and leases of 10 per cent secured by Abernathy from more than two-thirds of the farmers present.

The existence of oil in Chehalis valley has been known for eight years, but it was only after Prof. Hiner J. Roberts, dean of the School of Mines at the State University, had previously explored and tested the ground last month that capitalists became interested.

Prof. Roberts reported that oil was present in paying quantities in practically every portion of the valley. Several farmers throughout the valley during the past year have sunk wells with limited capital on their own account, and found it in some cases 1500 feet below the surface. J. B. Betters, a rancher living between Rochester and Tenino, has struck oil in three wells.

MARICOPA NATIONAL DOING 1,000 BARRELS

Big Well Is Now Producing at Rate of \$10,000 Per Month Net.

Maricopa National Oil is reported by visitors at the well last week to be easily making 1000 barrels per day and it is understood that this amount of oil has been delivered daily to the agency for some time now. This well is under perfect control and is easily the best of any brought in, in this part of the field where such wells as the Ethel D. Wellman and K. T. O. gushers have for some time past been the envy of oil men.

A single well drilled to a depth of about 1200 feet producing at the rate of \$10,000 per month net, on a basis of 40c. per bbl. for oil is a performance that is seldom equaled outside the prospectus of the overworked promoter.

AUGUST STILL IN SALT WATER SAND

Superintendent Perry of the August Oil Company, reported late yesterday to the Fresno office of the company that the work of putting the 10 inch casing through the big salt water strata was progressing and that he anticipated that at any hour now he would strike the shale formation, as he has been encountering small cobbles and coarse pebbles that would indicate the bottom of the channel. The gusher sands have only been found in this part of the field the last few months and the big water strata has heretofore been the stopping place for a number of the older operators.

Fluff's Maquet the Perfect Wash for the Hair will ensure you the cleanest, fluffiest, most delightful and satisfying wash your hair has ever enjoyed. Dandruff vanishes as it by magic. 100,000 people have proved all that is claimed for it. 10 cents per package.

KETTLEMAN HILLS ATTRACT GOTHAMITES

COALINGA, Sept. 3.—It is reported on good authority that a New York syndicate will soon begin operations on a part of the holdings of the Spreckles-Bourdette people in the Kettleman hills. Nothing definite can be learned at present, but it is hinted that the New York people have secured a portion of the land there and will begin operating on a large scale in the near future.

The Spreckles-Bourdette have large holdings in the Kettleman hills, and are drilling three wells. Their companies are the Medallion, K. & H. and Coalings Kettleman.

The Kettleman hills country is attracting the attention of the oil men, and with so much actual development going on there, a strike of oil is looked for at any time.

A WOMAN'S PILGRIMAGE.

Travels 4,500 Miles to Grave of Sweetheart in Africa.

Miss Olive Macleod, daughter of Sir Reginald Macleod, has just left London on a journey of 4,500 miles to the grave of her sweetheart in Africa.

Miss Macleod was engaged to be married to Lieut. Boyd Alexander, who was murdered last April by the natives of Wadai, near Lake Chad, in Central Africa. The brave officer lies buried beside his brother, Capt. Claude Alexander, at Mifont. The intrepid woman who has undertaken to traverse the 1,000 miles of jungle between the Niger river and the lake takes with her a white marble cross, which she will place upon the lonely grave of her lover. It will be the first time that a white woman has been in that part of Africa, and the personal risk she incurs is considerable.

Gen. Gordon said he never married because he never found the woman who would follow him anywhere. Lieut. Alexander had found a woman as brave as himself, and that the blind fury came with the "abhorred shears" as their hapless Captain O. E. G. exclaimed is one of the saddest of recent tragedies.

It was in 1904 that Alexander started on his remarkable journey across Africa from the Niger to the Nile. He had two white companions, while another, Capt. O. E. G. G., both of whom died of the fever during the journey. For many months the party remained in the neighborhood of Lake Chad, often wading waist deep in the mud and the reeds in mapping the outlines of the mysterious "disappearing lake." The explorer did not emerge from the wilderness at the headwaters of the Nile till 1907. The region known as Wadai is inhabited by fanatical black Mohammedans, very loosely under the control of French officials. Alexander was traveling this region on his way to Egypt, after revisiting Lake Chad, when he was killed.

Scientific exploration in the death of Boyd Alexander has suffered the loss of a man of Stanley's caliber, a soldier, equally brave and modest, and the world's sympathy goes out to the woman who was to have been his wife.—Philadelphia Ledger.

Facts About Your Teeth

TOLD BY Drs. Free, Carmichael & Free

The scientific excellence of our dental work is vouched for by the many patients whose perfect teeth are due to our perfect dentistry. We not alone restore efficiency of the defective teeth so that they are equal to nature's best, but we also reduce to the minimum every indication that there is anything artificial about the teeth. Two particularly effective methods employed by us which leave little or no trace of their presence in the mouth are our "invisible" method of restoring lost teeth, and our "porcelain fillings."

This style of filling is not new, but the scientific discovery which we have made it possible to fill a tooth in a manner that makes it all but impossible to discern the difference between the filling and the natural tooth in appearance and color. This compound enables us to practically the same degree of hardness of the best natural teeth. These advantages make this filling very popular and serviceable.

OUR ALVEOLAR METHOD IS SUPERIOR.

Our Alveolar Method is superior to all other methods in that it leaves no trace of the work in the jaw, and is not subject to the use of surgery, leaving the missing teeth without any visible trace. Teeth restored by our Alveolar Method are made of gold and are so constructed that they are as strong as the natural teeth. They are strong and serviceable in every way, and they never ache. Our illustrated booklet will tell you the full story of our Alveolar Method in detail.

CALL AND SEE US WITHOUT CHARGE.

You must of necessity come to our office for examination and work. It will not cost you anything, however, to consult us and we will examine your teeth and mouth thoroughly. If any work is needed it is all a matter of your pleasure whether we execute same or not. You are not at all obligated to engage us because you consult us. Charges reasonable and work the best.

FRANCES STARR IN "THE EASIEST WAY" COMES TO THE BARTON SEPTEMBER 13

Frances Starr in Eugene Walter's play, "The Easiest Way."

After an unusually prolonged and successful season at the Helson theatre, New York, extending to nearly 300 performances, Frances Starr will be playing of "a particular phase of New

York life." She will have for her support the New York cast, and the scenic equipment will be identical with that provided by David Belasco for the run of the play at the Belasco theatre.

In direct and convincing manner "The Easiest Way" depicts the aspect of New York life which is concerned with the tragedy of those women who are so wedded to luxury that they will pay any price for its enjoyment. The theme is handled in a serious and telling manner. The play is produced under the personal direction of David Belasco. The first act discloses a scene of exquisite beauty amid the rolling foothills of the lower Hudson, in the golden light of the afternoon sun. Not less faithful is the theatrical boarding house interior shown in the second act, which is followed by a superb setting of the interior of an expensive hotel in New York.

Striking as is the play from many points of view, "The Easiest Way" is also notable for the manner in which it is acted. Frances Starr has signally triumphed as Laura Murdock, the central character of the play.

MARRIAGE FAILURE? THEME OF COMEDY

The comedy play, "A Marriage Failure," will be seen at the Barton tonight and tomorrow night. A good plot, and an interesting story hang around a much-married, hen-pecked husband, who determines to solve the question for himself and with the assistance of a number of other characters he finds himself in many ludicrous situations, making fun and amusement in abundance.

Joseph Detrick, the popular comedian, will be seen in the leading role, a character full of humor and one particularly suited to his qualifications as a fun maker. It is said to be one of the best characterizations and one in which he gives the best of satisfaction to his audiences. In the supporting cast as comedienne is Miss Olive Murdock. Miss Murdock is said to be an excellent player, possessed of both beauty and charm and gives a highly satisfactory portrayal of the character. A number of other capable actors and actresses complete the cast. In presenting this comedy, Messrs. J. G. and Glenn Harper have provided handsome wardrobe and appropriate settings. Seats are on sale all day at special holiday prices—10c, 20c, 30c and 50c.

HAPGOOD RELEASED ON BOND OF \$500

Man Accused of Perjury by Secretary of I. W. W. Will Be Given Trial at Later Date.

Ira Hapgood, accused of perjury by W. F. Little, secretary of the Industrial Workers of the World, was arrested yesterday by Detective and Attorney Hapgood was arraigned before Judge Briggs and released on bonds of \$500. Hapgood testified at the trial last week of four I. W. W. members that he had seen Little in the Fresno beer hall on a certain night. Little claims he was not at the place mentioned. After the trial Little swore to a warrant.

OLDEST POSTMISTRESS.
HIGH HILL, Mo., Sept. 3.—Mrs. Mary J. Miller, aged 88, a niece of Joseph Chouteau, who was yesterday re-appointed postmistress here, claims to be the oldest postmistress in the United States. She was first appointed under President McKinley in 1897. Her husband was an army officer during the Civil War.

"FRESNO DAN" CASE IS DIMMED BY LATEST HEIRESS STORY

Fresno Young Lady Named
as One of Heirs to the
Springer Estate.

Claims Involve Titles to
Wilmington, Del.; Have
Royal Ancestors.

Close on the heels of the "Fresno Dan" Russell case, where a Fresno county residence recently was recognized by relatives of the aged Daniel Russell of Melrose, Massachusetts, as an heir to an immense estate, comes the latest genealogical story in which a dainty little school teacher, living in Fresno, is said to be one of the Springer heiresses, in a case in which is involved claims to 2654 acres in the heart of the city of Wilmington, Delaware, valued at from \$125,000,000 to \$200,000,000. The newly discovered heiress, whose case is said to be well proven, is Miss D. E. S. Burnett, who resides on Magnolia.

The surprising news came yesterday to Miss Burnett, who recently acquired a pretty little bungalow at 4 Magnolia avenue, in a letter from her sister, Mrs. Joseph Vaughn, of Boston, was the news that they had been proven to be direct heirs of the original Charles Springer, whose reputed holdings are the basis of one of the greatest lawsuits projected in this country.

If the 1200 direct Springer heirs can establish their claim to this property, which in effect would give them the right to exercise control over most of the banks, municipal offices and close up the public streets of Wilmington, this right in itself would be almost secondary to the claims of the family to genealogical distinction. While a plain baronet is highly prized in many families, and births in the Mayflower are at a premium, these second rate family distinctions are disregarded by the Springers. They claim direct relationship with the royal lines of at least three nations, Russia, Germany and England, and among their progenitors, Charlemagne, Louis IX, Henry the Fowler, Alfred the Great, Otto the Illustrious, from Germany, a czar, and a grand duchess or a few others of similar claims to royalty.

Incidentally the Springers claim that somebody during the past year or so has tampered with the city records of Wilmington. Their claims are based on the legends made by Charles Christopher Springer and other Springers to the city of Wilmington and Old Sweden church. Some were for 99 years, and some for longer periods. A number of the 99 year leases, claim the heirs, are now up. But the big mystery lies in the loss of seven record books, C, D, E, F, G, H, and I, in which the alleged records of the transactions were kept, while it is further alleged that the big index in another volume has three pages cut out, with only the stubs remaining, the pages which would show the contents of the lost volumes.

Just at present the heirs are on the trail of the original leases, which are said to be in the possession of one heir who is keeping them until he can raise a cool million dollars for delivering them to the united heirs who are planning to sue the city.

But in spite of the troubles named the Springer heirs, who have formed an organization, and who will hold a big meeting in October at Boston to plan the date for the suit, expect to get possession of what they consider their rightful property. Some of the greatest legal talent of the country is being assembled for the fight, including Alexander W. Baird, a United States commissioner.

Miss Burnett, who for several years was a teacher at Miss Head's school in Berkeley, is now in Fresno. She is a well known contributor to the magazines. She and her sister are said to be great great granddaughters of the original Charles Springer.

CONTRACT IS AWARDED FOR NEW PLAY HOUSE

Fresno Theater Company Is
to Build on Site of Grand
Central Stables.

The Fresno Theater Company, a corporation recently organized in this city, has just completed its plans for the erection of a modern fireproof building on the old site of the Grand Central stables on J street between Main and Fresno streets.

Mr. Fried, president of the company, stated yesterday that the contract had been let to the Kerman Construction Company for a building to cost, when completed and equipped, about \$15,000. The building will all be of fireproof material and will have all the modern conveniences and accommodations, and will give the public better service than can be secured elsewhere.

The theater will be under the management of Mr. Fried, who is at present manager of the Fresno Theater. Airmore and who has had years of experience at the Mission theater, the first theater to open in the Mission district at San Francisco.

A unique feature of the theater will be that the roof will be constructed in small sections so that it can be removed at night and the place turned into an open-air theater and the building will be cooled with a circulation of cold air in the pipes placed under the seats and will be heated in winter by a circulation of steam in the same pipes. The top part of the side walls will be largely of glass windows, so that an exceptionally good ventilation will be had. Every accommodation will be installed for the comfort of the patrons.

MEAL NOT READY; HUBBY GETS SORE

Peter Villa Threatens to Kill Wife Because Evening Meal Was Not on the Table.

Peter Villa, an Italian, will be tried in the police court next Wednesday morning at 10 o'clock on a charge of disturbing the peace. Villa was arrested Thursday night by Detective Ben Drenth on a warrant sworn to by his wife, who alleges that her husband threatened to kill her. Yesterday, Italian appeared in court and pleaded not guilty. He was released on his own recognizance.

When Villa came home Thursday night his wife did not have supper ready, so he got enraged and threatened to whip his better half. The arrest followed.

WHEN you come in this fall for a new suit you'll find a wonderful improvement in the clothes we offer you. There's more style, more class, more dignity and individuality than ever before. In these 1911 model suits—advance 1911 styles are what they really are. You'll like them the minute you see them, and if you'll slip on one of the new coat models you'll be won over immediately, for they're superb.

At no previous season have men's clothing styles been so alluring. With all the dash and vim of previous masterpieces (but with all exaggerations eliminated), improved upon in every way, and with extra care bestowed on the tailoring, we can promise you greater value for your money than ever before. The styles are better, the materials are better, the patterns are better. There is a marked improvement all the way through.

And you'll be impressed with the treatment you receive here. Ours is not an "in-and-out" proposition. We are here to stay and realize the importance of giving our customers full value for their money, so they'll speak kindly of us and recommend us to their friends unhesitatingly, as a store where our customers' absolute satisfaction is our first consideration. That's why we've grown and that's why we'll continue to grow.

Get a Bicycle
and
Ride
to
School

—Now that the opening of the schools approaches, let your thoughts center on a bicycle for the little folks as well as the "grown up." It will make attending school a pleasure and give them the needed recreation. Nothing like a spin on a wheel to freshen the mind and drive dull care away. It means a higher average at the end of the term.

—We are better supplied than ever with good wheels, wheels that will stand the racket and give constant satisfaction. When you buy a wheel from us, it means that we will take care of it for you and keep it up in good shape. We sell nothing but good makes. Bicycles that will be a pleasure to own, instead of a bother. They are all guaranteed.

—We carry a special line of wheels adapted for the little folks. Light and smooth running—fitted with comfortable saddles. You know how the children delight in a bicycle. Make them happy by buying one for them and stimulate them for their best efforts in school. Bicycle riding is good, clean sport and healthy exercise. The children need this exercise and it will save tiring their little legs walking in and from school.

Prices \$20.00, \$22.50 and \$25.00

Pierce---Appeal---Yale Bicycles
for "Grown ups"

—The larger boys and girls will find us well supplied with such makes as Pierce, Appeal and Yale bicycles—the best on the market without a doubt. Fitted with special features found on no other makes, these bicycles will fulfill every requirement as no other make of bicycle will.

—We call attention in particular to a special model in the Appeal bicycles. They are fitted with a double bar frame, motor-cycle saddle and coaster brake—all for \$40.00. Another model has a "can't buckle frame,"—guaranteed never to buckle. Pierce and Yale bicycles have long been recognized as superior to all other makes. High class in every respect. They are BEST in all that the word implies.

Prices \$30.00 to \$65.00

—Buying a bicycle here does not call for a big investment, as our prices are very low and we make easy payments—\$2.00 a week, that's all—no don't let the question of money deter you from investing in a bicycle—either for the little tots or "grown ups."

DEMOCRATS ORGANIZE CENTRAL COMMITTEE

Judge Smith of Laton Made
Chairman; L. O. Stephens
Declines Offer.

About twenty-five members of the Democratic county central committee were present in Judge Graham's court room yesterday afternoon when the committee was called to order by Judge A. G. Smith of Laton, for the purpose of organization.

L. O. Stephens, who was expected to be chairman of the new committee, in a lengthy address before the members of the committee, declined to be considered as a nominee when his name was proposed and Judge Smith of Laton was chosen to the position. Stephens was elected treasurer of the committee.

Russell Thier, deputy county clerk, was chosen first vice president of the committee and Thomas E. Collins was elected second vice president. Earl E. Hughes was chosen secretary. It was decided at the meeting yesterday to assess all Democratic nominees a per cent of the first year's salary to meet the campaign expenses. A committee of five consisting of A. G. Smith, E. E. Hughes, Henry Hawson, Russell Thier and W. H. Bradley was appointed to secure headquarters for the committee. The general committee will meet on the first and third Saturdays of each month.

In addition to the regular officers, elected yesterday, the chairman was given authority to appoint an executive committee of nine members to work in conjunction with the officers, making an executive committee of fourteen members. The personnel of the committee will be announced later as Judge Smith was unable to make a choice yesterday.

The Democratic county central committee is now composed of forty members, elected at the county convention. The chairman of the committee, however, has been given authority to appoint ten more members at large, bringing the total membership of the committee up to 50. The selections will be made later.

The session yesterday was of some length owing to the fact that the plan of campaign to be followed had to be outlined.

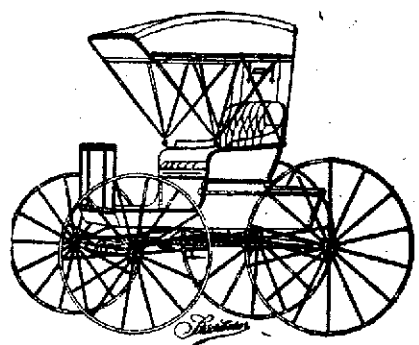

CARD OF THANKS.

We wish to express our heartfelt appreciation for the many kindnesses shown by our friends in our bereavement in the death of Mr. Fred Roth. MRS. FRED ROTH AND FAMILY. MR. AND MRS. JOHN OED

TWO THOUSAND VISIT NATIONAL FORESTS DURING SUMMER

Almost One-Half Million
In Search of Health or
Recreation Enter.

Colorado Forests Are Most
Popular; Many Great
Wonders Seen.

WASHINGTON, D. C., Sept. 3.—Before the year's outing season is over, nearly half a million persons will have sought recreation and health in the National Forests of the United States. According to the record of the United States Department of Agriculture, the total last year was, in close figures, 495,775. With the finest mountain scenery and much of the best fishing and big-game hunting in the United States, the National Forests, made more and more accessible each year through protection and development by the government, are fast becoming great National playgrounds for the people.

The use of the forests for recreation is as yet in its beginning, but is growing steadily and rapidly—in some of the forests at the rate of a hundred per cent per annum. The day seems not far distant when a million persons will annually visit them. The records show that the seasonal use of the forest runs from two months in a Colorado forest, such as the Routt, to twelve months in an Alaskan, such as the Tongass. But the use differs. In Colorado the 2,000 visitors entered the forest to fish, to camp, to climb, and to drink the medicinal waters; in Alaska the 1,000 almost solely to hunt and fish. The 31,000 persons who went into the Coconino forest, Arizona, during nine months, went to camp or to enjoy the scenery. During four months 50,000 persons visited the Angeles, California.

The most popular of the forests is the Pike, containing the famous peak of that name. The various attractions within its limits, including the scenic railway, drew 100,000 tourists and others. By principal states the National Forest visitors numbered 12,000 in Arizona, 103,000 in California, 10,000 in Colorado, 13,000 in Montana, 10,000 in New Mexico, 33,000 in Oregon, 22,000 in Idaho, 12,000 in Utah, and 12,000 in Washington.

Of the natural wonders and landmarks of interest in the National Forests, several have been set apart as National Monuments, among them Cinder Cone, a great lava basin in California; the Gila Cliff Dwellings, extensive remains of a prehistoric race in New Mexico; the unsurpassed Grand Canyon of the Colorado, in Arizona; Jewel Cave, South Dakota; Lassen Peak, the terminus of a long line of extinct volcanoes in the Cascades; the Pinnacles, a collection of remarkable jagged peaks in California; and the Tonto Forest in Arizona. The Big Trees, Glacier Park, the Petrified Forest, the Oregon Caves, and numerous other phenomena serve to attract other hosts of visitors.

The sportsman finds his paradise in the National Forests. In many of them big game abounds. The rangers and big game guards, besides the service they perform against the spread of fire, often point out the best site for the camper and the easiest route. A record of 9,315 miles of trail out, 1,235 miles of road laid out, and 4,851 miles of telephone line strung, tells what the government has done in the way of pushing the conveniences of civilization into the wilderness of the forest. The day of the wilderness of the savage and the pioneer is swiftly passing; the day of the National Forests as productive resources and as National parks approaches. The report of last year's administration by the United States Department of Agriculture evidences the rapidity of the transformation.

GOING SOME.

The farmers were sitting around the stove in the general store and telling how the potato bugs had gotten their crops. Said one farmer, "The bugs ate my whole crop in two weeks." Then another spoke up, "They ate my crop in two days, and then sat around on the trees and waited for me to plant more." Here the storekeeper broke in, "Well, boys, that may be so, but I'll tell you what I saw in this very store. I saw four or five potato bugs examining the books about a week before planting time, to see who had bought seed."—From Norman E. Mack's National Monthly.

PAUL NO ANTI-SUFFRAGE IN HIS RELIGIOUS MEETINGS

Ballot Seekers Do Not Ask
to Usurp Authority of
Husbands.

As Guardians of the Home
Women Need Vote, Says
Correspondent.

Editor Republican: Permit me to say a few words on the subject of woman suffrage. It demands our earnest, candid attention.

The happiest family is the one where each member has the confidence of the others. As with the family so it is with the state or nation. The happiest state or nation is the one where each individual citizen, or class of citizens, has not only justice and equal rights before the law, but the confidence of the others. The opponents of woman suffrage have shown a lack of confidence in the class of citizens, and hence have denied them equal rights and justice, which is subversive of the best interests of the commonwealth.

Man's and woman's interests are indissolubly bound together from the cradle to the grave. Their love for the common weal and their fight against the common evil are, or should be, identical. Then why should they not equally vote upon all questions that may come before them both?

VOTE IN CHURCH.

James Madison, who perhaps had more to do in writing the federal constitution than any other man, said that his model for a democratic form of government, so it has been written, was the Baptist church. But the states, to which the original national constitution referred the right of suffrage, fell short of the model in that respect. The Baptist church has always had universal suffrage among its members—male and female voting upon all questions coming before the church.

CAN HELP IN WAR.

It has been said that women cannot help fight our battles in war, and therefore should not have the right of suffrage. Statistics show that many more soldiers die from disease in war than from wounds received on the battlefield. Well-trained corps of women nurses at the front would decrease the death rate from sickness and from wounds to a minimum. Women could do a greater work here than a corresponding number of soldiers in time of peace.

King David, in ancient times, issued a decree, which all modern nations have adopted, that they who stay by the staff shall have equal pay or spoils with those who go down to battle. He had reference to soldiers in war and we admit the justice of the rule. In a larger sense women should come under the rule. When fathers, husbands and brothers "go down to battle" women "stay by the staff"—the children and the homes, most valuable stuff indeed—and they should have their share of the spoils: equal citizenship with their fathers, husbands and brothers.

But war should not be the normal condition of our race, though for thousands of years man, who has ruled, has almost made it so. We believe that with the ballot in the hands of women a beginning would be made in favor of universal peace. Their natural abhorrence of bloodshed and love for their own offspring would be mighty factors in aiding good men in this direction.

That woman shows courage, endurance and patriotism, it is only necessary to refer to the fact that she goes down into the valley and shadow of death that the nation may have posterity and live.

PAUL MISCONSTRUED.

Paul said, "I suffer not a woman to usurp authority over a man." While he was talking of ecclesiastical authority, especially the pastorate of churches, and not about civil government, yet, because some misconstrued his language and quote it against woman suffrage, we notice it. He was right in either case. But women, as a class, have never been in the role of usurpers. She claims political equality as a citizen as an inalienable right. She is not a revolutionist with the view of subjugating man. Therefore Paul's language has nothing whatever to do with the matter.

The pupil orator was right when he said, "God did not take woman from man's head to be his master, nor from his foot to be his slave, but from his side to be his equal."

It is said in Holy Writ that God made woman to be a help mate to man. She was then to co-operate with

him in the affairs of life. This she is not permitted to do fully under the present constitutions of most states. It is claimed that bad women by their presence will drive good women from the polls, and thus thwart the benefit that might be derived from woman suffrage. Suffrage is not a social question but a business proposition. The good woman will not be driven from the polls any more than she is and has been from the shops, stores, postoffice and other places of business where the good and bad continually intermingle and no being said about it.

It has been argued that some women do not want to vote, and therefore suffrage should not be extended to them until all are willing or want it. Some men do not want to vote and will not vote. Is this a good reason why all men should be disfranchised? When Abraham Lincoln knocked the shackles off of four million slaves did he ask, Who wants to be free? The main question was, Is it right? There was also the question of political expediency. Justice and political expediency are both on the side of woman suffrage.

We can trace the upward trend of man from the savage to the highest civilization yet attained by the story of the up-lift of woman from slavery to companionship. Heathenism and kindred brutality debases woman; Christian civilization tends to elevate woman to her rightful place by the side of man as his companion. But we shall never reach the goal—the highest civilization to be attained—until man recognizes woman as worthy of the full rights of citizenship.

WOULD CLOSE SALOONS.

About fourteen years ago when the proposed woman suffrage amendment to the constitution of the state was before the people, the writer talked to a property owner in Los Angeles upon the subject. One of his houses was rented to a saloon keeper. He made this significant statement in conclusion: "I shall vote against woman suffrage because I know that if women ever get the ballot they will close the saloons."

Those, in all political parties, who favor temperance will take note that this man voted against woman suffrage, and helped to defeat it at that time, because women as a class are known to be in favor of clean living, and in favor of protecting their husbands, brothers, sons and the state against a ruinous traffic.

Not much danger to our commonwealths from such a class of clean voters, that would be injected into our body politic, think ye?

There are wrongs to be righted, not in blood, but at the ballot box, in the legislative halls, and by the executives of the land. Good men are struggling to overcome evil in our free government—the hope of the world. As men "go down to battle" shall women who "stay by the staff" not have a share?

CUMTUX.

MODERN WOMAN NOT ABLE AS GREAT GRANDMA

No, sir, they don't put the material into the construction of the modern woman that they did into the woman of great-grandma's day. She doesn't "stand up" so well, as the phrase goes. How do you think she would make out with three meals a day at an open fire-place, baking bread in a "kettle" and preparing food from the raw material for families in pants come in from chopping down trees and breaking up new ground mostly composed of white-oak roots? She'd have to milk and churn and make flax and card wool, to spin and weave, dye and full, to cut out and sew together every stitch her family stood in, to wash out garments down at the creek with soft-soap she made herself, without a wash-board or a clothes-pin or a clothes-line or a clothes-wringer; she'd starch 'em with starch she made by grating potatoes into a tub of water, and do the wash-kettle, and from under the mule's heels. Great-grandma was able and willing for all this, but how about the modern woman?—Eugene Wood in the September Metropolitan Magazine.

CALL OF THE PLAINS.

Lured by the plains of "God's country," as she calls it, Miss Ivy Losey of this city, a frail girl, 22 years old, and weighing less than 100 pounds, is about to set out to win her fortune on a lonely claim six miles from any town in New Mexico. The girl was formerly a nurse at the Deaconess Hospital. She left there to visit her sister in Knowles, New Mexico, where the latter is married to a physician. Indianapolis brother-in-law, the Indianapolis Star, took up a claim of 160 acres, six miles from Knowles, the nearest town, and will leave for her new home, alone, August 20. She will live for at least fourteen months in the heart of the plains until she has a title to the claim. After that she may still remain in New Mexico, cultivating the land.

Miss Losey believes that there is no place in the United States like the West, and, speaking to some friends recently, she said:

"Do I like the West? Well, rather. In fact, I'm quite infatuated with it, and do not think I will ever be satisfied here again. I like the great, big, open 'God's country.'"

"I like the plains; I like the sunsets, which are so beautiful as to be beyond description. I like the free, open-hearted Western people, and I like the way they 'rough it' and laugh about the inconveniences. I like the social functions, which are, of course, very simple, but wholesome and rest at least."

"I'm afraid you would feel a little lump rise in your throat, as I did, when you first landed on the plains. 'Shucks, that's what we all felt out there. They are a tiny and funny looking, but by and by one gets used to them and thinks they are very dear and cozy. Why, my house, which is now under construction, consists of only one room, 16 by 16 feet, but that's quite large enough for me. I'm not very big, you know.'—Indianapolis Star.

THE REASON. One night little Tommie fell out of bed. Asked how it came, "I suppose," he

To his nurse, with a little comical grin, "Was sleeping too close where I got in!"

—From Norman E. Mack's National Monthly.

To Investigate Our Buggies is to Invest in Them

Capitol and Brockway Buggies
Never Fail To Give
Satisfaction

They are the cheapest buggies for you to buy because of the endless satisfaction that you'll get out of them. We have promoted them for over eight years and have never heard of a purchaser who was not satisfied that he had got his money's worth—and then some. We have never carried inferior makes of buggies and never will. We are here to stay and want to sell buggies that will bring you back satisfied that we have taken the best care of you. Your interests are ours all the time.

Read This Testimonial

Perrin Colony, March 12th, 1910.

Capitol Carriage Co.

I purchased a buggy from you eight years ago and have used it continuously. Most of the time this buggy has been standing outside exposed to the heat and rain and I want to say that it is still in good condition. I can recommend your buggies as being strictly first class and all that you guarantee them to be.

J. ATKINSON.

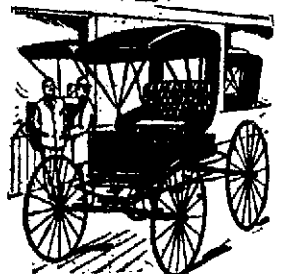

What They Have Done For Others They'll Do For You

The above testimonial speaks for itself. What these buggies have done for others, they will do for you. You can always depend on anything that we recommend to you, as we are here to stay and to back up our guarantee with eight years of honest dealing.

Our reputation is too precious to risk by making false representations. We want your trade, not only once, but always, and we expect to deserve it by giving you a square deal every time.

By this method, and this method only, we expect to increase our patronage and to retain the liberal patronage we now enjoy.

You can depend on our guarantee.

CABELL GUEST AT BIG BANQUET LAST EVENING

Hughes Hotel Scene of Gay Gathering of Visitors and Fresnoans.

ENDS FRESNO VISIT

"Dixie Land" Mingles With Fresno Cheer; Cabell Much Pleased.

With three cheers and a "tiger" for Internal Commissioner R. E. Cabell and his party, consisting of Collectors Muenster of San Francisco and Parker of Los Angeles, a representative gathering of Fresno vineyardists and business men ended a banquet at the Hughes hotel last evening.

Some seventy-five guests were at the banquet, held under the auspices of the Chamber of Commerce. Among them were some of the representative vineyardists of the county, as well as high officials of the internal revenue service. After the banquet in the main hall, of which Fresno wines occupied an important feature, a series of after dinner speeches pleasantly passed the hours until midnight. The tables were decorated with cut flowers, products of Fresno nurseries, and while in honor of the southern affiliations of Commissioner Cabell, who comes of prominent Virginia stock, some of the dishes smacked of Dixie land, county pride was borne out in the preparation and substance of the viands and drink, notably in the olives, almonds and several varieties of sweet wines produced here.

Happily introduced by President A. L. Hobbs of the Chamber of Commerce, Mayor Rowell and other speakers bespoke a hearty welcome to Commissioner Cabell and his associates.

"You know," remarked Mr. Cabell after a few preliminary remarks, "many people seem to have the impression that Washington is practically only a small addition to some in some asylum, where they send a few longhaired citizens to settle down and become of the characteristics which caused the people to send them there. However, I hope you would find the life there different on visiting the cap-

ital. You know, I hope I have convinced you that one official was not around telling the people how to farm, and who advised one and another to cut the corn from the cob and soak it in water before feeding it to his hogs in order that the animals might digest it more quickly. The old man looked up with a smile and said: "Feh de Lawd's sake, mannah, what's time to a hawg!"

The inimitable accent of the South brought down the house, as Mr. Cabell concluded the story, he continued:

"In Washington we all have heard of California, and of Fresno county, learned in our geographies of the state, and now great treasures of gold and silver and other precious metals are scattered through its mountains. We have heard of the agricultural and viticultural wealth here, but if I go back there and tell them what I have seen in the last forty-eight hours, as of those whom I have met, they will set me down as one of those fellows who has gone to some place others have not seen, and who wants to bore every one with tales of the wonders there. Yet I hope that this trip, the pleasure of which I can only faintly describe, will have practical results for the gentlemen here.

"I have not traveled over the world, as has your mayor, but I believe in no other place in the world will you find such a combination of soil and climate, and people as you will find here. The development here within the short span of a generation is marvellous. When one meets the people, one realizes that after all it was not such a miracle as it might appear at first blush.

"We are the best products of Italian vineyards raised here. We see the best intellects of older localities transplanted here, grafted on to the new life here. I believe within a generation when speaking of the wines of sunny Italy they may say that the product almost comes up to the wines of California.

"The last two days are red letter days in my life. In my trip today I covered some one hundred miles, seeing your matchless county.

"Touching a moment on technical subjects, the government branch I represent is the collection of money, an operation usually considered painful. The pocket nerve seems to be one of the most sensitive a man has. We have looked, but in vain, for some anesthetic—some opiate—which might remove the pain and make a man think he enjoyed it. But I can state this that nowhere else has the operation been performed more successfully, with less friction, than in Fresno. It is a great pleasure to meet the men who have been paying into the treasury of the government the ten millions which California has paid. I shall never forget the pleasure of the experience."

"Dixie," played by the Y. M. C. A. mandolin club, followed the speech of Mr. Cabell, with tumultuous applause. Mayor Rowell was the first speaker introduced by President Hobbs. He gave an entertaining description of the development of the county since the early days, comparing the industries here to those of certain old world countries.

Mayor Rowell's speech was followed by a solo by Mrs. Louise Brehany. The singing of Mrs. Brehany, in her magnificent soprano voice, was one of the most enjoyable features of the evening. She sang a "Villanelle" by Eva Delaqua, and later in the evening, in various numbers, which were enthusiastically applauded. "His Lullaby" by Carrie Jacob Bond, one of Schumann's favorites, "Supposing," "Amoreux," "Little Girl," and last but not least, by special request, the stirring "unofficial national air" of Dixie Land.

L. R. Rogers, in responding to the toast, "Our Visitors," extended a warm welcome to the visiting government officials, expressing an appreciation of their work and incidentally "boosting" the corporation tax. His speech was followed by that of Mr. Cabell.

Superior Judge George H. Church gave a scholarly presentation of the history of the internal revenue service in a concise and warmly applauded speech, in which he spoke of the importance of the wine industry. He spoke of one local man who visited a local police city where prohibition was in force, and where a citizen remarked that while prohibition prevented the sale of good whiskey it did not prevent people from getting drunk on poor whiskey.

Percy T. Morgan, president of the California Wine Association, was the concluding speaker, answering the toast, "San Francisco 1915."

In addition to a representation of Fresno's commercial and professional life, there were many distinguished visitors last night. Among the revenue men were B. M. Thomas, revenue agent; S. W. Hockleroad, division deputy collector here; W. C. Marshall, J. A. Richter, storekeeper gauger; E. J. Torregano, United States gauger; P. C. Rossi, president of the Italian-Swiss colony; Col. Tom W. Lewis of San Francisco and B. S. Patton of Los Angeles.

Commissioner Cabell and Collectors Muenster and Parker were taken for a long auto ride yesterday by the Chamber of Commerce, covering Mattel's and other wineries in the south of Fresno. They may spend a few days more, other parts of the valley before returning to Washington.

PENROSE BROTHERS IN MONTANA FIRE

COLORADO SPRINGS, Colo., Sept. 3.—That Senator Ross Penrose of Pennsylvania and his two brothers, Dr. E. C. Penrose of Philadelphia and Spencer Penrose of this city, were hemmed in by forest fires in Montana, where they had gone on a hunting trip, and were compelled to spend several days cut off from communication with the outside world before they won their way through the flames by a system of "back firing," was the news brought here yesterday by Spencer Penrose on his return from Montana.

According to Penrose, several men were killed in the fires near the Penrose camp. So dense was the smoke that for two weeks the sun was completely obscured and at times it was impossible to see more than 100 feet in any direction.

The hunting expeditions of the Penrose brothers, who join in an excursion into the wilds every fall, seem marked by narrow escapes from death. A few years ago Dr. Penrose was badly mangled by a she bear when he had shot.

PERSONAL MENTION

Professor W. G. Hummel, who is to take charge of the agricultural work in the High school here, arrived yesterday at the Hughes from Oxnard. He is accompanied by Mrs. Hummel.

CUTS OFF HAIR TO PREVENT BURNING

GREELEY, Colo., Sept. 3.—By cutting her blazing hair from her head with a pair of shears which lay on a table beside her, Inez Merson, the daughter of a ranchman living near here, yesterday saved herself from serious injury. The girl's hair, which was unusually long and luxuriant, caught fire when the kitchen range, at which she was cooking, caught fire.

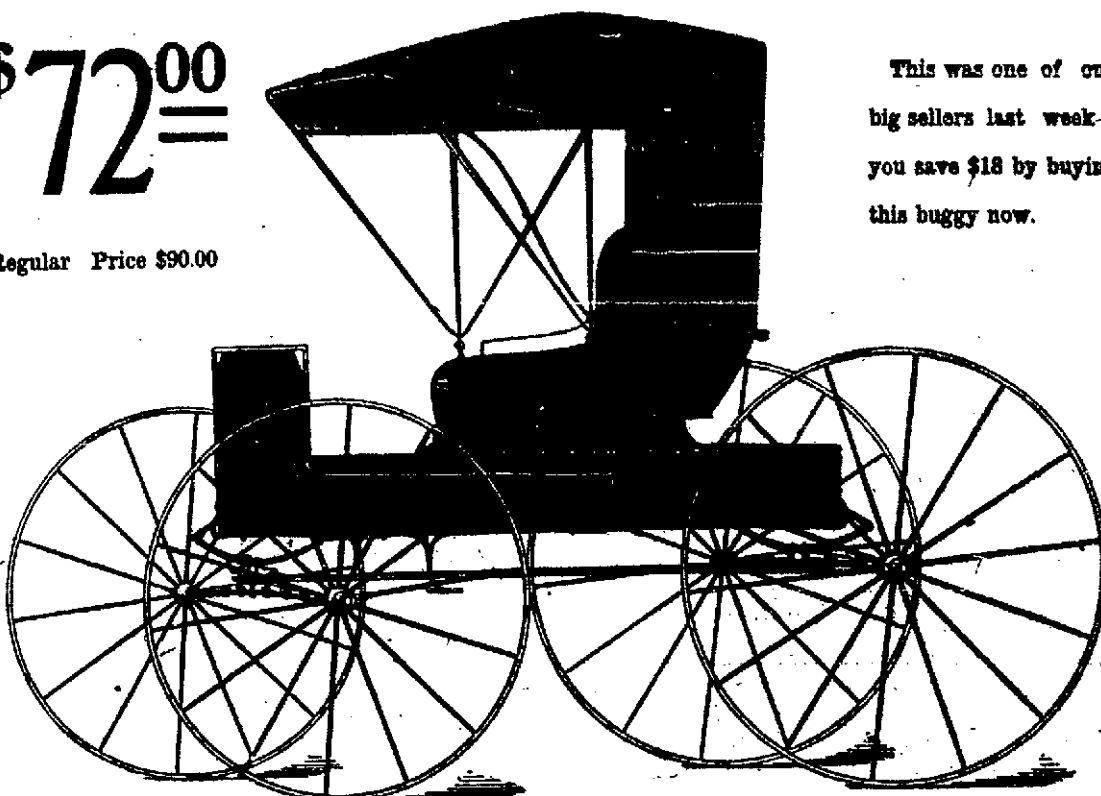

20 Per Cent--One Fifth--

Any Buggy, Surrey or Runabout In Our Store

The contractor, Mr. G. H. Walley, is working on our building now—tearing out brick walls and columns—getting ready to put in our modern plate glass front. WASHINGTON FOREST FIRE COST \$600,000

SEATTLE, Sept. 3.—Approximately 100,000 acres of timbered and cut-over lands in Western Washington have been burned over by the destructive forest fires that have swept over various sections west of the Cascade mountains this season.

Close to \$600,000 has been spent so far in fighting forest fires and in the attempt to save standing timber from the flames. These figures were announced today by D. P. Simons Jr., chief fire warden of the Washington Forest Fire Association.

The Washington Forest Fire Association has employed 1200 extra men, in addition to the 200 regular rangers and patrolmen.

Of the 120,000 acres burned over in Western Washington, Simons estimates that 20,000 were in standing timber. It is estimated that at least 15 per cent of the burned green timber will be saved by logging.

STRIKE IN KANSAS CITY.

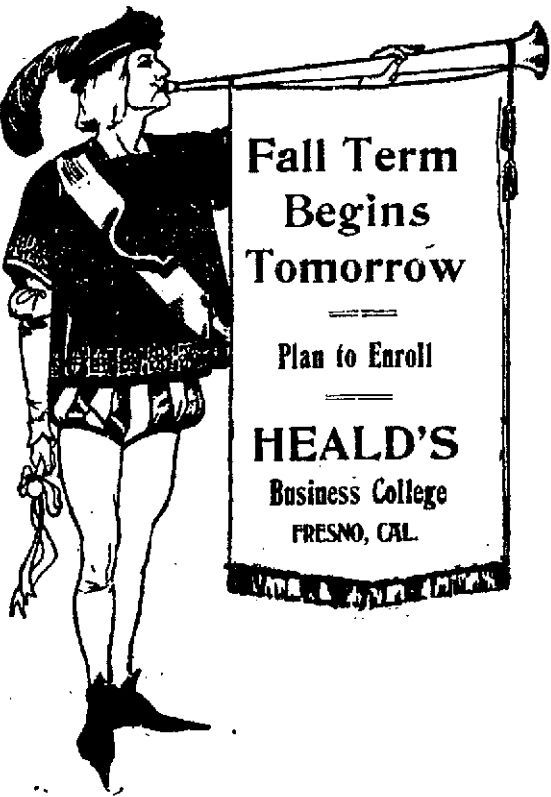

KANSAS CITY, Sept. 3.—As the result of a strike of the local union of structural iron workers, structural work on virtually all of the large buildings under construction in the city was discontinued today. The strike was ordered last night following the failure of the Kansas City Structural Steel Company to increase the workmen's wages from \$4.60 a day to \$5.

W. A. Holmes of the Southern Pacific

office here is spending a vacation in Shavertown. Rev. Duncan Wallace returned yesterday from a month's outing at Shavertown lake.

OTIS CHARGED WITH CRIMINAL LIBEL

San Francisco Labor Leaders Cause Arrest of Los Angeles Editor.

SAN FRANCISCO, Sept. 3.—On the complaint of Andrew Gallagher, secretary of the State Labor Council, two warrants were issued today by Police Judge Shortall charging Harrison Gray Otis with criminal libel.

The complaint was that during a recent visit of Mayor P. H. McCarthy, G. A. Tiedman, president of the American Federation of Labor, and other San Francisco labor leaders to Los Angeles, the Times published certain articles alleged to be defamatory to the character of the visitors.

Besides Harrison Gray Otis, an editor, Harry Chandler, vice-president of the Times-Mirror Publishing company, and John Doe, alleged to be the San Francisco representative of the paper, are charged with responsibility for the alleged libelous articles.

LOS ANGELES, Sept. 3.—Harry Chandler, assistant general manager of the Times, made the following statement tonight in regard to the criminal libel action brought in San Francisco today:

"General Otis is at present in Mexico City, to be absent about a month as ambassador of the United States at the Mexican national celebration. For myself, I do not know anything about the matter complained of as I only returned Thursday from British Columbia after an absence of two weeks."

Kodaks and supplies, developing and printing for amateurs. C. H. Staples, 1940 Mariposa St., Grand Central Hotel building.

INSURGENTS FIGHT TO GET NEW HAMPSHIRE

CONCORD, N. H., Sept. 3.—The issue between regulars and insurgents has been sharp, joined in the Republican ranks in the campaign for the primary election on Tuesday, September 6. The campaign practically closed tonight. Widespread interest has been displayed in this the first state-wide election in the history of New England.

VERMONT ELECTION OCCURS TOMORROW

MONTPELIER, Vt., Sept. 3.—The country's initial state election of the year will be held Monday. Governor and other state officers, two congressmen and a legislature that will probably re-elect United States Senator Carroll R. Page will be chosen.

The state election in Vermont is regarded as something of a political barometer and the size of the Republican majority is generally supposed to give some line on the sentiment on the country at large. A drop below 35,000 would be looked upon as indicating Republican unrest throughout the country.

VIOLENT WIND STORM DESTROYS \$250,000

Woman and Two Children Are Fatally Hurt in Missouri.

JOPLIN, Mo., Sept. 3.—One woman and two children were fatally injured, two more others were slightly hurt and property damage amounting to more than \$250,000 was done in the western part of this district tonight by a violent wind storm.

The storm was most violent at Joplin, eight miles west of here, where Mrs. James Harrison and her two small children were fatally injured. Their home was demolished. Ten mining plants in that district were demolished.

A ninety foot illuminated tower was blown across two street cars, into which pleasure seekers were crowded. One car was overturned. The tower was smashed to splinters and the ground was literally covered with live electric wires. Harry Menzel, manager of the park, was seriously injured when he struck a live wire from in front of the frightened passengers. Many were slightly hurt.

Mining plants in all parts of the district were damaged. The storm lasted fifteen minutes and was followed by a heavy rain. The interurban electric railway's power plant was seriously damaged.

TO TEACH SCHOOL AND ACQUIRE LAND

Fifty Eastern Girls Are Seeking Fortune in Colorado.

GREELEY, Colo., Sept. 3.—Teaching school and homesteading land will be the combined industries of some thirty young Eastern girls in Weld county this school year. During the last two weeks these teachers have been busy building their claim shanties. In many cases the girls doing the work themselves.

Wherever possible four girls have taken up adjoining quarter sections and have started a common home at the point where the four claims meet, this house being so arranged that one room is located on each claim. Each young woman will occupy the room on her own land, thus fulfilling the requirement of the homestead law which demands that the person taking up the land live on it for a certain period of the year.

CONDUCTOR STABBED BRAKEMAN. HOLISTER, Cal., Sept. 3.—In a fight with several members of his train crew, Conductor E. L. Dooley of an extra freight train, stabbed and seriously wounded Brakeman E. P. Sitten today. Dooley was arrested and later released on bonds. He claims that the stabbing was accidental.

NEW FELLOW SERVANT STATUTE IS UPHELD

LOS ANGELES, Sept. 3.—The constitutionality of the "new fellow servant" statute by legislative enactment of Section 1593 of the civil code of California in 1907, was upheld today by Judge H. E. Rouse of San Bernardino in granting a new trial in the case of C. E. Patton against the Los Angeles city railroad company. Patton had been awarded \$12,500 damages as the result of an accident and the defendant sought a new trial, claiming that the statute was unconstitutional.

Judge Rouse, with dissenting some of the terms and provisions of the new statute, held that the intent is quite understandable, and as the rule applies to a narrow class of cases, it should equally apply to a new master and employee, who are in the same position as the old fellow servant.

DYNAMITE EXPOSES MOUNTAIN OF CLAY

Blast Costing \$3000 Is Used to Clear Cement Material.

SAN BERNARDINO, Cal., Sept. 3.—Thirty thousand pounds of dynamite blew up a solid mountain of blue clay near Hemlock yesterday. When the dust and powder had cleared away a crumbling and caving mass of broken clay, covering an area of a quarter square mile was exposed to view. A tunnel had been dug into the mountain 100 feet and at the end the charge was placed and touched off by an electric battery 800 feet away.

It is estimated the blast made 200,000 carloads of clay for cement manufacturing purposes accessible. The Santa Fe tracks were within 100 feet of the mountain, but so well was the blast planned that there was little or no damage to the hundred men on hand, as but little earth settled in that direction. One of the results of the blast is a fissure 1000 feet long and from six to ten feet wide in places. The cost of the blast was \$3,000.

CAMPBELL TURNS AGAINST CANNON

Kansas Congressman Says He Sees State Is Not for Speaker.

KANSAS CITY, Sept. 3.—A special to the Star from Pittsburg, Kan., says Congressman Phil P. Campbell, one of the two Standpat congressmen re-nominated at the recent Kansas primary, has announced that he will vote against Joseph G. Cannon for the speakership. Congressman Campbell is quoted as follows:

"Cannon will not succeed himself as speaker of the next Congress," Campbell said today. "My opinion is that he is not and will not be a candidate for the place. His alleged ambition, however, to be speaker again, is endangering in a large measure the election of a Republican Congress."

"Out of respect to these sentiments of a majority of Republicans of Kansas, I shall work for the election of some other Republican member for speaker when the House organizes in the next Congress."

"The election of a Republican Congress is more important than the ambition of any man. The next Congress, should, and I believe will, be Republican and will be organized with a new speaker and further amendments to the rules that may be wise and necessary will be made."

MADERA GIRL SUICIDES AT LOS ANGELES HOME

Mrs. Helen Thrower Had Been Stricken With Lapse of Memory.

LOS ANGELES, Sept. 3.—After having been treated at the receiving hospital as the result of a peculiar lapse of memory Mrs. Helen Thrower, 21 years of age, committed suicide today by putting a bullet through her brain. She was stricken during the day in a downtown store, but after being taken to the hospital regained her memory and was removed to the home of friends where she later took her own life. Her mother lives at O'Neal, Madera county, and her divorced husband lives in Goldfield, Nev.

WEEKLY BULLETINS OF POPULATIONS

WASHINGTON, Sept. 3.—Henceforth the census bureau will publish for the benefit of the press a weekly statement giving the population of cities as shown by the recent census, confining it to places which in 1900 contained more than 25,000 people.

The first of these bulletins was issued today and excluding Philadelphia and Rochester, shows results in twenty-five cities of more than 100,000 each. Commenting upon the figures presented the bulletin says:

"All but seven of these cities made a greater absolute increase of population in the decade 1900 to 1910 than in the preceding decade 1890 to 1900. The seven exceptions comprise Buffalo, Grand Rapids, New Haven, Patterson, Philadelphia, St. Louis and Toledo."

WASHINGTON, Sept. 3.—The population of Troy, N. Y., is 78,949, an increase of 25,311 or 19.7 per cent as compared with 1,293,997 in 1900.

WASHINGTON, Sept. 3.—The population of Troy, N. Y., is 78,949, an increase of 25,311 or 19.7 per cent as compared with 1,293,997 in 1900.

The population of Troy, N. Y., is 78,949, an increase of 25,311 or 19.7 per cent as compared with 1,293,997 in 1900.

Buy Good Service And Quality Together

—Monroe's

Monroe's superior service costs no more than ordinary service. More and more are the people of Fresno impressed with the fact that Monroe's is the one dependable drug store for prescriptions, toilet articles and all drug purchases—the one whose superior service, whose reliable, pure drugs costs no more than the service and drugs secured from an ordinary drug store. It's the safest place for drugs.

Whenever you think of drugs—think of Monroe's, for here's where you get what you expect to get, without quibbling — THE BEST. Nothing else will be offered you. The importance of quality in drugs can not be ignored. Our customers are protected by our many years of successful experiences. There is no possibility here of getting inferior drugs.

The Right Way Is The Only Way

In compounding prescriptions the right way is the only way, no guess work or carelessness, substitutions or omissions can be tolerated for one minute. Absolute accuracy and positive adherence to the physician's order are always followed. Be on the safe side and bring your prescriptions to the Monroe Drug Co. It's the only way to be absolutely safe.

It takes courage to fill prescriptions. Not the daredevil kind of courage, but courage born of a cool head and alert, quick hands. We never lose sight of the fact that perhaps somebody's life is in our hands—that for the time we are responsible for that life.

At such times our courage enables us to perform our task accurately and promptly. Courage, too, enables us to charge the low prices that we do. We can fill any prescription no matter on whose blank it's written.

Irresistible Goodness

Irresistible goodness, healthfulness and purity are three of the qualities which make our ice cream so popular. The purest and freshest cream is used, as well as the best flavors, etc. Our soda fountain is in charge of experts who know how to serve you best.

DO YOU WEAR ONE? A "PORTER HAT"

Ladies who wear a "Porter Hat" are in a class by themselves, for the label in the hat is an assurance that it is a perfect example of all that is correct in millinery. Each hat is distinctive and original, representing the truest blending of style and art.

Mrs. Porter visits New York annually for the express purpose of keeping in touch with the latest and newest ideas, and has become a recognized authority on the question of Stylish Millinery. It is an art in itself, and cannot be studied correctly unless one gives one's entire time to the subject. This is the whole secret why "Porter Hats" have won such an enviable reputation. It is the result of carefully laid plans and the employment of artistic perception in their execution.

And yet these pretty, stylish creations cost no more than is often paid for those of ordinary style and quality. They cannot be duplicated in Fresno at the prices. Others may advertise cheap hats, but we welcome comparison both in price and quality.

FALL OPENING

Will be held Wednesday and Thursday of this week, at which there will be a grand display of

French Pattern Hats

Also our own exclusive designs in

Dress and Street Hats

This will introduce to you first hints of the authoritative fashions for the coming season

WEIRD CEREMONIES

OF AMERICAN HINDUS

Killing of a Sacred Dove
Purifies Them From
Their Sins.

A weird ceremony and one that may never again be seen in New York, took place in a dingy room in Twenty-third street, near Ninth avenue. It was the killing of the sacred dove, a strange rite performed by Hindus of north-eastern India, and one white man was present.

Every representative in America of the Nagas, the tribe that took part in the rites, was present. They numbered only eleven.

The ceremony is supposed to purify life and make amends for transgressions.

A white basket was opened and a pure white dove was lifted out by its legs. A few feet away a brazier of red hot coals stood.

In a doleful chant, the youth, who was officiating as high priest, began: Listen unto thy servants gathered here. To give the blood of a milk-white dove, O thou mighty Indra. Red and sweet is the blood of doves, thou blood lover. Give us in return, we beseech thee, protection, most beautiful.

Cast over us thine aegis and shield us from harm.

Lo! in the morning when it is darkest on earth, and when nature is at its lowest ebb, be thou near to guide and strengthen us.

When the rush of feet is heard and the swords of our enemies bite deep, it is then, O blood-loving Indra, that we, thy children, want succor and help.

Make our hearts like ice, our swords like the summer lightning, and our brains as subtle as the corpse eating a jackal.

Dead will there be in plenty—bloody hearts and livers which thou de-

lightest in mind be given this to appease thine hunger.

Blind by thy breath those who would harm us.

Let the Kala-Hag, the cobra de capello, bite their cattle.

With tears from thine eyes wash away their guilt.

Barren let their women be so all may laugh at their shame.

Manhood shall they never give back to Deep in sorrow and shame will their heads be bowed.

Our swords shall cut away their heads, and their livers for thee, O hungry Indra.

As the player closed a sharp-curved dagger was lifted above the chanter's head, gleaming wickedly in the subdued light. Then it descended sharply, and the head of the dove dropped, amid the gasps, which it mingled with the dripping blood.

While the eleven squatting figures watched intent, the boy priest went through strutting contortions until he fell exhausted on the floor.

Then a glass of "bang," liquor of great potency, was drunk by all. Clothes were put on, and the eleven dark men fled out toward their different goals in the far corners of the world.—New York Evening Mail.

A UNIQUE METHOD.

A few years ago, in the western part of the state of New Jersey, there lived a man, not illiterate by any means, and holding a lucrative position in a large manufacturing firm. This man was a happy-go-lucky sort of fellow, and as do many others, spent his money more rapidly than he earned it.

One day he had reached the limit of credit with the town storekeeper. The town boasted only one. He was indebted for a large amount, and the storekeeper was growling somewhat concerned and felt that drastic measures were necessary: so one of the would-be purchasers paid a visit to the store and requested further credit, the storekeeper remonstrated and said he would have to pay up before he let him have any more goods: whereupon the would-be purchaser replied, in the most nonchalant and persuasive manner:

"Let by-gones be by-gones and after this I'll pay cash."—From Norman E. Mack's National Monthly.

JUST ARRIVED.

The finest line of stationery at Smith Bros' Drug Store.

When Mr. Roosevelt was at the height of his marvelous career he said "frazzle" one day after he had cleaned up some of his enemies, and all the fellows in the country felt a wondering where he got it and what it meant.

He got it, of course, from his mother's people. It having been used in the South ever since Captain John Smith landed at Jamestown, and it meant exactly what the colonel was always doing in those unforgettable days, when he was licking all his enemies to a frazzle almost every day.

It is the speech of the plain people that we would preserve. The early settlers were not given to much talk, and their vocabulary was small, but they never failed to express themselves so that their meaning was perfectly clear. In the mountain coun-

PRESERVING SPEECH

OF PLAIN PEOPLE

A PHILOSOPHICAL CONCLUSION.

A very amusing but embarrassing incident happened in a southern town a few days ago which came near saving the friendship of a Green person. Mrs. Smith, anxious to know if there was any change in the condition of a neighbor who had been quite ill for several days, said to her little son: "Run over, dear, and see how old Mrs. Corbett is."

The child darted from the room and was absent only a few minutes when he rushed up to his mother with a puzzled expression playing over his face, and blurted out:

"Mamma, she said it is none of your business."

"Why, dear, what did you say to her?"

"I just told her that mamma wanted to know how old she was."—From Norman E. Mack's National Monthly.

OGDENSBURG, N. Y., Sept. 3.—Four men, who have been held here awaiting trial for the murder of Varick Drake of Potsdam, N. Y., whose body was found in an open lot on August 21st, will be freed on the strength of a confession made this week by Nelson Shorow, a deck hand with a prison record.

Shorow, after arrest for a minor offense, confessed that he robbed Drake on the night of August 16th, but denied striking him.

He is accordingly held for a charge of highway robbery in the first degree, punishable with twenty years in prison. The four now cleared of suspicion had been drinking with Drake just before the robbery.

CONFESSES TO ROBBING

MAN FOUND KILLED

CORNICE FALLS FROM 16-STORY BUILDING

NEW YORK, Sept. 3.—A sixteen-foot length of terra cotta cornice work weighing five tons fell from the top of a sixteen-story building here last night, crashed through and upset scaffolding in its descent, pierced a heavy timber hood over the sidewalk, built to protect pedestrians, and bounding into the street, struck a team of horses, killing one instantly and injuring the other so badly that it was shot. A workman and a bystander were slightly hurt.

CHARLIE TAFT ATTENDS HARVARD AVIATION MEET

BOSTON, Sept. 3.—One of the most observing spectators at the Harvard-Boston aviation meeting is Charlie Taft, the President's son, who has developed a great interest in flying and flying machines. He was introduced to Graham White yesterday and the two chatted for some time about aviation. When the Englishman said in parting:

"I trust that you will be one of the skilled aviators of the future," young Taft seemed greatly pleased.

OYSTER BEDS POLLUTED.

PROVIDENCE, R. I., Sept. 3.—Ninety-one oyster beds in this state have been condemned by the state board of shell fish commission, on account of the pollution of the water. The government's standard for the purity of the oysters was adopted by the commissioners to govern the bivalves taken from Rhode Island waters for public consumption.

How You May
Secure Votes
THIS CONTEST

Voting coupons can be secured at The Store Beautiful only, 1920-22-24 Tulare street. No coupons will be sold. They can be secured in one way only, and that by making purchases at The Store Beautiful, excepting nominating coupons, which will appear in every Sunday issue of this paper. Coupons will be issued only as per schedule below:

For each purchase of less than \$5.00, one vote for each 10c spent.

For each purchase of \$5.00 to \$15.00, one vote for each 5c spent.

For each purchase over \$15.00 and less than \$25.00, one vote for each 2 1/2c spent.

For each purchase of \$25.00 or more, one vote for each cent spent.

No voting coupons will be issued to others than the purchasers.

This contest is open to every man and woman, married or single, in this county, until January 1st, 1911, on which date The Store Beautiful will present, with compliments, to the lady receiving the most votes a hand-

some 3-ply Genuine Black Vulcanized Fibre 3-Tray Combination Trunk. Will last a lifetime.

A beautiful Genuine Leather, Fitted Suit Case and a Genuine Seal Ladies' Hand Bag, rich in design, perfect in workmanship, and of the 1911 pattern.

This Traveling Set is worth \$100.00, and cannot be bought on this coast for less.

To the gentleman receiving the most votes The Store Beautiful will present as a New Year's gift a Genuine 3-ply Black Vulcanized Fibre 3-Tray Combination Trunk, A Genuine Leather Suit Case fitted with a complete toilet set, and a handsome solid Leather Traveling Bag, value \$100.00.

A full detailed description of the above articles will appear in a later issue of this paper. They are of the latest design and will be the correct style for 1911. They are new creations and the best materials procurable enter into their construction. This is true of all our goods.

The Most Popular Lady
and Gentleman

Voting Contest Which Opened On September 1st., at the

Store Beautiful

1920-22-24 Tulare street, is proving to be the attraction of the hour, and we are more than satisfied with the results so far attained. From present indications the contest will be the most popular one of its kind ever held in this valley, and every candidate should feel proud to know that they have been chosen as a candidate for the pleasing and unique position offered under this contest.

As every man, woman and child in this valley knows, the

STORE BEAUTIFUL has been nominated and elected time and time again by an over-

whelming majority to be the most popular leather goods store in this valley, but we take it, judging from our knowledge of the many candidates in this contest to date, that when the final vote is polled and the results are announced on New Year's Day, that no candidate will have more than a small plurality, yet none will have cause to feel slighted, as we believe that every one will receive sufficient votes to more than satisfy them that they are held in high esteem throughout the county, even though they are not voted to be the most popular. It will be very difficult for the public at large to unite

for one candidate, as has been the case in choosing the most popular leather goods store, so none of the candidates should expect a great majority.

The ones who are voted to be the most popular will have every reason to feel happy on New Year's Day, even though the results show only a small plurality in their favor, owing to the many very popular candidates in the contest. We here announce the the names and standing of all candidates who were nominated on the opening day of this contest, Sept. 1st.

SPECIAL

Commencing tomorrow and throughout the week we will place on sale the most beautiful line of medium price Ladies' Hand Bags that has ever been sold in this state. All these bags are direct from the largest ladies' hand bag factory in the world. These goods cannot be questioned, for they are the latest 1911 style, beautiful in design and the best material ever placed in a medium priced hand bag enter into their construction.

The lady who misses this sale will regret it.

Watch Our Windows

A glimpse will convince you that we are offering the best values in this city and state.

Rules of Contest

Any person, man or woman, married or single, boy or girl, is eligible to compete.

The contest manager reserves the right to reject any nominations.

No employee of The Store Beautiful, or relative of any employee, is eligible to enter the contest.

A nomination coupon good for 1,000 votes will be printed in the Tribune periodically during the contest, but must be used during the week of issue.

All vote certificates must be polled during the week in which they are issued.

At the close of the contest a recount of all the votes will be made by a committee of prominent citizens.

Any question that may arise will be determined by the contest manager and his decision will be final and conclusive.

The Store Beautiful reserves the right to alter any conditions pertaining to this contest, if it so desires, other than reducing the prizes that are to be given away and the order in which they will be won.

Contestants can nominate themselves. Any person wishing to withdraw from the contest must write to The Store Beautiful personally, as no telephone messages will be considered.

Votes will be allowed only according to published schedule and for no longer terms. Read the schedule of votes carefully, so that you may understand this.

The Object of
This Contest
Is Fourfold

First—To give The Store Beautiful greater publicity, and create a greater demand for the goods sold therein.

Second—To induce those who are strangers to us to call and be convinced that we carry the most beautiful and up-to-date line of Leather Goods in the state, at prices that are right.

Third—To demonstrate to every man, woman and child in this valley that we manufacture and sell more Leather Goods than all other stores combined in this valley.

Last, but not least—To make two candidates happy on New Year's Day.

A Handsome Gift

Value \$25

Will be presented to the ones who place in nomination first the lady and gentleman who secures the highest number of votes.

Make your choice now. Watch the Sunday issue of this paper for the weekly results and use this coupon. It may be worth \$25.00 to you.

Nomination Coupon—Good for 1000 Votes.

Only one nomination coupon will count for each candidate. Contestants can nominate themselves.

Address

Why Some Students From America Are Disappoint- ed at Oxford.

But the Philadelphia boy who came back disappointed probably did not know much about Oxford or the Rhodes with when he set out upon his journey. Rhodes was a place of learning with technical experts and even college professors for those parts of the world where his bounty was bestowed. His idea was expressed in a rather cumbersome manner in his letter to the trustees. He wanted to begin with bringing the great English-speaking countries into closer touch with each other, to the end that they might have a mutual appreciation of each other, and especially a friendship with the United States. He wanted a closer harmony of thought than existed in his day. While his plan has been carried out with general satisfaction, it must be said that it is entirely due to the trustees who wanted the results accomplished. That will take time.—Philadelphia Inquirer.

Agricultural Department

(By W. R. MINTOSH.)

It is gratifying to be assured in print that Bug-Chaser Comper is about to make good in the matter of locusts, parasites which will "play put."

So far, in the account between Mr. Comper and the state, the ledger shows nothing but a long, discouraging array of debits against the entomological globe-trotter.

As the record now stands, he is the most expensive "luxury" in which the state has any interest. It has invested a good many thousands in entomologist Comper without any returns whatsoever. His imported parasites have failed completely to justify the confidence placed in them by their discoverer and exporter.

Our climate seems to have been ungenial for their propagation and beneficial work and our birds, it is said, have been so unappreciative and unscientific as to devour these beneficial parasites before they had time to devour their hosts—the insect pests of our orchards and vineyards.

As a limelighter and press agent, Mr. Comper takes high rank. A few years ago, with about the pomp flourish of trumpets and beating of tom-toms, which now attends his alleged mealy-bug parasite importation, a so-called parasite for the codling moth was "liberated" among a few pear trees and apple orchards about Fresno by a local inspector.

This alleged parasite of the ever-present and disastrous codling moth had been run to earth in the darkest corner of some far-away island of the seas, after many narrow and hair-breadth escapes from the savages and wild beasts which inhabit the jungles of that awful country.

The parasite which cost so much hazard and treasure has never been seen nor heard from since it was "liberated," and the codling moth, like the poor, is with us still.

I do not say that Mr. Comper has been incompetent or wilfully negligent of his duty to the state, but as the record now stands, he has certainly proven a poor investment from the start; and it is about time, it seems to me, for him to do something to justify his further employment.

In the matter of the mealy-bug, there is no immediate menace to the orchards of the San Joaquin valley, from this source, so far as I am advised.

This pest, which, I am informed, has proven very troublesome, not to say disastrous, in certain low and damp situations in two or three counties of Southern California, has confined its operations here to a few orange trees in the yards of Fresno residents, which are protected by buildings and other trees of a larger growth, and where a good deal of water has been used in sprinkling lawns, plants and flowers—in short, practically household conditions. If the mealy-bug has ever been found in any citrus orchard of Central California, I have not heard of it. I do not believe that the mealy-bug can endure either the winters or summers of Central California in exposed orchard situations.

It has been in the city of Fresno, protected as I have stated, for at least five or six years, as attested by my own personal knowledge, but has never ventured into open, field orchards. This, it seems to me, is a pretty good guarantee that our orchards are "immune" from this pest.

Of course it is desirable to rid ourselves of the Fresno crop of mealy-bugs, otherwise they may, at some future time, attack our orchards, in which event, they might prove very annoying to say the least.

In charge of an experimental system which Uncle Sam established in this county some time ago.

INSURANCE AGAINST DAMAGE.

In a country with a sandy soil and where the ordinary water table is as high as it is in the Land of Kerman, the danger from sub-irrigation is often a menacing one. Land can be easily spoiled by the application of too much water as by failure to give it enough. In a section where the soil absorbs water as rapidly as does that of this district, inexperienced irrigators often soak their lands so thoroughly that they spoil them. The clay strata beneath the surface prevents the water sinking far into the ground and as a result the earth a short way under the surface is exceedingly moist, a condition which soon leads to the rotting of the roots of deciduous fruit trees and grape vines. The proposed drainage system, is simply an insurance against the ruin of crops and farms.

The pumps will in no instance take from any land its necessary water, but they will remove that superfluous water which remains after the soil and plants have absorbed all that nature may deem sufficient.

CULTIVATED ACREAGE INCREASED.

"Many acres of land which have been deemed of little value and which have not been put under cultivation, because of the sea of alkali, the presence of an over-abundance of alkali will be available for farms after the drainage pumps have been at work for a short time. The pumps will have the effect of keeping the alkali down deep in the soil where it is needed. Instead of coming up to the top and over-powering tender roots and shoots."

The preparation of the engineering data has caused considerable speculation among the farmers of this district. A well borer and force of men have been at work for some time, digging shallow test wells all over the country for the purpose of allowing the engineers to examine the soil strata beneath the surface.

Residents in the Land of Kerman who have been informed of the arrangements made this week, have waxed enthusiastic over the news. They feel that the last thing to be done to make Kerman one of the foremost irrigated districts in the country, is about to be begun. The removal of all danger of excessive sub-irrigation and the repression of the much dreaded alkali will enhance the value of land, especially that which is improved and under private ownership.

The individual landowners of the community are the men who are going to benefit the most by the installation of the new system.

"The pumping system will necessitate the extension of the lines of the San Joaquin Power company, and this will probably mean that the farmers in the vicinity of the extended lines will be able to make use of the electric current for light and power."

CONCRETE POSTS FOR FARMERS.

An ingenious reinforced concrete fence post, so constructed as to be taken apart, packed, removed and re-planted with equal alacrity has recently been invented by a Wisconsin man. The post is simply a row of concrete balls which are punctured with a hole through the center, these balls being placed one over the other on a steel rod, not unlike Chinese beads on a wire.

To the iron core or backbone of each post at convenient intervals, between any two placed, the desired number of balls are attached small cleats in the shape of a flattened U, to which the fence wires are affixed, the posts being adapted to the hanging of both plain and barbed cable. When the concrete balls are strung upon the backbone and the metal cleats affixed in the proper places, nuts on the opposite ends of the iron core are tightened, drawing the whole into a compact post.

This post, which is planted in the ordinary way, is highly flexible, for all practical purposes almost indestructible and most important, contains no sharp protruberances like the knots and splinters of wooden posts which might injure the animals enclosed by the fence. This combination concrete post presents a prosperous, business-like appearance, and from its apparent utility may come to be in common use in the west.

A NEW VEGETABLE.

A new vegetable has been introduced to the people of the United States through the department of agriculture. It is the root of the calla lily, which resembles somewhat in appearance the ordinary Irish tuber, with the addition of a few whiskers that have nothing to do with the qualities of the article as an esculent. It is more elongated, and when cut the interior is a trifle more viscous. But a section of it is so potato-like you would not be likely to distinguish any difference. In cooking, it has first to be boiled in order to destroy certain acid properties, after which it may be fried, roasted, baked, or what not, according to taste. Farmers in Florida have been raising these calla roots for market for some time. The plants grow readily in swamps, and so thickly that the yield of a single flooded acre is enormous.

They reproduce themselves by multiplication of their bulbs under ground, so that the grower has simply to dig up the offshoots and leave the parents to propagate anew. For centuries the Egyptians have cultivated a similar crop during the seasons of the Nile overflow, and at the present time calla lily bulbs are a common vegetable in Japanese markets.

So promising are they that their propagation in many parts of the United States, where conditions are favorable, may reasonably be looked forward to as an agricultural industry of the future.

LOW-HEADED TREES.

To get uniform heads and low heads it is essential that we have live buds all along the stem of the tree, and hence we must have yearling trees. I have long ago abandoned the use of any but vigorous one-year-old trees, says Prof. W. F. Massey.

At one of the Pennsylvania institutes, a man, a nurseryman, reaped an apple culture, and had with him a tall, four-year-old tree as a sample. This tree had started a head about four feet from the ground and the stem was entirely too old to cut back to where the head should be started. I told him and the audience that I would not plant trees of that sort if given to me, for I could not start the head where I wanted it, and would not have any uniformity in the trees; but with trees only a year old the cost would be less, the freight less, and the labor of transplanting less, and having merely a switch of a season's growth I could start the heads of the trees uniformly at the same point.

In these days of spraying, low-headed trees are essential if there were no other advantage. But there is no advantage whatever in having a tall stem to a fruit tree, except as some urge, so that a team can get under it in cultivation; but we do not want the team there, for, while cultivation is desirable in the formative years of the tree, when rapid growth is desired, the low head soon shades the ground under the tree and prevents the growth of weeds, etc., and the feeding roots, being always a little in advance of the trees, the limbs the cultivation there is sufficient, till time to check the too-rapid growth to induce fruiting, when the much method is far better than clean cultivation; and I have found nothing better than to put the orchard into grass and mow it frequently, and let the grass under the trees. With this method there will be little blight in pears or apples; and while with the short-lived peach tree,

I would keep up the cultivation, I would have an extension cultivator, so that the soil under the trees could be scratched while the team is outside. Proper culture in grass, in which the grass is kept strong by annual top-dressing, and all used for the benefit of the trees, is better for either apples or pears.

CLEANING LONDON.

More than \$3,000,000 gallons of water were used last year in washing and watering the streets of the city of London.

The quantity of refuse removed from the city by the corporation during the year was \$1,821 van loads taken from premises and 2,930 loads of sweepings from the public way, making a total of 30,753 loads, or about 345 per working day.

The sum of \$274 was received from the sale of refuse collected from street orderly bins, and old tins were disposed of for \$161.

During the past year more than 2 miles of derelict or disused overhead wires across the city streets were removed by the city engineers' officials, making 25 miles during the past 10 years. The number of private owners of overhead wires in the city is 141. In all, about 723,956 spans of wire cross the public thoroughfares, and during the last twelve months 5768 cases of broken wires were reported. The city engineer mentions in his report the erection for experimental purposes, of various aerial lines for the purposes of intercepting wireless telegraphic messages.—London News.

STILL HAD EIGHT MINUTES.

Ignace Paderewski tells, at his own expense, this incident which occurred during his last visit here: "I was hurrying along Broadway one afternoon when a pig-nosed urchin with a bundle of papers under his arm stopped me and asked me the time. He was a smiling little rat, and in good humor I drew out my watch and told him it was 10 minutes to 3. The young rascal said:

"At 3 o'clock you get your hair cut." "I appealed to a policeman who stood nearby and who had overheard the colloquy between the small boy and myself. 'Officer,' I said in tones of vengeance, 'this lad has insulted me. You heard him. What do you think I should do?'

"The policeman glanced slowly at a neighboring clock, then back at me, and replied stolidly, 'Well, sir, you still have a good eight minutes.'—Cosmopolitan Magazine.

Pietro had drifted down to Florida and was working with a gang at railroad construction. He had been told to be aware of rattlesnakes, but assured that they would always give the warning rattle before striking.

One hot day he was eating his noon luncheon on a pine log when he saw a big rattler coiled a few feet in front of him. He eyed the serpent and began to lift his legs over the log. He had barely got them out of the way when the snake's fangs hit the bark beneath him.

"Son of a gun!" yelled Pietro. "Why you no rings da bell?"—Everybody's Magazine.

PAINTERS' ATTENTION.

Members of Local Union No. 294 are requested to meet in Union hall September 4th at 1:30 p. m. to attend the funeral of our late brother, V. B. Crocker.

J. W. GORRELL, President.

W. D. McDonnell, Secretary.

THERE ARE OTHER.

Corn Remedies, but none so good as E. A. Crocker's. Paint. Genuine only at Smith Bros' Drug Store.

Valley Foundry & Machine Works

For gasoline and distillate engines and centrifugal pumps. Our engines are the simplest and smoothest running engines made. We carry a full and complete line of casing and fittings, including gate valves, check valves, foot valves, tees, elbows, 45° elbows, bushings, reducers, nipples, flanges, etc.

We make a specialty of threading pipe and casing of all sizes. We have the only large pipe machine in the Valley.

We have the most up-to-date Jobbing Foundry & Machine Works on the Coast. We do pattern work and make iron, brass, bronze and aluminum castings. We make a specialty of gear cutting, both large and small, in fact if you bring your work to us we can do everything connected with the job. We don't have to go outside to get any part of it done.

HERE IS THE WAY USERS OF OUR GAS ENGINES SPEAK OF THEM

VALLEY FOUNDRY & MACHINE WORKS,
Fresno, Cal.

Kerman, Cal., SEPT. 2, 1910.

GENTLEMEN: Replying to your favor of the 1st inst., regarding the 12 H. P. Engine and 6 inch Pump recently installed by you, I wish to say that I am more than pleased with its work.

It certainly fills a long felt want after having used another make of Engine and Pump, as I am now pumping more water with less expense and trouble.

I can truthfully recommend the Valley Engine and Pump to anyone in need of a first-class pumping plant.

Yours very truly,

(Signed) W. C. HALL.

We carry a full and complete line of power transmitting machinery. We have two car loads of steel split pulleys on hand and a large stock of shafting, belting, hangers, babbitted bearings, couplings, collars, etc.

RAISIN LEAGUERS ON MADERA DIAMOND TODAY

Coyotes Have Strong Line-up; Roberts Wants to Meet Hanford.

MADERA, Sept. 3.—The game between the Coyotes and the Cubs of Lemoore, which will be pulled off here tomorrow, will no doubt be an exciting one. Manager Roberts is anxious that his team will win, but in order to make that a certainty, he has signed up two new players, a first baseman and a third baseman. Pytle, who has been playing with the Stockton State Leaguers, and Mundorf are the new men.

It is the intention of the manager to play Pytle in the outfield, as he already has a first baseman in the person of Ben Preclado, who is hard to beat. Mundorf will cover the third sack, as that is a point where the Coyotes have been weak. With this point strengthened up, the Coyotes will have a lineup that will be almost invincible. Manager Roberts believes that with the team as now constituted he will win from Lemoore.

Brant and Owens will be the bat-

POSTPONE AUTO RACES.

NEW YORK, Sept. 3.—The automobile races scheduled for today at the Brighton Beach motor dome were postponed until Monday on account of rain.

CHICAGO, Sept. 3.—If any one is very anxious to find which is the classiest ball team in the National League today one has only to glance over the recent record of the Cubs. After taking a peep at the scores and averages, fielding and batting, you will easily see why Frank Chance's aggregation of ball tossers are now leading in the home stretch in the race for the pennant. Take, for instance, the recent series with the Giants, in which several records were made that will probably stand for many seasons. In the first two games the Giants made thirty-one hits against twenty-six for Chicago and scored twenty runs against nineteen for Chicago. The total of hits for the series of four games is forty-three for the Giants and forty-two for the Cubs. Of these hits twenty-two of Chicago's were extra base drives for a total of sixty-one bases. The Cubs tore off eight home runs, thirteen two baggers and one triple. The Giants got seven doubles and one triple. The four games drew approximately 80,000 persons, the lowest attendance for any one day being 15,000. Schulte, the happy-go-lucky right fielder of the Cubs, set a major league record by his great work at the bat against the Giants in the recent series that will probably stand for some time—that of making four home runs, two of which were made in the last game played. To Schulte belongs the credit of rapping out the longest hit of the year. In the first inning of the last game against the Giants Frankie drove the ball over a signboard back of the bleachers which is sixty-one feet high, clearing it by about twenty feet. The distance from home plate to where the ball went over the fence is 350 feet. Jimmy Sheekard's big stick was also very much in evidence. The Cubs' star left fielder managed to rip out two hits that were good for four sacks.

TODAY'S GAMES

FRESNO CITY LEAGUE.
Bittels vs. Hickmans at Recreation Park, 3 p. m.

SAN JOAQUIN VALLEY LEAGUE.
Visalia at Bakersfield.

PACIFIC COAST LEAGUE.
Sacramento at Oakland, two games. Los Angeles at Portland. San Francisco at Vernon, two games.

NATIONAL LEAGUE.
St. Louis at Chicago. Pittsburg at Cincinnati.

AMERICAN LEAGUE.
Chicago at Detroit. Cleveland at St. Louis.

INDEPENDENT GAMES.
Tulare at Hanford. Lemoore at Madera.

MAY SUTTON WINS SET FROM SISTER

DEL MONTE, Cal., Sept. 3.—In the second day of the tennis tourney that will decide the championship of the Pacific coast states, May Sutton won a set from Mrs. Bruce and Hazel Hotchkiss took the first two out of three from Golda Myer. In the first game the scores were 4-3, 5-2 and in the Hotchkiss-Myer game the figures were 5-2, 5-2.

tery for tomorrow's game and Ben Preclado, Henry Preclado, Frank and Mundorf will form the infield. Whitehead, Scott, Pytle and Blinds will be the choice for the outfield. It is this team that Manager Roberts will take to Modesto with him and he expects to give the team of the northern town a run for the money.

He is also very anxious that the post-season games be played with Hanford. He wants to show that his men can beat the best that Jehl can bring. He will even submit to having the last game thrown out if Jehl will consent to play the three games. He claims the game, not because of more professionals than the rules allowed, but because Hanford used a pitcher belonging to another club. To show that he is a game sport, Mr. Roberts will play Jehl's men under any condition, for money or marriage.

White Sox Lose, as Usual; Walter Johnson Baffles Athletics.

DETROIT, Sept. 3.—Detroit again defeated Chicago today, the score being 4 to 2. The greater part of the game was played in a downpour of rain, which became so bad in the last half of the sixth that Umpire Egan called a halt. The score:

| | | | |
|---------|---|---|---|
| Chicago | 2 | 7 | 4 |
| Detroit | 4 | 8 | 1 |

Batteries—Olmstead and Payne; Pernolle and Schmidt.

WASHINGTON, Sept. 3.—Walter Johnson was a big puzzle to the Philadelphiaans this afternoon and Washington won, 3 to 1. The score:

| | | | |
|--------------|---|---|---|
| Washington | 3 | 8 | 1 |
| Philadelphia | 1 | 3 | 1 |

Batteries—Johnson and Breckendorf; Bender, Krause, Dygert and Thomas, Lapp.

CLEVELAND, Sept. 3.—Cleveland defeated St. Louis, 12 to 4, today, knocking Lake out of the box. Easterly's batting featured. The score:

| | | | |
|-----------|----|----|---|
| Cleveland | 12 | 18 | 1 |
| St. Louis | 4 | 9 | 2 |

Batteries—Kaler and Land; Lake, Criss and Stephens.

FRESHMEN OF U. C. LOSE INITIAL GAME

BERKELEY, Sept. 3.—In the first football game of the season, the Barbarians defeated the Freshmen of the University of California today by a score of 11 to 3. Dills, formerly of Pomona College, Roy McNeill, who played on last year's team at St. Mary's College, Oakland, and William Kling, a recruit from Belmont Academy, played the star game for the collegians.

The freshmen held the Barbarians to a 3 to 0 score in the first half, but weakened in the second part of the game and were easy prey for the seasoned players.

Hosp Spikes Rubber in 11th With Winning Run; Final, 4-3.

LOS ANGELES, Sept. 3.—Pitcher Roy Hitt for Vernon won an eleven inning game from San Francisco today by making a single that brought in the needed run. It was a game of hard hitting, eight hits being made by both teams. "Ping" Bodie made his twenty-fourth home run of the season, while Hosp also made a home run, a triple and a single. The score:

| | | | |
|---------------|---|---|---|
| Vernon | 4 | 3 | 0 |
| San Francisco | 3 | 0 | 0 |

The 1911 Oldsmobile

"No Car Has Developed More Surely Towards Perfection"

A survey of the more important specifications, listed below, reveals the fact that no car, as many years before the public as the Oldsmobile, has developed so surely toward perfection. The silent, powerful, long-stroke motor will be a revelation, even to Oldsmobilists; it turns over literally without sound or vibration while the pulling power is phenomenal. The increase in size of wheels and tires on the 4-cylinder car provides for easy riding over the roughest roads and practically eliminates tire trouble. Pioneers in the matter of adequate tire equipment, the makers of the Oldsmobile now claim the best-tired cars extant.

The importance of an announcement of improved models depends largely on the past history of the car improved. Keeping to the fore-front of each year's automobile development for over twelve years is Oldsmobile history. Hence, the changes we announce are of particular interest to those acquainted with the refinement of the Oldsmobile from year to year.

| Oldsmobile Autocrat | Oldsmobile Limited |
|---|---|
| 4 Cylinder, 40 Horse Power | 6 Cylinder, 60 Horse Power |
| 4-cylinder, 40 horse-power (A. L. A. M. rating), 7-passenger touring car. Cylinders "T" head type, 5 inch bore, 6 inch stroke. Wheel-base, 124 inches. Straight line drive under normal load. Low center of gravity. Four speed transmission, selective type. Positive feed lubrication insuring perfect oil circulation. Pressure system on gasoline tank. Large wheels with 38x4 1-2 inch tires on demountable rims. Standard equipment includes 9 inch headlights, side and tail lamps, Prest-O-Lite gas tank, horn, baggage rack, robe rail, foot rest, removable auxiliary seats, etc., all of the highest quality obtainable. | 6-cylinder, 60 horse-power (A. L. A. M. rating), 7 passenger touring car. Cylinders "T" head type, 5 inch bore, 6 inch stroke. Wheel-base, 138 inches. Straight line drive under normal load. Low center of gravity. Four speed transmission, selective type. Positive feed lubrication insuring perfect oil circulation. Pressure system on gasoline tank. Large wheels with 42 x 4 1-2 inch tires. Straight line body with high forward doors. In addition to standard equipment, as used on the 4-cylinder cars, the Limited will be equipped with top, wind shield and Warner 100-mile speedometer. |

In recommending the Oldsmobile to prospective purchasers, we feel that nothing can be said to over rate this splendid car. In every detail of construction it is perfect as master mechanics can make it, and the essentials are all of the very highest qualities. Every purchaser of an Oldsmobile has expressed himself as more than satisfied, which is the best recommendation any car can have.

—Keeping to the fore front of each year's automobile development for over twelve years is Oldsmobile history—

FAST TIME MADE BY AUTOS AND HORSES---RECORD BROKEN AT STAMPA

EDDIE HEARN PILOTS CITY LEAGUERS WILL BIG BENZ CAR TO THE FRONT

Carries Off Honors at Indianapolis Speedway; Nationals Win.

INDIANAPOLIS, Sept. 3.—Eddie Hearn piloted the big Benz car to victory in the 100-mile free-for-all and the ten-mile open event for the Indianapolis Nationals and as carried off the majority of the laurels in the first day's final racing meet in Indianapolis Speedway today. Hearn's victory in the 100-mile battle netted him \$1000 in cash and by winning the short free-for-all he retained possession of the Indianapolis Nationals, which he had captured at the July meeting with the same machine and which bears with it a salary of \$500 per week.

The second 100-mile struggle of the program was open to stock chassis cars under 450 cubic inches piston displacement and the Blue National, driven by Howard Wilcox, won without a stop in the fast time of 32 minutes and three seconds, with Charles Mera, the other National entrant, second.

A. Sowell, driven by Jap. Clement, was third in the long race to receive the checkered flag. Wilcox is a new star among the elements of racing stars and by his remarkable non-stop success in the long stock chassis race, gains possession of the silver Earlwood trophy, which carries a salary of \$15 per week until the end of the season, contest season and also takes into the National camp a trophy cup, both of which were offered for the 100-mile Grand Prix classic.

The stock car race was more closely contested than the free-for-all. The two Nationals and Joe Dawson in a Marmon battled around the two and a half mile circuit until the Marmon incurred motor trouble as it was coming into the stretch of high speed and so was forced to retire in the sixty-seventh mile.

The Westcott car, driven by Knight, took second money in the long distance free-for-all competition and Livingston hurled a stock National across the wire for third honors. Hearn's Benz was not crowded at any time. He did not experience any tire trouble and stopped only once for oil. The youngster and his former car averaged 70 miles an hour for the entire 100 miles, but his time of 75 minutes and 58 seconds does not lower any records.

The entire program of ten events today failed to produce a new mark.

GIANTS AND YANKS WILL PLAY SERIES

NEW YORK, Sept. 3.—Frank J. Farrell, president of the New York American baseball club, said today that he had been in consultation with the Chicago Cubs, owner of the New York Nationals, and that the two clubs had agreed to a post season series between the Americans and Nationals if the sentiment of the baseball public is shown to be favorable.

THE YANKS A SURPRISE.

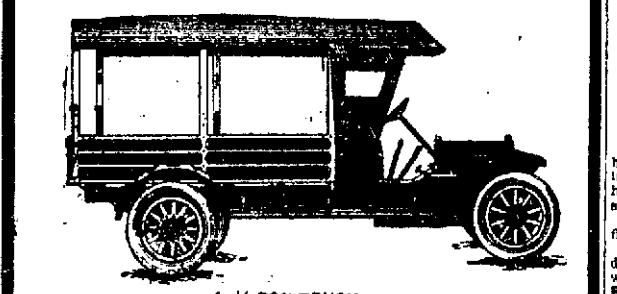

But Hughie Jennings Can't Give Them Better Than Fourth Place in the Pennant Race.

The surprise of the season in the American League this year was the New York club. The sensational sport which kept the team at the top of near the top of the standings was due principally to the splendid pitching of two young men, Ford and Vaughn. They were added to the staff only this year. Ford's work so far has been really phenomenal for a youngster. The opinion of the experts is that he is not "a flash in the pan," but is thoroughly capable box worker and will continue to make a good record.

Vaughn, New York's big left hander, has all the earmarks of a good pitcher and will win a number of games for this club before the season is over.

The outfield and infield, with the exception of Chase, are nothing to boast of, and I cannot see where the New

TWO GAMES THROWN OUT IN RAISIN LEAGUE

Hanford Finishes in First Place; Pres. Garman Declines Controversy.

The official standing of the teams in the Raisin Belt League at the close of the 1910 season follows:

| Team | Won | Lost | Pct. |
|---------|-----|------|------|
| Hanford | 7 | 1 | .875 |
| Madera | 6 | 2 | .750 |
| Lemoore | 5 | 5 | .500 |
| Fresno | 1 | 9 | .100 |

The foregoing percentage table was made public yesterday by President Garman of the Raisin Belt League, after he had handed down a decision, against the Hanford-Madera controversy over two protested games. In his statement, President Garman declared two games as "no contests." These are a game played at Madera on July 24 between Hanford and Madera and a game pulled off at Hanford on August 21 between the same teams.

The game of July 24 was thrown out because Madera used four professionals, namely—Dusty Miller, Buck Owens, C. Allen and Buck Francis. The Coyotes won the game, but the victory will not count in the official percentage table, as printed above.

The game of August 21 on the Hanford grounds was thrown out because both teams violated the by-laws of the league. Hanford used four professionals, Jack Trippett, Jones and Funk, while Madera played the same number, as follows: Owens, Francis, Mundorf and Ray. Inasmuch as both teams violated the rule against using more than three professionals in one game, President Garman readily threw the game out. As for the game on July 24 at Madera, he decided to erase it from the table also as Madera used four professionals.

As matters stand, the Hanford team finished in first place. Madera landed second money, Lemoore grabbed third coin and Fresno finished fourth. No games between Lemoore and Fresno were protested, hence both these aggregations get credit for ten games played in the official count. As two games between Hanford and Madera were declared "no contests" these teams are given credit for eight games only. The pennant has not been awarded to any team and if Hanford and Madera do not get together and play off a post-season series of three or five games in October, the coveted pennant will rest with no club. If the first and second series get together the sinking fund of \$174.50 will be divided 60 and 40 per cent, or the entire proceeds will go to the winner, according to President Garman's statement.

ANACONDA ENTRIES

ANACONDA, Sept. 3.—Entries for Monday, September 5th:

First race, 4 1-2 furlongs, selling—Twenty Huns, Miss Greenwood, Wiltrude S, 104; Great Caesar, 113; Practitioner, 107; Wabunan, 97.

Second race, five furlongs, selling—Aunt Polly, Lee Harrison II, Bill Mayhew, Philistine, Lillian Ray, Sainet, Bitter Sir, Giltet, 113; Garter Light, 108.

Third race, 5 1-2 furlongs, selling—Thomas Calhoun, 114; x Oswald B, 100; Tuberosa, 105; Lady Adelaide, Native Son, Madeline Musgrave, 111.

Fourth race, Labor Day Handicap, six furlongs, all ages—Lord of the Forest, 107; Aristonette, 101; Balrosta, 100; Marian Casey, 94; Miles, 96; Jim Bassy, 90.

Fifth race, mile selling—Tromargo, Tom Reid, 107; Knight of Ivanhoe, Spring Ban, 109; Sir Angus, x Sink Spring, 104; Fuslieer, 101.

Sixth race, one mile, selling—Cabin, Tavora, 109; Zoroaster, 101; Kogo, x Patriotic, Minnie Bonnis, Dave Weber, 104; x Luvina, 107.

Seventh race, six furlongs, selling—Irrigator, Harka, 104; Platon, Ornat Tillinghast, Deneen Roy T, Gene Wood, 111; El Perfecto, 109; Big Eldorado, Electrowan, 105; Galena Gate, 100.

8—Apprentice allowance.

Weather clear.

Track fast.

MEADOW, FAVORITE, WINS EXPOSITION DERBY AT DENVER TRACK

DENVER, Sept. 3.—Meadow, a 1 to 2 favorite, won the Colorado Exposition Derby at a mile and an eighth today in easy style. Moleworth on the favorite held him in second place until the stretch when he let him down and won as he pleased. Orbicular was second, two lengths in front of Necker, the only other starter.

RESULTS:

First race, four furlongs—Buck Thomas, won; Bonnie Hayes, second; Fore, third. Time, 1:47 3-5.

Second race, six furlongs, selling—Special Delivery, won; Rubiola, second; Antronita, third. Time, 1:13 2-5.

Third race, purse, six furlongs—Autumn Rose, won; Execute, second; Ocean Queen, third. Time, 1:13 2-5.

Fourth race, Colorado Exposition Derby, mile and an eighth—Meadow, won; Orbicular, second; Necker, third. Time, 1:51 3-5.

Fifth race, seven furlongs, selling—Fred Mulholland, won; Koper, second; Minnie Bright, third. Time, 1:27 3-5.

Sixth race, six furlongs, selling—Bill Eaton, won; The Slicker, second; Chief Desmond, third. Time, 1:12 2-5.

"POP" GEERS HAS HANDS FULL IN 2:16 TROT AT READVILLE

READVILLE, Sept. 3.—"Pop" Geers, behind the Abbe, had his hands full in defeating Evelyn W. in both of the heats required in deciding the Norfolk stake.

The 2:16 trot brought out the largest field in the meeting.

C. W. Laell, the wealthy owner and driver from Whitinsville, won easily with Creighton.

RESULTS:

Massachusetts stakes, 2:14 trot, purse \$10,000, two in three—Hall, worthy, b. g., by Axworthy (Nettingham), won second and third heats and race. Time, 2:07 1/2, 2:09. Doodle Archdale, bk. m. (Geary), won first heat. Time, 2:06 1/2. Willy B., third.

2:16 trot, purse \$1000, three in five—Creighton won in straight heats. Time, 2:11, 2:11 1/2, 2:11 1/2. Rebecca and Pauline second and third.

Bunker Hill Stakes, 2:07 pace, purse \$2000, two in three—Eas H. Kay won in two straight heats. Time, 2:05 1/2, 2:05 1/2. Kennier, second; Walter W., third.

The Norfolk Stakes, 2:14 pace, purse \$2500, two in three—The Abbe won in two straight heats. Time, 2:05 1/2, 2:05 1/2. Evelyn W., second; Branham Braugham, third.

TULARE PLAYS RAISIN BEAT CHAMPS TODAY

Tulare plays at Hanford today. Following are the lineups:

Tulare—Punk, left; W. Kelly, 2d; Kuhn, catcher; Bath, 1st; P. Kelley, 3d; Eagle, short; Cecil, center; Talmage, right; Buckles, pitcher.

Hanford—Rogers, center; Newport, 2d; John, catcher; Martin, 1st; Weinbaum, right; Ragan, short; Tognorio, 1st; Allen, left; Trippett, pitcher.

TWO FAMOUS RIVALS SCHEDULED TO MEET IN FIFTEEN MILE RACE

MONTREAL, Canada, Sept. 3.—Tom Longboat, the Indian Marathon runner, is planning a schedule of exhibition runs, which he expects will keep him busy for about three months abroad. On Labor Day Longboat is scheduled to meet Alfred Shrubbs, the English distance runner, here, and following the contest he will leave for England. Longboat says he expects to tour Ireland and Scotland. The pair have met several times at distances from fifteen miles up to the full Marathon route within the last two years. Shrubbs has beaten Longboat at fifteen miles, while the Indian has turned the tables on the Englishman at the Marathon distance. Longboat has been in training for some time and is sure that he will defeat Shrubbs at the latter's favorite distance. At present Shrubbs is ruling favorite, the experts figuring that if Shrubbs could beat the Indian when the latter was at his best he should easily repeat, as it has been some time since the Indian competed in any event.

BOXER DRINKS POISON BY MISTAKE; IS DEAD

PITTSBURG, Pa., Sept. 3.—Frazier Ziringer, a bantam weight boxer, died here today from a drink of carbolic acid which he took in mistake for champagne. Although only 22 years of age Ziringer had taken part in over 200 battles.

OLYMPIC CLUB WINS FAVORABLE LAURELS AT BIG FAIR MEET

Edward MacCauley Breaks Record in 440 Yard Run; Fast Time Made.

SACRAMENTO, Sept. 3.—With a total of fifty points the Olympic Club of San Francisco today took the annual track and field meet of the Pacific Athletic Association, held in this city in connection with the State fair. Sacramento Athletic Club was second in the 440 yard run Edward MacCauley of the Olympic Club broke the P. A. A. record of 58.4 seconds. He made the distance in 49.4 seconds.

SUMMARY:

100 Yard dash—G. H. Meding (P. A. C.) won; P. C. Gerhardt (O. C.), second; Russell Rogers (P. A. C.), third. Time, 10:1.

220 Yard dash—Russell Rogers (P. A. C.) won; G. H. Meding (P. A. C.), second; W. G. Smitzer (P. A. C.), third. Time, 22.4.

150 Yards hurdle—Charles E. Morris (unattached) won; A. B. Kinsheloe (S. A. C.), second. Time, 17.

440 Yard run—Ed MacCauley (O. C.) won; F. A. Smith (I. A. A. C.), second; Ed Martin (I. A. A. C.), third. Time, 49.4.

880 Yard run—F. A. Smith (I. A. A. C.) won; J. R. Kelley (O. C.), second; Don Riordan (I. A. A. C.), third. Time, 2:22.

220 Yard hurdle—Charles E. Morris (unattached) won; A. B. Kinsheloe (S. A. C.), second; C. F. Gannon (S. A. C.), third. Time, 23:1.

One mile run—R. P. Cragg (O. C.) won; E. E. Maundrell (O. C.), second; H. M. Williams (O. C.), third. Time, 4:35.

Five mile run—W. Garvin (O. C.) won; R. H. Lee (P. A. C.), second; Robert Howden, Jr., (unattached), third. Time 23:31.4.

Sixteen pound shot put—Ralph Rose (O. C.) won; Spence Dixon (S. A. C.), second; Otto Snedger (O. C.), third. Distance, 47 feet 10 1-2 inches.

Sixteen pound hammer throw—Ralph Rose (O. C.) won; A. D. Plaw (O. C.), second. Distance, 143.3 feet.

Running high jump—Palma Holt (S. A. C.) won; E. L. Wines (U. C.), second; R. L. Hope (S. A. C.), third. Height, 5 feet 11 1-2 inches.

Running broad jump—H. Starrett (I. A. A. C.) won; Spence Dixon (S. A. C.), second; George Eagler (P. A. C.), third. Distance, 153 feet 5 1-2 inches.

ANACONDA, Sept. 3.—The team with top weight, ran over the field in the feature race today. A hand of winning the event after leading all the way.

SUMMARY:

First race, five furlongs—Eas H. Kay (Van Dusen), 11 to 1, won; 2nd Harry 115 (Coburn), 50 to 1, second; 3rd Abrams, 121 (J. Parker), 15 to 1, third. Time, 1:52 1-5.

Second race, five furlongs, selling—Trameter, 187 (Van Dusen), 5 to 1, won; Aunt Polly, 186 (Dunham), 50 to 1, second; Madeline Musgrave, 187 (Limbforth), 2 to 1, third. Time, 1:52 1-5.

Third race, five and a half furlongs, selling—Marian Casey, 95 (Dunham), 1 to 2, won; Mamma, 100 (Van Dusen), 3 to 1, second; Mamma, 100 (Van Dusen), 3 to 1, second; Mamma, 100 (Van Dusen), 3 to 1, second. Time, 1:59 4-5.

Fourth race, six furlongs, selling—Furrows, 119 (Dunham), 1 to 2, won; Mamma, 100 (Van Dusen), 3 to 1, second; Mamma, 100 (Van Dusen), 3 to 1, second. Time, 1:59 4-5.

Fifth race, six furlongs, selling—Furrows, 119 (Dunham), 1 to 2, won; Mamma, 100 (Van Dusen), 3 to 1, second; Mamma, 100 (Van Dusen), 3 to 1, second. Time, 1:59 4-5.

SIXTH RACE, six furlongs, selling—Furrows, 119 (Dunham), 1 to 2, won; Mamma, 100 (Van Dusen), 3 to 1, second; Mamma, 100 (Van Dusen), 3 to 1, second. Time, 1:59 4-5.

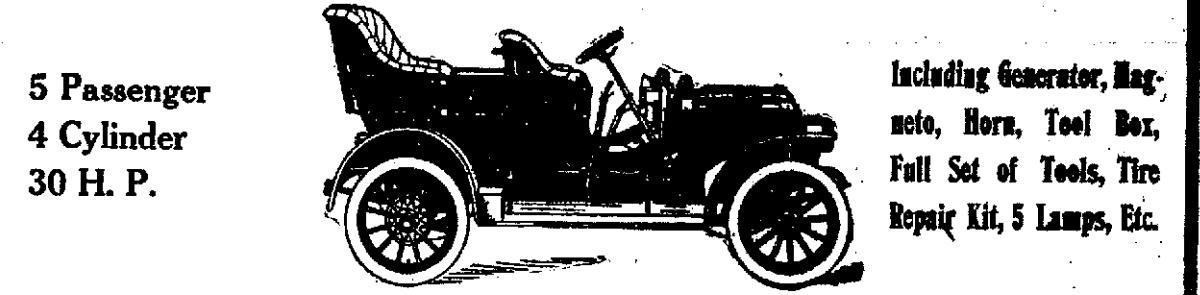

SEVENTH RACE, six furlongs, selling—Furrows, 119 (Dunham), 1 to 2, won; Mamma, 100 (Van Dusen), 3 to 1, second; Mamma, 100 (Van Dusen), 3 to 1, second. Time, 1:59 4-5.

EIGHTH RACE, six furlongs, selling—Furrows, 119 (Dunham), 1 to 2, won; Mamma, 100 (Van Dusen), 3 to 1, second; Mamma, 100 (Van Dusen), 3 to 1, second. Time, 1:59 4-5.

NINTH RACE, six furlongs, selling—Furrows, 119 (Dunham), 1 to 2, won; Mamma, 100 (Van Dusen), 3 to 1, second; Mamma, 100 (Van Dusen), 3 to 1, second. Time, 1:59 4-5.

TENTH RACE, six furlongs, selling—Furrows, 119 (Dunham), 1 to 2, won; Mamma, 100 (Van Dusen), 3 to 1, second; Mamma, 100 (Van Dusen), 3 to 1, second. Time, 1:59 4-5.

"Maxwell" 1911 Model E-11 \$1650

This New Model Ready for Delivery Now

We call it the family car because it's the car every man with a family can afford to own and operate. Because it is big and roomy—accommodating five passengers. Because it's a car of such simple mechanism and absolute reliability that even a woman can drive without any fear of break-down on the road.

Last year we thought this car was perfection itself. Thousands were sold and they won the unqualified endorsement of every owner. But a year's time suggested some little improvements and refinements that now make this car even more economical and more luxurious.

The Greatest Family Car

Power, Speed Durability

An Example Of Its Economy

The Maxwell was the first car ever to advertise its cost of up-keep, few cars have dared to do it. And in no instance has the lowness of Maxwell figures been equalled. Last year this Maxwell model was advertised to run 5000 miles a year at a total average cost of \$3.98 a week, including every expense. Hundreds of letters have since been received from Maxwell owners stating that our average figures are too high.

See the MAXWELL Before You Buy

You can't afford to buy an automobile without first looking the Maxwell over. For without seeing and understanding the mechanism and construction of this car you can never fully appreciate its many fine points. In the Maxwell you have a sound automobile investment, proved for over eight years—not a hazardous speculation.

We want to demonstrate this car to you. On all orders placed now we absolutely guarantee immediate delivery. Send to us for the illustrated catalog of all the Maxwell 1911 models. Do it today! Just say "Mail Book."

RELINQUISHES

CONTRACT WITH
H. V. RUDY

Willis Pike to Sell Goods for
Members of Dried Fruit
Agency.

SELECTED BY THEM

Rudy Turns Raisins Over to
Growers Rather Than
Fight Petition.

Rather than make a defense to the petition recently filed in the Superior court by members of the California Dried Fruit Agency asking for an order restraining him from selling 500 tons of raisins for 2 1/4 cents, H. V. Rudy, president and general manager of the Dried Fruit Agency, has assigned the goods to Willis Pike to sell at any figure he may see fit. Rudy has relinquished his contract with Rudy.

When the papers in the suit were served on Rudy, he immediately declared that he would allow the contract holders to take the raisins and sell them for whatever price they could receive inasmuch as they had asserted that they could get more than 2 1/4 cents.

The plaintiffs in the suit immediately accepted Rudy's offer and elected Willis Pike sales agent to dispose of the goods. It is understood that in doing this the members agree to withdraw the suit.

Willis Pike has secured the goods from Fred Dow, to whom they were sold by Rudy and has notified all the packers that he has the block for sale. It is generally believed that he will have no trouble whatever in securing 3 cents for them.

Dow stated last night that he had relinquished his contract with Rudy that the growers might get all they could out of the goods and he will join with Pike in seeking to effect a sale. He asserted that he was working for the interests of the growers, with whom he was dealing continually and that it was for this reason that he did not hold Rudy to his contract.

Willis Pike, who will act as the principal selling agent, was formerly connected with the Dried Fruit Agency, but resigned because the affairs of the company were not run in accordance with his policies of business. That he retains the confidence of the growers has been made evident in their selection of him as selling agent.

CHRISTIAN CHURCH
NEW YEAR TODAY

Today marks the real beginning of the church year for the congregation of the First Christian Church, which is to be a great rally service at 10:45, as well as at the Sunday school at 9:30. A letter has been sent to every member in the city, and a great service is expected. Special music will be rendered. Last year was a very successful year under the leadership of the new pastor, Rev. C. E. Phillips. Besides regular expenses, the church raised \$3000 for charity, missions and extraneous work. This year it plans to have a reading and game room open every night in the week; an assistant pastor; a new mission Sunday school; and the best music in the city. This church desires to serve the city, influencing it from a Christian point of view in ethics, immortality and civic righteousness, and to be a church so democratic that it will be like the Christ, a refuge for the people.

Talk Over the
Paint Question

Talk over the paint question with us. We are best qualified to advise you what is best for you to do, as we are thoroughly versed in all matters of paint and advocate nothing but good paint.

We are agents for Acme Paints, known the world over as the best that can be made. All tints and colors here.

DENTIST
1010-1012 BUILDING
1010-1012 J STREET

GROWERS OF HANFORD

OFFERED 3 3/4 CENTS

Reports of Bids for Muscats
Received by Packers
in This City.

Several offers of 3 3/4 cents have been made for Muscat raisins in Hanford, according to reports which have been received by packers in this city, and in one or two instances, it is reported that 3 1/2 cents has been offered by local packers for goods here.

It was asserted last night that the dried fruit market generally is exceedingly strong all along the line. The packers who have been boosting prices declare that the growers have been taken entirely off their feet and that they do not now know really what to do. That a 4 cent price will be received before the season is over is the prediction of these same packers.

The market for Muscats at 3 1/2 cents is exceedingly strong and even the commission men are now offering to buy at that price. Offers of 3 1/2 cents are now being made as freely for Sultanas and Thompsons.

The seedless situation has advanced because of the short European crops. While it was generally known that the price on Zante currants would be high, the opening price was 2 cents higher than any one figured.

BRYAN FORSEES SURE
DEMOCRATIC VICTORY

KANSAS CITY, Sept. 3.—William J. Bryan arrived in Kansas City today and later delivered a speech at the county fair at Independence, Mo. In an interview with the press, he said:

"The Democratic opportunity to carry the next Congress is good and there are two reasons for it. In the first place, there is a growth in sentiment in favor of Democratic policies. Second, the Republican party is divided and in each district there is opposition to the Republican candidate, whether he be a Stand-patter or an Insurgent; and the Democrats have a fine opportunity to elect the next President if they have the next Congress, which now seems probable, and provided the next Congress puts through satisfactory measures."

ADMIRAL REESE RETIRES
AFTER NOTABLE CAREER

WASHINGTON, Sept. 3.—Rear Admiral Corwin H. Reese, a conspicuous figure in the navy, will be placed on the retired list tomorrow on account of age. His career is unique in military annals in that he fought in the volunteer army during the Civil War, participating in more than thirty land battles and subsequently took an active part in the Spanish war as an officer of the navy. He began his military service at the age of 15 and at the close of the war, he began his military service on the naval academy.

During the battle of Manila Bay in 1898 he was executive officer of the Olympia. Admiral Dewey's flagship. Afterwards he was captain of the Portsmouth, N. H. navy yard, and finally commandant of the Honolulu naval station. He is a native of Ohio.

STRAUS ON TRIP
TO UNITED STATES

CONSTANTINOPLE, Sept. 3.—American Ambassador Straus accompanied by Mrs. Straus left today for a holiday in the United States. Prior to their departure the ambassador cleared up a number of matters relating to American educational institutions in Turkey. Among other things he arranged for the transfers of the property for the building of the new American college for girls, and gave a permit for the enlargement of Robert College and an Imperial decree exempting the American College at Beirut from various annoying restrictions.

HUNGARIAN TOWNSHIP
SUES ABSCONDING OFFICIAL
IN NEW YORK CITY

NEW YORK, Sept. 3.—The township of Erzsébet Falva, Hungary, has brought suit for \$10,000 in the state supreme court here against its decamping treasurer, Ernest Kern, alias George Kallath, who was arrested on Tuesday and held for extradition on a charge of embezzlement. Finding that he had property in the city of New York, the township decided on civil procedure in an attempt to recover the alleged loss.

INSANE CHINESE COMMITS
MURDER AND SUICIDE

SAN FRANCISCO, Sept. 3.—Having become insane from brooding over financial losses, Young Jup, formerly a well-known and wealthy Chinese merchant of this city, entered a Chinese restaurant last night and, without provocation, shot Young Yuen, a merchant, inflicting a wound which caused death today. Young Jup then inflicted a mortal wound upon himself.

KRYPTOK
INVISIBLE BI-FOCAL

If you let us make your Kryptok lenses, you will get the finest finished lens that can be produced. Everything is done in our own factory except making the blanks; those we get from the factory of the Kryptok Company.

Such intense personal interest and attention to detail as we give every pair of lenses we make is fast building a reputation for this optical establishment. If you give us your work it will be done just right.

OLIVES BETTER PAYING
THAN GRAPES OR
FRUIT TREES

W. Winsor of Los Angeles
Urges Greater Acreage
for Pickle Olive.

Trees Require Irrigation
and Care, But Offer
Sure Returns.

"Olives will pay more than any other fruit crop, excepting citrus oranges," remarked William Winsor, a buyer for a Los Angeles olive company, at the Esplanade last evening. "Olives are a more stable crop than raisins, and tallures in crops are exceptional."

A typical example of an olive grower is one about thirty miles from here who has 140 trees, set out on about one and three-quarters acres. From his crop he receives regularly each year \$300.

"Several things must be borne in mind by the olive grower, who does not grow his trees the attention received by other crops."

"In the first place olives for pickling are the only kind that pay well. The grower should plant the Mission variety, which bears fruit from five to six times as large as the oil varieties. He can make good money from these. Olive oil can be imported so cheaply from Italy that oil olives do not pay very much in spite of the tariff. The fact that harvesting in the Mediterranean countries costs about \$3 a ton instead of \$12 to \$15 as here probably figures largely. However, the new tariff established a duty of \$70 a ton on pickling olives, and this makes their culture worth while from a financial point of view."

"Olives trees should be cared for. Many farmers think that an olive tree will grow anywhere, and so it will. It is a hardy tree, but to receive the best results, careful irrigation and cultivation should be followed."

"Trees can be planted with regard to the soil and on years, and possibly, it is a growing advice I should follow this plan. The trees bear on alternate years. If only half the trees are set out one year, and the other half the next year a continuous crop can be assured. The trees should be forty feet apart."

"Contrary to what many believe here, Fresno has one of the smallest acreages in olives of counties in the state. There is nothing here to compare to the great Sylmar orchard in Los Angeles county, where 2000 acres are planted in olives, and to other orchards there. Butte county, San Diego county, and other counties have greater olive resources."

"The majority of the trees here are of the oil pressing varieties. Pickling olives would pay much better and could be grafted and budded on the old trees."

"Olives trees came into full bearing in from seven to ten years. They will bear a tenth of a crop in the third year, and other crops, grapes, barley and other farm products, may be grown between the rows of olives. The roots of the olive trees go straight down, instead of spreading, and bi-crops would not exhaust the soil, as has been shown in many places in the state."

"Olives trees are valuable as wind-breaks, when planted in rows about other crops. Irrigating water which would have to be conveyed around a vineyard, for example, any way would water the trees. Why ranchers here do not have more first-class olive trees I cannot understand, unless it is simply because they do not understand the possibilities of olive culture."

RAISIN SUGGESTION.

Mr. Winsor a few months ago perfected a process for "olive chocolates," in which that fruit is coated with a thick layer of chocolate. The confection in appearance suggests the regular dipped chocolate creams of confectioners. Already these are on sale by the vendors of the famous "Broad Walk" at Atlantic City, as soon after the invention the Los Angeles Chamber of Commerce shipped a large quantity East to this center to introduce them to the summer crowds and create a demand for the product of Los Angeles.

"Raisin candy," remarked Mr. Winsor in commenting on the olive chocolates, "offer a big field for the candy and product, I believe. It is a striking thing to see so little for sale here. In Los Angeles raisin chocolates are for sale in every candy store at 40 cents a pound, but the stores here do not seem to exhibit the raisin chocolates at all."

The olive chocolates are the result of a patented process by which the sugar of the chocolate coating combines with the oil of the olive. The process, it is believed, offers great possibilities in the manufacture of sweets which would be palatable to children.

MEXICANS WELCOME
VISITING AMERICANS

EL PASO, Texas, Sept. 3.—The American delegation to the Mexican centennial was received officially at Nuevo Laredo today by the Mexican commission. A band and military escort greeted the American visitors and there was a reception, with addresses of welcome at the customs house.

The special train which bore the American delegates away to Mexico City was decorated in the colors of both nations.

Railroad buildings and public buildings generally throughout Mexico are decorated for the centennial celebration.

IROQUOIS MEMORIAL
HOSPITAL IS BEGUN

CHICAGO, Sept. 3.—Construction work on the Iroquois memorial hospital has been begun and the contract calls for completion of the building by December 30th, the anniversary of the Iroquois Theater fire in which nearly 600 persons lost their lives.

The building at 87 Market street is to be put upon and equipped by the Iroquois Memorial Association and then turned over to the city of Chicago to be operated as an emergency hospital, receiving emergency cases and victims of accidents in the downtown district.

The city has a lease on the property for thirty years and has turned the land over to the association.

The hospital will cost \$20,000.

LONDON COMMENT
ON CANAL QUESTION

Roosevelt's Proposal to
Fortify Panama Would
Violate Treaty.

LONDON, Sept. 3. Mr. Roosevelt's demand that the United States fortify the Panama Canal, set forth in his speech at Omaha yesterday, is characterized by the Westminster Gazette today as a "direct rejection of the terms of the American and British agreement of 1901 under which the canalization of the canal is guaranteed."

The carrying out of such a plan, the Gazette says, "would mean the tearing up of the agreement."

The paper adds, it is to be regrettable that the United States should assume some military control over the new waterway, but suggests that the former president that the United States should procure any desired alteration of the agreement, through diplomatic methods and not by the repudiation of its engagements.

ARRESTED FOR SWINDLING.
BUTTE, Mont., Sept. 3.—H. R. Culver, a horseman, is on his way to this city from Livingston in the custody of detectives, on a charge of having obtained \$1,000 from Frank Wilson by false pretenses. Culver came here from Concord, Calif.

INSANE MAN SUICIDES
ON BOARD A STEAMER

SAN FRANCISCO, Sept. 3.—A. H. Gregory was found dead in the stateroom of the steamer Queen last night just before that vessel arrived at this port from Seattle.

Gregory acted queerly yesterday and fearing that he might harm himself, the officers of the steamer locked him in his stateroom. They neglected, however, to take his pocket knife from him, and he cut his throat with that weapon.

He was registered on board as A. H. Gregory, but papers found on him bore the name of A. W. Gregory. Among the papers was an express receipt from Sacramento.

RECORD YEAR IN
AMERICAN IMPORTS

WASHINGTON, Sept. 3.—Uncle Sam's import trade under the Payne Aldrich tariff law during the year was a record breaker, according to the government's statistical reports.

During the twelve months ending July 31, last, imports aggregating \$1,562,400,000 came into the United States. Of this total \$704,600,000 was listed as dutiable, while \$768,000,000 entered free of duty.

Although it was the first year of the Payne Aldrich law, it eclipsed all former records under the Dingley, Wilson and McKinley laws. Until the Payne Aldrich law became effective August 1, 1910, the banner year of the previous eighteen years had been 1907, when under the Dingley act, an aggregate of \$1,456,000,000 of imports was recorded.

Customs receipts during the last year amounted to \$327,900,000, which was more than \$17,000,000 in excess of the previous year under the Dingley act. The customs receipts during each of the eighteen years preceding 1910 showed a much less encouraging record, except in 1904 and 1907, when customs rates exceeded last year's total.

KATHERINE ELKINS WILL
MARRY PRINCE IN FEBRUARY

PARIS, Sept. 3.—Miss Katherine Elkins and Mrs. R. H. Pitt returned to Paris from London today. Circumstantial stories published here, as well as in Rome, are that Miss Elkins and the Duke of the Abruzzi will be married in February, the opposition of Dowager Queen Margherita having been abandoned. According to these reports, the announcement of the engagement will be made in October. The Duchess of Aosta is represented as still opposing the union.

BUBONIC PLAGUE
FEARED IN RUSSIA

As Cholera Decreases in
Virulence, New Pestilence Approaches.

ST. PETERSBURG, Sept. 3.—Since the outbreak of the epidemic this year, 13,641 cases of cholera, with 64,403 deaths, have been officially reported in Russia.

"The scourge, however, is lessening. Returns to the Sanitary Bureau for the week ending August 27th show a total of 12,510 new cases, with 6,335 deaths. This is a marked falling off in the number of victims from the week preceding."

In St. Petersburg today there were forty-three new cases, twenty-four deaths and 643 suspected cases in the hospitals. The local figures for the present week are 427 new cases, and 166 deaths, against 435 new cases and 178 deaths last week.

Leading medical authorities express their conviction that bubonic plague will reach the city soon from Odessa. A rat-killing campaign with the use of traps and poison has been begun by an army of 200,000 persons, especially assigned to this work. A premium of five copecks, a little more than three cents in American money, is offered for every rat destroyed.

In Odessa so far there have been seventy-five cases with eighteen deaths. Twenty-one persons have been discharged from the hospitals, while thirty-seven remain there under observation.

PRODUCERS' TRANSPORTATION CO.
INCREASES CAPACITY OF PIPE LINE

Standard Also Has Prepared to Handle More Oil; Eastern Manufacturers Busy Putting Out Oil Well Supplies for California.

COALINGA, Sept. 2.—The Producers' Transportation Company is increasing the capacity of its pipe line by putting in a new line at every other station, which enables the company to cut out, during the hot weather, every other station. The "by-pass" is made by cutting into the line at each side of the station to be cut out, and running a line around the station, instead of pumping into the station and then pumping out. The oil is flowing very freely this season, as the weather has been very hot, keeping the oil thin. The Standard Oil Company has increased its transportation capacity on the pipe line through the San Joaquin valley, by putting in "bridges" from every station. The "bridge" is cut into the main line about three miles out from the station, the line running parallel with the main line, and runs into the next station. The "bridge" is then moved, as it gains after three miles, and the company is enabled during the hot weather to about double the carrying capacity of the pipe line by thus relieving the pressure.

The British Columbia Oil Company Limited, on section 10-15, is about 3,100 feet deep with the rotary. The contract called for a "3,000 foot hole." The drilling at present is very encouraging and as long as no hard shells are encountered the rotary will continue. The 2 1/2 inch casing is being run in the hole, showing a straight hole. The well will be completed into the oil sand with standard tools. The formation shows streaks of sand with blue shale. On section 24, 20-14 (Wabash) well No. 12 is 240 feet deep with open hole. A full standard rig will be completed this week on location 24; this is shallow territory, about 1,600 feet, and the standard rig is used.

Parties returning from the East report that the manufacturers very busy manufacturing oil well supply material of every class for the Coast trade. The National Tube Works at Pittsburgh has orders for 1,100 carloads of casing and the pipe for California points. From remarks dropped about the factories it is gathered that much of the line pipe was going to California for pipe lines. The general pulse of the East would indicate increased activity in California and other Western points where oil is the chief industry.

The Esplanade Hotel, located on section 20-15, finished well No. 23 about 10 days ago and it has been on the beam since, making 150 barrels per day, 17 degrees Beaume gravity oil. Three combustion rotary standard rigs have been completed. VALLECITOS OIL FIELDS NOW SCENE
OF MUCH DEVELOPMENT WORK

The Vallecitos oil fields are attracting some attention among oil men and investors. In the last month two or three articles have appeared in the Republican regarding this field. As has been already said, this field is situated on the Vallecitos valley in southeastern San Benito county.

There is no question in regard to the existence of oil in this valley, as it appears to be found in numerous places throughout the field, and the reports of all geologists and expert oil men are in favor of it.

The John Kern Oil & Development Company has for its president John J. Kern; J. H. Kelly, vice-president; Frank C. Central California, treasurer; and J. H. Kelly, secretary. It is equipped with a new derrick, boiler and engine; in fact is fully equipped with a standard rig.

Work on the property is being pushed under efficient management. Two crews are employed, so that the work is continuous. The company is now working in shale at a depth of approximately 1,000 feet and calculates entering into the oil strata at 2,000 feet or less.

Good indications have been struck. A week ago the gas blew the biter up, and on last Friday, 26th ult. the gas blew the sand up through the biter, showing good indications of the approaching nearness to the oil sand. If this holds good, the John Kern oil well will be producing before expected.

NEW BEDFORD CO. The New Bedford Oil Company, situated on section 4, township 17 south, range 12 east, San Benito county, is composed of New Bedford, Mass. people, though a few on this coast have some interest, including Mr. John Ashurst, Vallecitos, James Finch, manager of the New Idria Quicksilver Mines; M. M. Gonzalez of New Idria; Emil Dildred, representing the New Bedford owners, and George Landry, who have visited this field have been favorable.

The prospects in the Vallecitos today are as good as or better than they were in the Coalinga district at the same stage of development. Transportation and the means of transportation enters largely into the success of everything, and it is so in the Vallecitos field. At present, the best road leads to Tres Pinos, the nearest railroad station in San Benito county, a distance of 52 miles. This is the stage road.

Mendota, in Fresno county, is the nearest railroad station, being about 28 miles from the Vallecitos, and it is from this station that all of the heavy freight will have to be hauled. It takes seven days to make a round trip with a team to Tres Pinos, while a round trip can be made from Mendota in four.

While the Silver creek or Mendota road is not all that could be desired, still fair loads are being drawn over it. A recent new survey of this road has been made by San Benito county, following the many crossings of Silver creek, and the people are going to build this road. The estimated cost is \$12,000.

It is not merely a surprise that the people are going to build the road, but it is a matter of necessity on the part of the New Idria Quicksilver Mining company, as it has to have a great amount of lumber for timbering the mines, and it is compelled to be the largest factor in building the road. The Fresno county end of the road is being built, and needs the attention of Supervisor Jorgensen, and should be changed so as to avoid the old creek beds. If this is done, then good loads can be hauled right through.

JOHN KERN OIL CO. Strictly speaking, the John Kern Oil Co. cannot be said to be in the Vallecitos oil field. It is situated in section 21, township 15 south, range 12 east, in Fresno county on Panache creek, below the junction of the Panache and Silver creeks. Both of these creeks head in the Vallecitos valley. The formation here pitches toward the east and northeast, toward the John Kern field, which between the John Kern field and the Vallecitos field, the formation changes and pitches to the opposite, making, as it would seem, two distinct fields.

The John Kern Oil & Development Company has for its president John J. Kern; J. H. Kelly, vice-president; Frank C. Central California, treasurer; and J. H. Kelly, secretary. It is equipped with a new derrick, boiler and engine; in fact is fully equipped with a standard rig.

At present, the best road leads to Tres Pinos, the nearest railroad station in San Benito county, a distance of 52 miles. This is the stage road.

"Range 16 Company," the west half of section 3, township 17 south, range 11 east. Mr. Parsons of Los Angeles, the west half of section 33, township 16 south, range 11 east; north half of section 5, northwest quarter of section 6, township 17 south, range 11 east. Mr. Bagley of Los Angeles, south half of section 4, all section 10, north half of section 11, township 17 south, range 11 east.

Mr. Fairfield of Los Angeles, the northeast quarter northwest of section 4, township 17 south, range 11 east. Mr. Blodgett of Los Angeles, southwest quarter of section 12, northwest half of section 13, northeast quarter of section 14, township 17 south, range 11 east.

Mr. Stowe, section 36, township 16 south, range 11 east; north half of section 12, township 17 south, range 11 east; section 18, township 17 south, range 12 east.

Paul Rink of San Francisco, north half of north half of section 7, township 17 south, range 12 east. E. J. Miller, Fresno, west half of northwest quarter of section 14, south half of southeast quarter and northeast quarter of southwest quarter of section 15, township 17 south, range 11 east.

These leases were given conditioned that the parties will within six months commence actual drilling. SHELLEY OIL CO. The Shelley Oil Company, formerly the San Carlos, is situated in the southwest quarter of section 8, township 17 south, range 11 east. This company is composed of San Francisco and Merced county people. H. K. Huls of Shelley is actively engaged in managing the property.

A standard rig and full equipment is on the ground and the well is down over 300 feet. H. C. Tuller is driller and one shift of men is now working. A good showing of oil was struck at 275 feet in dark brown shale. The general formation so far is brown shale and sandstone. Oil is expected within 1,000 feet.

TOWN OF SYNCLINE. Syncline has one house in it now. A house is being laid out, and a building now on the ground is being remodeled for a hotel. A house will be erected shortly for mercantile purposes, and another for a saloon. Earn accommodations will follow. The town is owned by the Vallecitos Land and Mercantile Co., J. Simon, president. HULS-BERG OIL CO. The Huls-Berg Oil Co., in section 25, township 16 south, range 10 east, bored a well with a portable rig, for the purpose of getting oil for fuel, and succeeded at a depth of 130 feet. The well has never been tested, but it is estimated at about five barrels per day.

In going this depth, the company passed through ten feet of shale and then through eleven and one-half feet of sandstone and strata sandstone from one to one and one-half feet thick, then through shale and struck oil at forty feet in brown shale and also at sixty-two feet deep and finally at 130 feet in oil sand. Gravity of oil about 25 degrees. The well has now filled up with oil to within fourteen feet of the surface. The Huls-Berg Company will erect a standard rig on the property at a point where the well elevated from the portable rig and utilize the oil for fuel.

RANGE 16 OIL CO. Range 16 Oil Company has a lease on the west half of section 13, township 17 south, range 11 east, and now has a standard rig on the ground. The company means business and have a fine location for a well. UNION OIL CO. The Union Oil Company has four wells in section 24, township 16 south, range 10 east. Dr. McDonald has been in charge of the property for a number of years. The wells of the company were known as Wells Nos. 1, 2, 3 and 4. Well No. 3, on which the derrick now stands, was drilled to a depth of about 1,000 feet, and a well was obtained that gushed for twenty-four hours and threw oil all over the derrick, and is now about a forty-barrel well.

Owing to the low prices of oil in 1902, the Union ceased operations in this field. The derrick at No. 1 was burned. No. 4 was sold, and derricks at Nos. 2 and 3 rotted and fell down. There is now a 1,000 barrel tank on the ground containing oil.

In the ravines and gulches the oil seeps in every crevice, and some of the gas must be used as fuel. The oil could be obtained on warm days. There is an open well that was dug by Mr. McDonald for the company one-half mile east of the borel wells, about ninety feet deep, that has ten feet of oil in it now.

The oil from these wells is very high grade, being 30 degree gravity. CAMPING AT THE BEACH. ONE VIEW. Sandy beach and breakers. Dashing foam and spray. Salty air so bracing. Bathing every day. Appetite that's awful. Pleasures within reach. Gracious! It's delightful. Camping on the beach. Pretty sights to charm you. Lolling on the sand. Dancing in the evening. Music by the band. Every youth a lover. Every girl a peach. Gracious! but it's pleasant. Camping on the beach. ANOTHER VIEW. Dinky little quarters. Sleeping on the floor. Sneakers on the rampage. Hunting round for gore. Piles a-crashing o'er you. Till you want to screech. Gracious! ain't it awful. Camping on the beach? Arms and nose a-peeling. Neck and legs all tanned. Babies cross and fretful. Grub all full of sand. Fleas by tens of millions. Chewing like a frightful. Gracious! but it's frightful. Camping at the beach? —Los Angeles Express.

PLAN MANY ATTRACTIVE FEATURES
FOR THE COUNTY FAIR IN OCTOBER

Surrounding Towns Keenly Alive to Advertising Value to Be Gained by Exhibit; Labor Unions to Crown Queen on Their Day.

"You will be perfectly justified in saying that the approaching Fresno county fair is going to be the best county fair ever held in the state of California," said Secretary R. A. Powell last night to a reporter for the Republican.

"In fact," continued Secretary Powell, "the outlook is now so bright that I have no hesitation in saying the Fresno fair will be a winner from start to finish. And there is every reason to think it should be, for during fair week the Danish Brotherhood of America will be here to the number of several thousands. They come from every state in the Union. It is well known that the Danes are a thrifty, hard working race—that they know a good thing when they see it, and that their eyesight is good. Out of this great number of exhibitors we should get our share of new settlers. For this reason, and to compete for this new citizenship, the various towns adjacent to Fresno are cheerfully lending a helping hand by making an exhibit of the leading industries of their respective localities, so that the visitor can determine just which of the towns he wants to visit for the purpose of investment. I am glad to say the towns in the San Joaquin valley are taking hold of the project in a hearty spirit, and that justifies me in saying that the coming Fresno county fair is destined to be the biggest thing of its kind ever held in California.

"Now, take the special features for Fresno's fair week," continued Secretary Powell, with enthusiasm. "Look at the special attractions we propose to have. There's 'Governor's Day,' Tuesday, October 4th, when Governor Gillett, Governor Hiram Johnson and 'Governor' Theodore Bell will be our guests, all appearing on and speaking in the special platform. In that connection, of course, we expect the candidates for all the other state offices to be present, as well as candidates for all the other offices in this district and county ticket—in other words, it will be the day of days for politicians in Fresno county. This card ought to bring many thousands of visitors to Fresno, men who would not come under any other circumstances.

"Then we have 'Union Labor Day' on the same day we have 'Fresno Day.' When all the labor unions of the San Joaquin valley are expected to participate in a body. They will elect one of their pretty girls as Queen of Fresno's Labor Union, which promises to be one of the greatest features of the fair. The queen will be crowned at the fair grounds, followed by a procession to the city hall at night.

"Our monthly books are now ready for free distribution. We want every one who has anything worthy of exhibiting to get one of these books. They give a world of information in everything pertaining to the fair and are a most interesting and valuable of the occasion.

"Please repeat it as coming from the board of directors that the coming Fresno county fair is going to be a winner from the hour the gates open on October 3rd until the close on October 20th.

"Along this same line we are trying to induce the towns that make exhibits to elect a queen of their respective towns, and then have them select from their members a Queen of Queens, to be crowned as such at the fair grounds, followed by a queen ball at night. From a purely social standpoint, this should be a great drawer to the fair, and we are anxious to propose to give very substantial cash prizes.

"Another great feature we are confidently counting on is that of 'Fraternal Order Day.' We have asked the cooperation of every fraternal order in Fresno and have secured from them their delegates at an early date in order to definitely agree on the program. We are offering a handsome silver cup to the order that makes the best showing on 'Fraternal Order Day.' In addition we are offering handsome cash prizes to the best men's teams and the best drilled women's teams of the fraternal orders. Captain Ed Jones, whose W. O. W. drill team took first prize at Portland, assures us that his team will take part so far as the time greater than any other team in the state. The military drill, on which his company is the prize, and take up fancy tactics, thus placing his team on an exact equality with all the other fraternal order drill teams in Fresno. It goes without saying that this will be a feature second to none on the program.

"We are greatly encouraged from an exhibitor's standpoint," continued the secretary, "for we are even now being crowded for space; in fact the application for far more space than is available ever before at this stage of the game. I can see now that every foot of space will be taken long before the fair opens, and that certainly sounds good to me. It shows that our people realize that now is the time to make a good showing. If we hope to capture the district fair at the hands of the coming legislature, it looks as if everybody wants to help, and that's why we are going to have the best county fair ever seen in California.

"Our monthly books are now ready for free distribution. We want every one who has anything worthy of exhibiting to get one of these books. They give a world of information in everything pertaining to the fair and are a most interesting and valuable of the occasion.

"Please repeat it as coming from the board of directors that the coming Fresno county fair is going to be a winner from the hour the gates open on October 3rd until the close on October 20th.

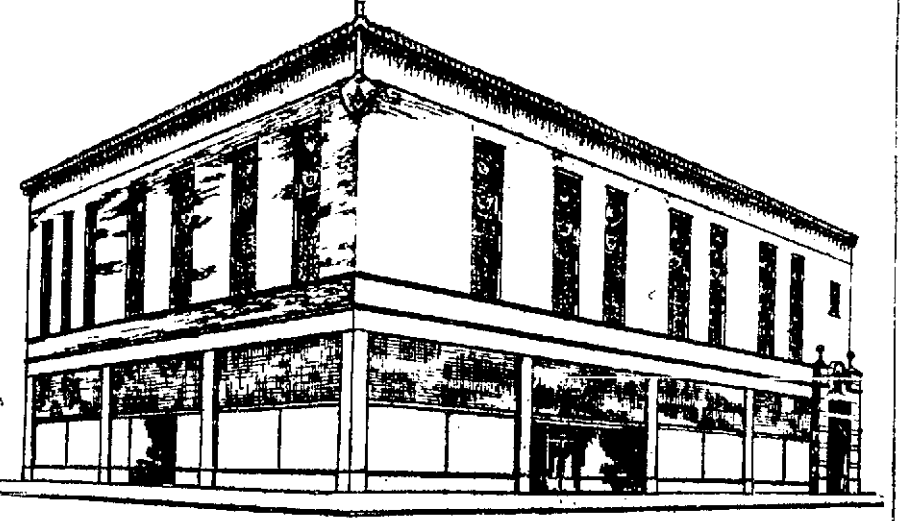

WOMEN SUFFRAGISTS
AS KISSABLE PERSONS

It was a Massachusetts man who said: "When a man comes home tired at night from his business he does not want to kiss a member of the school board or an overseer of the poor. And why not? Would that be any worse than kissing the president of a Browned society or the secretary of a woman's club? Is no woman kissable who does anything more than sit at home and wait for the tired business man? What a dreary picture of life does the weary anti-suffragist provide for his faithful wife. If that is the best argument a Massachusetts man can bring against the suffragist movement, we may well agree with Mrs. Phillips Snowden when she says that suffragism is already won. In England, at all events, it is as good as won. An overwhelming majority of the House of Commons has voted for a modified form of female suffrage. It may take a year or two to convey that vote into law, but the clock of history does not go backward. At the next election in Great Britain the contest is sure to be a close one. Mrs. Snowden is not far out when she says that by using her influence against anti-suffragists she has secured a Conservative constituency and so overturn the present government. In other words, the suffragists may seize the balance of power so efficiently held at present by the Irish. When England is won over we shall, for vote-getting purposes, have suffragism. And what are we all trembling for? To judge from the violent denunciations which are assailing our legislators from all sides, it is impossible to imagine that anything—even universal suffrage—could make matters worse. From Notes and Pictures in the September Metropolitan Magazine.

GET IN IF YOU CAN
IS NEWPORT SLOGAN

What is Newport's keynote? Is it exclusiveness? Far from it. Standard of fitness in a manner so far as some of the older dwellers may be concerned, but exclusiveness, never! More possessors of new fortunes have worked their way into the fashionable set by the way of Ocean Avenue and The Cliffs than by almost any other route in the world. Newport's wealth has been sealed by more foreigners than any other stronghold that has existed itself in its isolation and its fastidiously-guarded ramparts. But a young man alone in the world, socially gifted, finds a warm welcome at Newport. He is accepted, he is made a member, and sought after in direct proportion to his social gifts—from a woman's point of view. The keynote, the criterion for power—as far as entertaining goes—is the capacity for giving large and novel entertainments. The Newport must be amusing, must be varied. There is no relaxation to be had for the summer months. It's not a playground, it is a field of active effort—a constant vying show of fashion. It is a parade of all the attributes of proper pomp and vanity. Newport is a place that makes a man feel that he is in a state of ignominious war. —"Social Pictorial" in September Metropolitan Magazine.

PERSPECTIVE DRAWING OF MASONIC
TEMPLE SHOWS HANDSOME EDIFICE

Herewith is shown a perspective of the proposed Masonic Temple, to be erected at the corner of K and Marced streets. The excavation for the building has already been completed and actual construction work will soon begin. The building is designed by Starbuck & Wilde of Oakland. The details of the structure, which will be a model of its kind, have already been described in the Republican.

What Every Woman Should be Glad to Know

HAIR IN SUMMER

IN summer, when one is living much in the open, the hair is apt to fall out more readily than at any other season of the year. Dust is the cause of most of this tribulation, for the dust of the present day is not the harmless dust of old time roads. It is laden with filth and oil from roads traveled by hundreds of automobiles and comes in thick clouds instead of thin, as from a carriage. I refer particularly to the woman who lives an outdoor life and particularly she who motors during the summer and early fall months. In order to see just how much dust can accumulate in the hair in a day of automobile taking a perfectly clean brush and after a few strokes rub the brush well with a turkish towel. Each place where the fingers hold the towel will be defined with black smudges, and by the time the head has been entirely brushed the towel will be streaked with grime from end to end. The harm to the hair with this sticky dust forming a veritable paste at the roots can be imagined.

Daily brushings are not enough to combat the dust. There should be a shampoo given every ten days with soft water and pure soap. When the hair is perfectly dry a good tonic should be rubbed into the scalp, one without any greasy properties, for that would mean a foundation for the next batch of dust to adhere to. After the tonic is on the hair should again dry out entirely, a sun bath being given if possible.

Blond hair has to be washed more frequently than dark hair for the sake of its color, as it soils as easily as chiffon with dust and grit. To its beauty the smoke and cinders of a trip by train are fatal, and a shampoo should be given as soon as possible at the end of the journey. Dark hair, as it does not show the effects of travel stains as easily, stands in far greater danger of injury, and the harm done when the accumulation of grime is not noticed is incalculable.

Too much sun is bad for hair of any color. It not only dries out all the natural oil, but bleaches and coarsens fair hair to an extent of old rope or straw and gives a curious rusty appearance to dark hair.

Salt water has the same effect, besides often rotting the roots of the hair, this last calamity occurring when the hair is dried in the sun on the beach. If the hair when bathing gets wet and is dried before returning to the house it should be as soon as possible be washed out in fresh water. A tonic should be rubbed into the roots, and the drying should be done with a fan and rubbing by hand. The scalp, too, should be thoroughly massaged with the hair lotion and well when dry. This starts a good circulation, which is very necessary for healthy hair.

DAPHNE DEAN.

A FAT REDUCER.
Before starting to starve or drug off your extra layers of fat try the effect of this simple exercise, which is a mighty reducer of "too, too solid flesh."

Standing with knees close together, rise on the tips of the toes and, at the same time, elevate the chest and force down the palms of the hands as if pushing hard on a board. Bend the hands up slightly so the muscular strain comes on the fleshy part of the hand close to the wrist.

Do this exercise whenever you happen to think of it during the day and you will soon notice a decided difference in your flesh, particularly in a prominent abdomen.

USEFUL BITS OF VELVET.
No bought powder puff or chamols skin can be better for puffing powder upon the skin than a bit of velvet. If made good, costs nothing, can be thrown away when soiled even in the least and is satisfactory in every way. A piece of black velvet also makes an excellent hairbrush.

MOVABLE SCHOOLS IN HOME ECONOMICS

A LESSON IN COOKING GIVEN TO HOUSEWIVES.

DURING the past few years the college extension department of the Kansas State Agricultural college has sent out a domestic science lecturer to give demonstrations for the housewives at the farmers' institutes. The demand for this work grew so strong that out of this demand developed the idea of the movable school in cooking and sewing, which is now in operation. The college sends out two people for each school. Each instructor takes with her as an assistant a graduate of the domestic science department. A local committee is appointed generally by the local farmers' institute. This committee provides entertainment for the teachers, a suitable hall at least one good range and a two burner gas or gasoline stove for each member of the class. Besides this the local committee is required to furnish all the necessary things for the school. The fee for the membership fee of \$1.00 is the services of the school. It is necessary to have an enrollment of at least twenty-four, no member

THE MODESTIC WOES OF THE SHORT, STOUT WOMAN

NEW BAG WITH BUTTON WATCH

ADVANCE GUARDS OF FASHION

Lady Duff Gordon's "Mummy" Dress—Hats That Injure the Hair

THERE'S not much sartorial hope for the short, stout woman," moaned a sister so proportioned recently to her dressmaker. "Will there be any chance this fall of modes being more kindly toward her?" continued the same anxious questioner.

To be perfectly fair, the short, stout woman has a good case against the present fashions, for one would really suppose that those who are responsible for the styles now in vogue labored under the hallucination that the majority of women were tall and slender. Take, for example, the frock with the deep hem, the tunic with a wide decorative band at the bottom or the tailored suit with horizontal stripes finishing the lower edge of both coat and skirt. Now, what could be more effective in taking from the height than these two effects? And there are many more that could be added if statistics were our object. But let it go. You remember black twin says that "statistics are only watered stock."

To come back to our subject, the sorrows of the fashionable short, stout woman, it is only fair to say that the effect of the garments instanced have been modified by the narrowness of the skirts, and to the woman who is not broad in proportion to her height they have been harmless, but they have been the despair of short, stout femininity. But let us trust that the day of the deep skirt has passed, and there is every reason to believe that the winter styles will banish it completely. But there will be modish cloth suits having skirts trimmed with bands of fur, and fashions will vary as to the width of this band. Every sensible woman will use the width that is most becoming to her figure.

SALT ON CANDLES.
If the wicks of candles are salted before lighting there will be no sputtering or dripping. Take fine table salt between the fingers and rub well into the wick. You will be surprised at the clear light.

Sensibly Arranged Bookshelves

Who has not been annoyed by the irregularity of the rows of books on the shelves? The small book gets shoved back and sometimes disappears behind its larger neighbor, and Mrs. A. is suspected of never having returned it after having borrowed it months ago.

The whole effect is highly piggedly, simply because bookcases are always made too deep for the books they contain. They are made deep enough for the maximum dictionary, which should never go on a shelf anyway, and the minimum choice little gems and even the average novels have several inches of shelf room to spare.

A bookcase made just wide enough for the books would look cramped and too heavy, so a way should be found to straighten up the lines of books and keep them well to the front, where a more touch of the finger at the top brings the book to the hand. To solve the problem about this method:

At housecleaning time this fall, when all the books are taken down, tack cleats on the shelves just far enough back to give them room in front for books of different sizes. You will be surprised to find how much narrower the books are than you supposed. The cleats are therefore placed irregularly and tacked in lightly so they can be easily changed.

A book goes in until it reaches a cleat, and so all come flush with the edge of the shelf. There is no bare ledge to catch the dust and no books to get pushed out of sight.

RESTORING OLD PICTURES.
Have you a collection of old family daguerotypes that are almost faded out of existence? Before they have gone beyond help take them to a photographer and have them restored.

This work is now so well done that the quaint old pictures will last for years. In making a collection keep the old wooden frames with velvet lining that add to the quaintness.

Daguerotypes are now reproduced by an old tone process and made into framed pictures which look well framed with narrow wooden molding.

A DELICIOUS SAUCE.
Here is a sauce that is delicious with a steamed pudding.

Where this sauce is not used a good hard sauce is the next best choice.

GREEN CORN AU GRATIN IN RAMEKINS.

COOK one slice of onion, says the Boston Cooking School Magazine, and a slice of green pepper, chopped fine in one or two tablespoonsful of butter until softened and yellowed, add two tablespoonsful of flour and a half teaspoonful of salt and cook until frothy, add two cupsful of thin cream and cook and stir until boiling,

then stir in sweet corn, cut from the cobs, to make quite a consistent mixture. One or two beaten eggs may be added if desired. Turn into buttered ramekins and cover with two-thirds of a cup of cracker crumbs mixed with melted butter. Let cook in the oven until the crumbs are browned. Serve as an entree at dinner or luncheon or as the chief dish at supper or luncheon.

KEEP OLD BICYCLE PUMPS.
When going over the new home of a very neat housewife recently a bicycle pump was noticed in the broom closet. The guest who was being taken over the house said to her hostess, "When your small son wants to pump up his tires will he ever think of looking for the necessary tool in this closet?"

"That is not his pump, it is mine," was the reply. "I use it for my car's furniture, and it works as well as a vacuum cleaner. The maid can hold it with her foot, pump with one hand and with the other direct the blast from the tube into any niche or cranny that a duster does not reach, and old Mr. Dust goes flying." She has told many of her friends of this use for the discarded bicycle pump.

MUSINGS OF ELINOR HITE

When the Lamp Is Lit

WE have all of us heard of girls without charm. Maggie Wylie was one. Maggie—oh, yes, I had nearly written charming—heroine. You remember what Maggie said when her brother asked, "Maggie, what is this thing 'charm' exactly?" And Maggie replied: "Oh, it's a kind of bloom on a woman. If you have it you don't need anything else, not even education, and if you don't have it it doesn't matter what else you have. Some women, the few, have charm for all, and most have charm for one, and some have charm for none."

And poor Maggie thought she came under this last category. Yet it was not so, and it is said that she is of Maggie's lovely women the most lovely. Now, there are Maggie Wylies all over the world. We have all met them—sweet, lovable and really charming women who don't know their charm. Maggie didn't. You know the kind of woman I mean. Maggie knew when she etched in Maggie's picture so artistically—the girl who, like Grisel, another of his heroines, was "very good at loving." Now, the world wants more of these women—women who are not necessarily pretty, who will never be lovely, but who nevertheless are "very good at loving."

Maybe some girl is now saying to herself: "Yes, that's me. I'm like Maggie." Or maybe another reader is saying: "Why, that's like So-and-so. She doesn't believe she has any charm." Well, if you're the first of these girls, just take heart. Maggie had more charm than she knew. So have you perhaps. And if you're the one who knows a girl "just like that," then play the part of good Samaritan to that girl and tell her that she's charming. Perhaps she won't believe you at first. Those shy girls seldom do when anything like that is said to them.

Only the other day a girl I knew was absolutely astonished when another woman said to her: "Miss So-and-so, you are pretty. She said what pretty eyes you had."

That word of appreciation, coming secondhand, though it did, was like a tonic to the girl. She went and looked at herself in the glass to see if it could be true, and—then—she—checked—God! she wasn't quite unattractive to her fellow beings after all.

So if you know any girls who are shy and unhappy and sensitive, but who are really charming or pretty or lovable and don't know it, just give yourself the pleasure of making them know it. They will value it all the more from you than from a man. It's always more likely to be sincere from a woman. The same thing applies to work. We have heard of employers who never praise. They don't deserve to get the best work out of their employees.

CATHERINE TALBOT.

HINTS FROM BABYLAND.

When the baby goes out in his perambulator or go-cart great care should be taken that he is lifted gently over the curb-stones and when taken out on country roads smooth ones should be first choice.

The Massive Baby.
It is not always a sign that a baby is healthy if he is very fat and eats enormously. Babies of this type should not be fed to excess and should be kept in the open air as much as possible. As soon as they are old enough they should be encouraged to kick and stretch and may indulge in walking exercises if their legs are strong enough.

Do Not Walk the Floor.
Don't send your year old son or daughter to the "land of Nod" by pacing the floor with him or her. The hour may come when you will be physically incapable of so doing, and trouble may follow.

The Importance of Tidiness.
Children should be encouraged to take care of their things, and even quite small girls can be taught the value of this. Most mothers are guilty of allowing their children to depend on them for nearly everything. The little girl who is taught to sew the buttons on her own clothes, to repair ripping seams, to trim the ends of her hair ribbons, not only develops the habit of self reliance, but unconsciously becomes neat and particular with her belongings.

Comfort in Bloomers.
There are many mothers who find it very hard to allow their little girls to give up wearing the dainty little white underclothes for dark bloomers, but for ordinary wear they are a great saving in the washing and afford a child a thoroughly comfortable garment. Children should never be conscious of their clothes, and there are only two things that will make them so. One is discomfort and the other an undue amount of elaboration, which attracts attention.

Bread and Butter For Babies.
There is no place in which bread and butter can be so beneficial or palatable as in the nursery. The worst thing you can give a young baby under a year old is bread.

But later on bread becomes useful. It should never be given new to a child at any age, but stale bread or toast is excellent.

TOILET TRIFLE FOR TRAVELERS

TOILET CASE CLOSED.

WHAT could be nicer as a gift for the girl who travels than a case in which she may safely bestow her "best" lingerie blouses? It does away with the necessity of paper for packing and keeps the supply of waists together, preventing as well the edges from becoming soiled. The original case was made of dotted muslin, but lawn or silk may be used. Mustin, however, is the best material, as it always looks fresh and dainty and launders well.

To make the case get a yard and a half of muslin. This quantity will

make a case large enough to hold a half dozen blouses. Mark the center of the length used, hem the ends and trim with lace, then fold the ends over equally with the hem outside as shown to form pockets as receptacles for the blouses and join at the selvage, which runs the length of the case.

Finish the edges between the pockets, turn inside out evenly and sew a ribbon in the center of each and to fold over and tie with, as in the closed view illustrated, when the case is complete, though you may ornament it in other ways if preferred. The owner's monogram is very attractive when worked prettily in wash cotton or silk.

KEEP OLD BICYCLE PUMPS.

When going over the new home of a very neat housewife recently a bicycle pump was noticed in the broom closet. The guest who was being taken over the house said to her hostess, "When your small son wants to pump up his tires will he ever think of looking for the necessary tool in this closet?"

"That is not his pump, it is mine," was the reply. "I use it for my car's furniture, and it works as well as a vacuum cleaner. The maid can hold it with her foot, pump with one hand and with the other direct the blast from the tube into any niche or cranny that a duster does not reach, and old Mr. Dust goes flying." She has told many of her friends of this use for the discarded bicycle pump.

THE PICKETS of PEACE

A Labor Day Poem By ALOYSIUS COLL

Copyright, 1910, by American Press Association

The olive waves her symbol from the sea to bordering sea,
The dove has dropt a plume in every hamlet of the land,
The musket leans unloaded in the fort and armory,
And silent in the parapet the muzzled cannon stand.
But the town is like a heaven with her starry fields of blue;
The strains of martial music thrill the thousands through and through,
Till not a throat is silent, and not a heart is still,
For the double-stepping feet
Of the legions in the street—
The caravan of toilers from the shop and mart and mill!

The hulks of belted armor plunge across the warless wave;
The stallion of the charges stands unsaddled in the stall;
The veteran's hair is silver, and the turf is on the grave
Of his brother in the bivouac who went out to fight and fall.
But the shout of marching armies has arisen loud and long;
Bright are the eyes of daughters and the pride of mothers strong,
With bell and bugle swelling the clamor and the hum
For the long and steady lines
From the furnace and the mines
That double step the chorus of the trumpet and the drum.

The buttercup and daisy bloom on Cemetery Ridge;
The wheat and purple clover choke the mouth of Devil's Den;
The laurel drops her berries in the dust of Wilson Bridge
In rosaries of requiem for the souls of slaughtered men.
But the soldier of the anvil and the pulley cog and wheel,
His sword a flaming bubble from a pot of puddled steel,
Is singing in the cities, from Tampa up to Nome,
The stirring battlecry
Of the men that do and die
To save the glory of the land, the altar and the home.

The lark has built her nest upon the grass of Bunker Hill,
Whose canister is buried with the hatred of the foe;
The wilderness surrenders to the wooing whippoorwill,
And all her deadly shot and shell were relics long ago.
But the pickets of the throttle and the sentries of the mine
Are flanked on every crowded curb and falling into line—
The legions of the drill and forge, the soldiers of the soil,
That guard the smiling land
With heart and soul and hand,
The God Almighty armament of capital and toil!

STATE OR NATIONAL CONSERVATION

The Question at the Coming Big St. Paul Congress

It is an irrepressible conflict between opposing and enduring forces," said William H. Seward in 1854, referring to the struggle between slavery and free labor. Were he alive today he might apply the phrase with justice to the contest between the proponents of the two theories of conservation to be maintained at the coming national conservation congress which will begin in St. Paul Sept. 5.

It is a question of enormous magnitude and far-reaching importance that will be discussed during the deliberations of the congress. In it are involved phases of the state rights dispute which brought about the nation's time and almost rent the nation asunder in 1861-5. Political pessimists assert that the dispute is endless; that we shall have it as a perpetual thorn in our sides so long as our confederation of states, with its delimitations of the respective rights and duties of the state and federal governments, shall last.

Simply put, the present question is this: Shall the states control the conservation of the natural resources within their boundaries, when such resources are to be drawn from land owned by the government, or do the interests of the nation, taken as a whole, require the conservation of land and water and their products by the central government? It has been asserted that the dispute may be defined as the clash of section against section, the west against the east. But if this be so—and it is open to grave doubt—the lines are not drawn with any approach to closeness.

The matter is one of those on which men may differ honestly without laying themselves open to the charge of roguery.

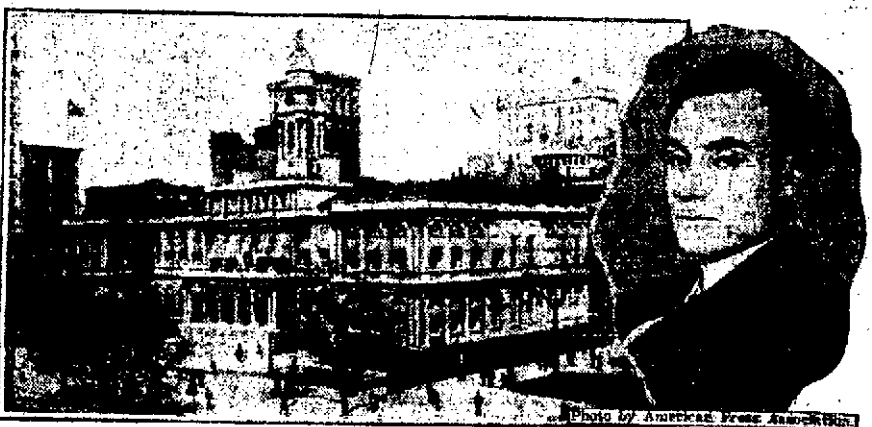

The upholders of the state rights idea assert their belief that their opponents' view of conservation means locking up the nation's resources for an indefinite period of time, preventing them so well that no use can be made of them until the present generation at least has passed off the stage. The states are able to govern their own property, they say, and may be trusted to see that the wolves of selfish interest do not raven among the sheep of public property. The "federalists" on the other hand, declare that the stand of the "state rights" is that of the man who said he would do nothing for posterity since posterity had never done anything for him. The cornerstone of the "federalists' faith is the belief that conservation without the strong protecting arm of the federal government is a mockery and that turning over the nation's resources to the care of the individual states means intrusting them to the land shark and the despoiler.

It is a brilliant array of speakers that will address the congress. On the opening day President Taft will deliver the great speech. A day later his predecessor, Mr. Roosevelt, will reiterate the views on conservation already made familiar to the public in messages, speeches and articles. Colonel Roosevelt will be followed by Governor Eberhart of Minnesota, and the latter by Gifford Pinchot, the deposed chief forester. Among the other speakers will be Mr. Pinchot's successor, Henry S. Graves; former Secretary of the Interior James H. Garfield, James J. Hill, Senators Doolittle, Nelson, Dixon of Montana and Beveridge, Governors Stubbs of Kansas and Hadley of Missouri, Secretary of Agriculture Wilson, Thomas L. Lewis, president of the United Mine Workers; Judge Ben B. Lindsey of Denver, Herbert Knox Smith of the department of commerce and labor, Director John Barrett of the bureau of American republics and Francis J. Haney of San Francisco.

It was announced recently that the Ballinger-Pinchot investigating committee will meet in St. Paul during the sessions of the congress to announce the result of the probe into the charges against the secretary of the interior. As in these charges is involved in some degree the question of conservation, it is expected that the announcement of the findings of the committee will arouse as much interest as the deliberations of the congress.

ARNOLD MADAME.

MAN OF 31 NOW NEW YORK'S HEAD

CITY HALL, NEW YORK.

JOHN PURROY MITCHELL.

At the head of the government of the great city of New York is a young man, a very young man for an exalted position. He is John Purroy Mitchell, elevated to the mayor's chair for the time being by the pistol shot which laid low Mayor William J. Gaynor. Mitchell of the city government and "Torquemada" the latter from the name of the celebrated Spanish inquisitor.

His thoroughness is the quality that first brought him into public notice about three years ago. At that time he occupied a minor position in the office of the corporation counsel of the city, William B. Ellison. It was the duty of the latter to see that the city was represented before the commission of accounts when charges were brought against John F. Ahern, president of the borough of Manhattan. Mr. Ellison delegated the task to Mr. Mitchell, and then Mr. Ahern, probably not liking the quiet setting of the month's muscles with which Mr. Mitchell went about the job, raised legal objections to his appointment. Whereupon Mayor McCallan showed most admirable judgment in the choice of an investigator and appointed Mr. Mitchell, commissioner of accounts to conduct the investigation himself. Later, as a result of Mr. Mitchell's handling of the probe, the connection of Mr. Ahern with the city government was severed. The same fate befell President Berne-

fore his nomination on the fusion ticket last fall for the important position of president of the board of aldermen. His successful searching into numerous cases of official misconduct in office and graft he had won for himself the titles of "the watchdog of the city government" and "Torquemada."

His thoroughness is the quality that first brought him into public notice about three years ago. At that time he occupied a minor position in the office of the corporation counsel of the city, William B. Ellison. It was the duty of the latter to see that the city was represented before the commission of accounts when charges were brought against John F. Ahern, president of the borough of Manhattan. Mr. Ellison delegated the task to Mr. Mitchell, and then Mr. Ahern, probably not liking the quiet setting of the month's muscles with which Mr. Mitchell went about the job, raised legal objections to his appointment. Whereupon Mayor McCallan showed most admirable judgment in the choice of an investigator and appointed Mr. Mitchell, commissioner of accounts to conduct the investigation himself. Later, as a result of Mr. Mitchell's handling of the probe, the connection of Mr. Ahern with the city government was severed. The same fate befell President Berne-

of the borough of Queens, likewise accused of misconduct in office. From investigating high city officials and bringing about their removal young Mr. Mitchell—he was only twenty-eight, then—turned his pitiless searchlight on other parts of the city. He revealed scandalous conditions in the fire department and elsewhere and helped materially in bringing about their abatement. It took a lot of hard work on his part, of course, but he has never been known to shy at hard work. And he does not finish either when some one of the numerous men whom he has ousted or whom he has helped to oust, and their friends speak in determined tones of "getting" him. He comes of the Scotch-Irish ancestry that has always treated as an insult the suggestion that it might be afraid of anything.

Mr. Mitchell's uncle, the late Henry D. Purroy, was a great power in the Democratic politics of New York twenty years ago. Henry D. Purroy is remembered in the city as having been one of the bitterest and most determined opponents Tammany Hall ever had within the Democratic party.

In person Mr. Mitchell is tall, spare and ascetic looking. He is an indefatigable student of men and affairs. He was married last year and resides in a flat on the west side of Manhattan.

BEST SHORT STORIES FROM ALL SOURCES

The COWARD BY RALPH STOCK

THE two men, both admirable specimens of their kind, stood facing each other in the dust of the horse corral.

Pete, the half breed, the best as well as the cruellest rider north of the line, stood with one foot slightly advanced, the Angora fur on his chaparral quivering with the suppressed rage in his body. His beady eyes flashed with a black hatred, which his thin, hard lips twitched in their effort to express.

"You liar; you snake!" he hissed.

The target of all his wrath, a tall, tanned youth, whose chief outward characteristics were a slightly protruding chin, a high, intelligent forehead and a pair of humorous, though languid, gray eyes, leaned carelessly against the snubbing post in the middle of the corral, his hands in his pockets, calmly regarding the melodramatic exhibition of wrath as though it were an indifferent vaudeville turn.

One almost expected him to applaud languidly, but instead he tearfully took a cigarette from his case, lighted it and leaned back again against the post in search of a comfortable angle for the smali of his back.

"I really wouldn't get so excited, Pete," he said lazily. "It's waste of good energy, which on a day like this is at a premium. You dislike me heartily for your own reasons, which I've no doubt are good and sufficient from your point of view. But you fail to interest me in the least. Let's at least understand each other. There's no need for us to clash. We can each go our own way. These scenes are disgusting; worse, they're childish."

The half breed took a step nearer, his anger now firmly in check, but none the less potent.

"You pretend you do care for me," he said very quietly, tapping his broad chest with a gauntleted hand. "You think I am dirt." He kicked a little cone of dust with a neat riding boot. "Pah! You scared; deep down you scared of Pete Bazzadore. You would not fight, you coward!"

With the last word the man's voice rose to a harsh discord. He waited, his hands clinched at his sides, a glittering line of white just showing between his lips.

The youth against the snubbing post drew himself slowly upright, threw away his cigarette and strolled toward the stable.

A smile that was not good to look at twitched the corners of the half breed's hard mouth as he watched the retreating figure as far as the stable door. Then, with a quick indrawing of the breath, he turned, caught up his horse's trailing bridle lines and, mounting with catlike ease, dug his spurs into the beast's ribs and was lost in a cloud of dust.

As the youth put his hand to the latch of the stable door a brown little face, surmounted by a tangled mass of dark hair, was quickly withdrawn from the neighborhood of a crack in the wall. When the door opened its owner was closely examining the left foreleg of a saddle pony in one of the far stalls.

"Hello, Bess!" exclaimed the youth in languid surprise. "Didn't know you were in here."

The girl continued her examination of the horse's leg.

"What's wrong? Splint?"

The girl's dark head bent a trifle lower, but no response was audible.

The youth went to the horse's head, held the halter strap in one hand and ran the other slowly down the leg from the knee to fetlock. The girl stepped back and evinced an obviously assumed interest in a larlat hanging on the stable wall.

"Gee! When did he throw that? Nothing short of a nister, I'm afraid," continued the youth, serenely indifferent to the girl's silence.

The girl turned, with a quick flash in her dark eyes, and dropped two brown little hands to her sides with a quiet air of exasperation.

"Good heavens, Bob, are you too lazy even to see a snub?" she demanded, almost fiercely.

The youth looked up with an air of pained surprise—real or assumed it was hard to determine.

"What the eye doesn't see," he began, but was cut short.

"Bob, you're simply exasperating. Are you really alive? Do you see, feel, hear like other people or have you got every emotion behind a cap that is only turned on when you choose—which is never? Couldn't you see I was angry?"

The youth rose slowly to his feet and smiled good naturedly.

"Of course I did," he admitted, seating himself on the manger pole.

"Then why on earth didn't you act like an ordinary human being and ask me what was the matter?"

"Because I knew you wanted me to."

"You're at least candid. Do you always leave undone what people want you to do?"

The youth studied the center ridge log of the stable for a moment, then remarked slowly: "It all depends on the people, but in this case out of ten a fellow is safe in following that line with—er—with, girls. Take the present instance. If I had risen to your snub, pleaded for an explanation and all that sort of thing you would at once have mounted your high horse and refused to supply one, whereas now we're having an amiable chat about it. Don't you think my method preferable?"

For a second a smile leaped to the girl's lips, but it went like a stray sunbeam on a cloudy day. With a quiet though genuine air of gravity she took a seat on a neighboring manger pole and with slightly compressed lips looked directly at the youth.

"Bob, I'm not altogether sure that you're not rude—yes, you can be, you know, even to me. You see, I was serious, and I am angry."

"Why?" the youth demanded bluntly.

"That's better," said the girl. "It makes it much easier when you're human, and I'm afraid you won't like what I'm going to say a bit."

"Fire away!" the youth encouraged.

The girl brushed a stray wisp of hair from about her eyes, and her gaze fell to the sandy floor, but she continued bravely:

"I'm sorry to say it, Bob," she began haltingly, then suddenly lifted her head and looked the youth full in the eyes; "but, according to the standards of this country, Pete was right."

"You heard?"

"Yes, I heard."

"And to what was he right?"

"Oh, I don't mean in anything to do with the cause of the quarrel—I don't know anything about that—but when he said—once more the girl's voice faltered and trailed away rather weakly as she ended—"when he said you were a coward."

For some time the youth sat lost in thought. He took a wisp of hay from the manger and twisted it between his fingers until the veins swelled into knots.

"I wish you wouldn't look so serious when you're joking, Bess," he said quietly. "It gives a fellow a bit of a shock sometimes."

"It wasn't joking," returned the girl doggedly.

The youth's eyebrows contracted in a puzzled frown.

"You can't mean you really think—I'm—a—coward?"

The words came in spasmodic jerks of incredulity.

"According to the standards of this country, I'm afraid I do."

The youth jumped to his feet.

"Hang the standards of this country! What are they worth? It's your standards that matter."

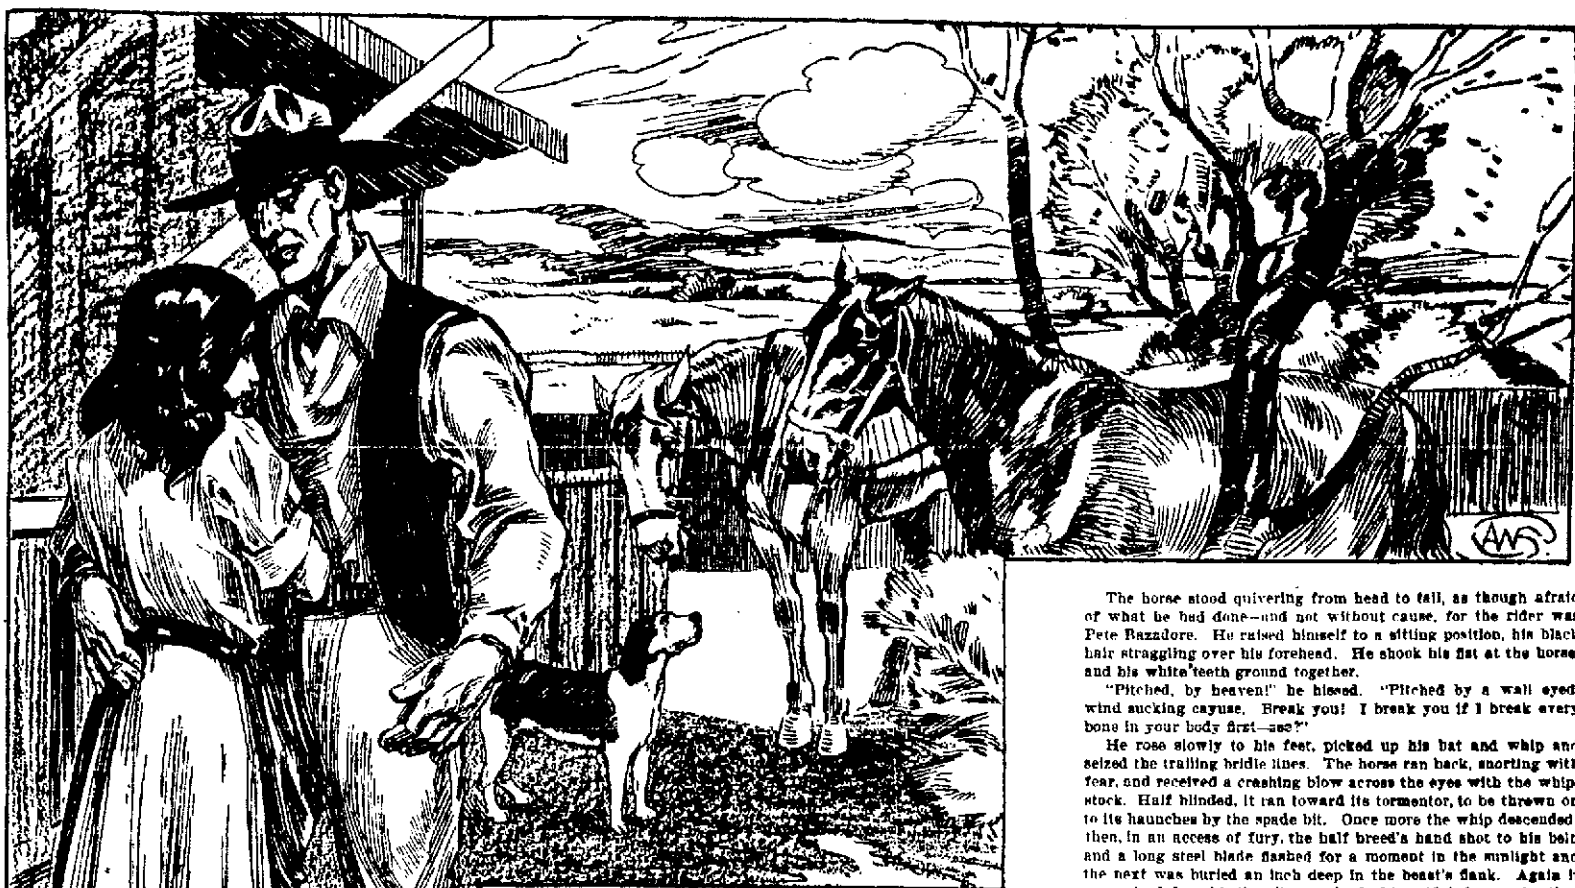

The girl turned her face away and kicked the hay at her feet into little billows.

"I think," she said, "if I had been a man and another man had called me a coward I should do my best to show him I wasn't afraid of him, at any rate. It's our way, you know, the only way we understand, and, oh, Bob, it's not so much that, but do wake up. Out there in the corral I was longing to see you get angry, sure as just once, but there you leaned against that snubbing post, just as you lean against an imaginary snubbing post all the time. You even lighted a cigarette. Oh, it must have been something! I wonder Pete didn't strike you. Your arguments weren't all so unimpassioned, no matter how common sense!"

"I'm disappointed that you refused to fight."

"You speak very slowly and distinctly."

"I'm conscious of that. I see now that you really do think

"Bob," she said, "never, never get angry with me, will you?"

Buck offered no explanation of these problems beyond flopping his ungainly tail and indulging in an ample yawn.

"You're just like him, Buck," the girl went on. "You yawn; you stretch. I don't believe you've got a real emotion in your whole dear old woolly body."

Buck received two huge with studied indifference.

"And yet I love you, Buck. Why is it? You're restless—I think that must be it; you're always the same, but he—he's too restless. I do believe if a dog bit you you'd bite back. You are alive, Buck."

Buck demonstrated the truth of this assertion by suddenly springing from the girl's arms, taking up an aggressive attitude on the bank of the creek and sniffing the air suspiciously.

Far away up the trail came a whiffing, billowing cloud of dust, which slowly resolved itself into a horse and rider. Never at any time was the picture complete. Sometimes the horse's white flocked flanks would glisten in the sun, the next moment to be hidden behind the curtain of dust, whirling sand; then the beast's head and neck would rise above the dust like some monster emerging from the sea, then once more horse and rider would be completely hidden.

The sudden light of excitement leaped into the girl's eyes as she looked out through the willows.

"He's pitching," she murmured. "Tip, he's pitching."

A sudden mad gallop brought dust cloud and rider not twenty yards from the willow clump. The girl had risen to her knees and now knelt motionless, her eyes full of pity, her lips slightly parted in horror.

A cruel spade bit hung from the horse's jaws, literally running blood. The beast's ribs were covered with gashes that dripped red in unison with the rider's huge spurs, and its quivering flanks, decked with white foam, bore long lines of ruffled hair where the knotted riding whip had fallen.

The horse was mad with fear. Its terror stricken eyes stared out wildly, seeking escape in all directions, and every now and then, hunching its back, it leaped into the air, descending on four legs as stiff and unrelenting as granite pillars.

Again and again the whip swung high above the rider's head, its descent accompanied by a sickening thud. Deeper and deeper the rowels of the Mexican spurs sank into the torn flesh. The rider, with grim set jaw and eyes of steel, sat as though glued to the saddle.

Once more the horse's head went down, down between his forelegs. With a final supreme effort he left the ground, turned in the air and landed with a twisting, jarring thud that seemed to shake the very ground.

For the fraction of a second the rider kept his seat, shaken to the core of his iron frame; then, as the horse again lowered his head and hunched his back, the whip ceased whirling, the spurs ceased jabbing and the rider landed prone in the short, crisp buffalo grass.

IN THE FREEBOOTER'S CAMP

By
JOHN PENDLETON KENNEDY

IT was near midnight when Black Jack, having prepared some bags of pitch pine and selected three or four of the best marksmen, left the bivouac to look for deer. Habershaw himself, though lazy and inordinately impressed with a sense of his own dignity, and now confused with liquor, could not resist the attraction of this sport. He accordingly, not long after the others had departed, took a rifle and, attended by his bulldog, which he never parted from on any occasion, slowly followed in the direction chosen by the hunters.

Those in advance had scarcely walked along the margin of the river a mile before they lighted their fagots and began to beat the neighboring thickets, and their search was not protracted many minutes when the light of their torches was thrown full upon the eyes of a buck. A shot from one of the marksmen told with unerring precision in the forehead of the animal.

The report and the light brought the corpulent captain into the neighborhood. He had almost walked himself out of breath, and, as he did not very well preserve his perpendicularity or a straight line of march, he had several times been tripped up by the roots of trees or by rocks and briars in his path. Exhausted at length and puzzled by the stupefaction of his own brain as well as by the surrounding darkness, he sat down at the foot of a tree, determined to wait the return of the hunting party. His faithful and congenial Beauty, not less purry and short winded than himself and not more savage or surly in disposition, now crouched upon his haunches immediately between his master's legs, and here this pair of beastly friends remained, silent and mutually soothed by their own companionship. During this interval the person who bore the fire, followed by one of the marksmen, crept slowly onward to the vicinity of the spot where the captain had seated himself. The lapse of time had proved too much for Habershaw's vigilance, and he had at length, with his head resting against the trunk of the tree, fallen into a drunken slumber. The short crack of a rifle at hand and the yell of his dog awakened him. He started upon his feet with sudden surprise and, stepping one pace forward, stumbled and fell over the dead body of his favorite Beauty, who lay beneath him weltering in blood. The shot was followed by a rush of the hunter up to the spot. It was Gideon Blake.

"Buck or doe, it is my shot!" cried Gideon as he halted immediately beside Habershaw.

"May all the devils blast you, Gideon Blake!" thundered out the incensed captain. "You have sought my life, you murdering wolf, and your bullet has killed Beauty!"

"I shot at the eyes of what I thought a deer," returned Blake. "You were a fool, Hugh Habershaw, to bring a dog into such a place."

"My poor dog! My brave dog! Beauty was worth ten thousand such villains as you. And to have him killed! May the devil feast upon your soul this night, Gideon Blake! Go and account for your wickedness! Take that, snake, tiger, black bear, and Whig and rebel, and be thankful that you didn't come to your end by the help of bemp!" And in this gust of passion he struck his knife into the bosom of the trooper, who groaned, staggered and fell.

At this moment the person bearing the fire, hearing the groan of his comrade, rushed up to the spot and seized Habershaw's arm just as the monster was raising it over the fallen man to repeat the blow.

"D—n him! See what he has done!" exclaimed the captain as he lifted up the dead body of the dog so as to show in the light the wound inflicted by the ball between the eyes. "This poor, faithful dumb beast was worth a hundred such hell hounds as he!"

"I am murdered," said the wounded man. "I am murdered in cold blood."

The noise at this place brought together the rest of the hunters, who were now returning with the buck thrown across the horse that had been led by one of the party. Blake's wound was examined by them and some linen applied to staunch the blood. The man had fainted, but it was not ascertained whether the stab was mortal. Habershaw stood sullenly looking on during the examination, and, finding that life had not instantly died, he coolly wiped his knife and restored it to his girdle.

"The fellow has no idea of dying," he said, with a visible concern. "And has got no more than he deserves. He will live to be hung yet. Take him to quarters."

"Make a hurdle for him," said one of the bystanders, and accordingly two men cut a few branches from the neighboring wood and, twisting them together, soon constructed a litter upon which they were able to bear the body of the wounded hunter to the rendezvous. The others, scarcely stirring a word as they approached, followed slowly with the buck and in half an

The horse stood quivering from head to tail, as though afraid of what he had done—and not without cause, for the rider was Pete Bazzadore. He raised himself to a sitting position, his black hair straggling over his forehead. He shook his fist at the horse, and his white teeth ground together.

"Pitched, by heaven!" he hissed. "Pitched by a wall eyed, wind sucking cayuse. Break you! I break you if I break every bone in your body first—see!"

He rose slowly to his feet, picked up his bat and whip and seized the trailing bridle lines. The horse ran back, snorting with fear, and received a crashing blow across the eyes with the whipstock. Half blinded, it ran toward its tormentor, to be thrown on to its haunches by the spade bit. Once more the whip descended; then, in an access of fury, the half breed's hand shot to his belt, and a long steel blade flashed for a moment in the sunlight and the next was buried an inch deep in the beast's flank. Again it was raised, but this time it was checked in midair by a voice that sounded strangely out of place at that moment, so calm, almost indifferent, was its tone.

"I say," it said, "just stop that."

The half breed turned with a slight froth on his lips, his face distorted with passion that was slowly tinged with surprise. The youth dismounted and walked slowly up to the horse as it stood trembling and sweating.

"Is this your horse?" he demanded.

The half breed's lips parted to frame a word, but it was lost in panting breath.

"Then you're a blackguard!" roared the angry youth, with a sudden concentrated fury that sent the blood rushing to his temples and seemed to add six inches to his height.

Once more the bright glint of steel flashed in the air, but the knife fell and stood quivering in the sod a yard from its owner's prostrate form.

"Get up!" roared the youth, stamping a heavy riding boot to impatient fury. "Get up!"

The half breed reached for the knife, made a catlike spring, and the youth's forearm received the six inch blade. But once again his left fist shot out from the shoulder, and the half breed reeled with his hands to his face, staggered three steps backward and collapsed in a limp, impotent heap.

But the youth had not finished. His eyes searched the grass and at last lighted on what they sought. The whip lay at the horse's feet. He picked it up and, squatting with one knee in the grass, dragged the half breed's body across the other and brought the whip down with all his force again and again, slowly, almost methodically, eight—nine—ten times.

When it was done he rose to his feet, rolled up his blood drenched sleeve and with teeth and fingers knotted a handkerchief around his forearm. Then he felt in his pocket, drew out a bundle of bills, counted out \$50 and pushed the money into the open pocket of the half breed's chaparral.

Just as methodically he then stripped the half breed's horse and, substituting his own saddle and bridle, mounted.

For a moment the horse looked this way and that, as though expecting the whip. Then it advanced and stopped short, waiting for the spur. Receiving neither, it fell into a quiet, ambling walk, head down, utterly exhausted, followed at a few yards by its companion.

The girl seemed to find difficulty in saying something she obviously had to say. Not far away a wall eyed cayuse grazed contentedly, cleverly dragging his bridle reins so as not to interfere with his feet. At last the girl spoke.

"You told me to let you know when—when—"

The youth looked down at her half hidden face with mingled wonderment and understanding.

"You don't mean to say you've changed your mind already, that you don't?"

The girl nodded without speaking.

"Bee," he said huskily—"Bee!"

A few seconds later she drew breath to speak.

"But, Bob," she said, "never, never get angry with me, will you?"

"You?"

"You?"

"You?"

"You?"

"You?"

"You?"

"You?"

"You?"

"You?"

"You?"

"You?"

"You?"

"You?"

"You?"

"You?"

"You?"

"You?"

"You?"

"You?"

"You?"

"You?"

"You?"

"You?"

"You?"

"You?"

"You?"

"You?"

"You?"

"You?"

"You?"

"You?"

"You?"

"You?"

"You?"

"You?"

"You?"

"You?"

SIDELIGHTS ON THE WORLD'S NEWS

Enter the Aeroine—Heroine of the Air

By CHARLES N. LURIE.

S AID I to my friend the woman hater: "Well, why shouldn't women fly if they wish to do so?" "No reason in the world. They go up in the air often enough."

So they are going up in the air, as the pictures show, but not in the sense in which the misogynist used the word. Aviation for women has reached the point where the Parisian costumers are designing special costumes for the sport or pastime or vocation or avocation. That means that it is fast becoming an "institution." One of the lady aviators is shown in the picture garbed for a flight.

What Shall We Call the Lady Flier?

"Lady aviators" brings up another point. What shall we call the women who are ascending in aeroplanes and balloons? Shall we refer to them as aviatrixes (plural of aviatrix, of which the masculine is aviator), or shall we adopt the suggestion of an English magazine and refer to the fair fliers as "aerolines"? The latter suggestion has merit, but the word has one fatal defect—it is difficult of pronunciation. From some months it will emerge with no close resemblance to "aerolines" as to be mistaken for that word. Perhaps it is well to suggest a relationship between "heroine" and "aerolines," since the latter is undoubtedly worthy of enrollment in the list of the former. At this stage of the flying game any woman who accomplishes a flight is surely a heroine.

Up to the date of writing there had not been many women aviators. Italy had the Duchess of Aosta, cousin by marriage of King Victor Emmanuel. France, in some respects the leader in aviation and in many respects the world's mentor in "aerolines," had only three prominent lady fliers—Baroness de la Roche, incapacitated for an indefinite length of time by very serious

injuries due to a fall; Mme. Franck, also injured just after she had announced her intention of making a flight across the English channel; and Mme. Paulhan, wife of the famous Louis. There have been a few others, but their exploits have attracted little attention. England has two or three women fliers in heavier than air machines. Germany has produced no women fliers of note—none, that is, in aeroplanes. The Zeppelin, Parseval and Gross dirigible balloons have had female passengers in some of their famous flights. In America we have had Miss Katherine Wright, Mrs. Hart O. Berg, Mrs. Corliss Field Bishop, Mrs. Clifford B. Harmon, Mrs. William K. Vanderbilt, Jr., and a few others as passengers with the "man birds" when they made flights above the earth. Mrs. Bishop was the first woman to fly in America. But an American woman so far as known has been daring enough to go aloft as an aviator. That will come in time, no doubt, and in the meanwhile we may rest content with the fact that we have the only genuine, bona fide woman aviatorship inventor on earth. She is worth a separate paragraph.

Only Woman Aviatorship Inventor.

The name of the lady is Miss E. Lillian Todd, and her postoffice address is New York. She is called "probably the first woman in the world to design and build an aeroplane" all by herself. The Todd machine was a collapsible or folding aeroplane, and the fact of its existence was first made public two years ago. Since that time Miss Todd has kept busy designing and making improvements to her aeroplanes. She is a member of the Aero Club of America and one of the founders of the Junior Aero club, which aims at teaching the young American how to fly. Miss Todd has the added distinction of being the builder of her flying machine as well as its inventor. Recently she had the good fortune to attract the notice of Mrs. Russell Sage, and it was announced

that there was a fair chance of some of old Mrs. Sage's carefully hoarded money being burnt up in gasoline and oil to run the Todd machine.

Commenting on the possibility of the woman flier becoming a common sight, a leading English periodical said recently:

"It may almost be said that the flying man has become a commonplace of the sky of the continent, even if he is still a rare bird in this country. The flying woman is a novelty abroad and altogether a novelty here and as such and because of her own attractions is arousing much curiosity. It has been said time and again that women are more apt to be daring than men, inasmuch as they do not always realize the extent of the risks they take. Such an argument, however, cannot possibly be advanced in connection with some famous aviatrixes. (Notice the collocation with which the Englishman assumes that that is the proper word to use.) Considerable experience in the art they are favoring and considerable knowledge of the feats of flying men—and of the fate of

some of them—have taught them that! followers of the newest of new sports take lives in their hands every time they leave the surface of the earth in company with man-made wings. Despite this, they persevere, which says much for their spirit and their courage. It should perhaps be said that, but one of them, the Baroness de la Roche, is in the habit of making flights by herself. The others have made their ascents in company with men, who have acted as pilots of the machine. This nevertheless does not lessen the interest in them, for whether they have been at the wheel or not, the mere fact that they have flown is enough to place them among the 'aerolines' of aviation."

Must Be a Heroine as Well as Aeroline.

In one respect, above all others, the "aeroline" must be a heroine when she goes aviating. Even to a greater extent than the woman automobilist she must renounce all her pretensions to comeliness. Aviation is not conducive to the preservation of one's good looks, and the woman aviator, dressed for

the occasion, is as much a "flier" as her machine or her flight in the air. Her garments get little chance in the aeroplanes, set as she is in the midst of spraying oil and the fumes of gasoline. The most favored material for women aviators' garments is leather, out in as few pieces as possible and with very few seams. In the air there is no dust—that betters the case of the automobilist—but there is more than a sufficiency of oil and gasoline fumes to make up for it. "Grimey" is the word that must be applied to the woman flier descending from the clouds. But there is this supreme consolation—it is worth it, according to the testimony of all of the women who have tried the novel experience.

"I never had a more delightful experience," said Mrs. William K. Vanderbilt, Jr., recently upon her return from an aerial journey with Clifford B. Harmon, "and I could help it. It's a most wonderful feeling—no exertion, no care, I never thought of falling."

It is the almost unanimous opinion of the leading men aviators of the

world that, for the present at least, women should not think of flying in machines by themselves. Less objection is raised, of course, against having women as passengers in the aeroplanes, although some demur is made even against this slight concession to the demand of the fair sex for novelty and new sensations. According to the "man birds," women are temperamentally unfitted to cope with the problems which confront the aviator. One of the most outspoken of the objectors is Charles K. Hamilton, the famous hero of the New York to Philadelphia and return flight. Among the others who have expressed themselves as opposed to the flying of women are Captain Thomas S. Baldwin, probably the oldest and most experienced of American aeroplans, who says:

"A woman may be able to run a bicycle or a motorboat or an automobile. Compared with an aeroplane either is as easy to manage as a baby carriage. It takes out and out nerve to run an aeroplane. The operator must cast all fear aside and have no thought for

the consequences. Had a man been in the machine instead of its occupant being Mme. de la Roche I don't believe there would have been any accident. But she lost her head and thus lost control of the machine also."

Dangers to Fliers and Spectators.

It will be recalled that the Baroness was very severely injured at Rheims, her arms and legs being fractured and her body sustaining other severe injuries. She was flying along smoothly when two other aeroplanes passed over her. The rush of air confused her so that she cut off her ignition and lost control of her machine. Instead of gliding safely to the earth in normal fashion her biplane turned over and dropped to the ground with its occupant.

The danger to the spectator from the falling of an aeroplane also enters the minds of the experts. Without any intention of jesting with so serious a subject it may be asserted that it will hurt just as much to have a woman aviator drop on one, almost literally from the clouds, as it will to have a man do so.

SENATOR DICK, SOLDIER AND STATESMAN

WHEN the government of the United States wants information on military matters to whom does it turn? To the same man to whom the state of Ohio looks for advice and guidance in regard to its citizen soldiers. And that man is Major General Charles William Frederick Dick. Don't recognize the name? Well, you are not to be blamed. When the name of the senator from Ohio is printed in its usual form the two middle sections are cut out and the name pro-

duced for senatorial military honors is Du Pont of Delaware, whose record in the civil war requires nearly a page of the Congressional Directory for its proper setting forth. But Du Pont never got as high as the wearing of a major general's stars, so Dick would outrank him if it ever became necessary for the president to call out the senate in defense of the country. There are a few of the older senators who saw service in the civil war on one side or the other, but, so far as patient research can disclose, Senator

As Senator Dick's colleague in the upper national house, Senator Burton, knows everything there is to be known or guessed about him and his habits, so Senator Dick has a most comprehensive knowledge of things military. Full evidence of his grasp of the subject was presented a few years ago in the Dick militia or national guard bill, now known as the Dick law. It formulated the present system under which the relations of the federal government with the national guard of the various states are

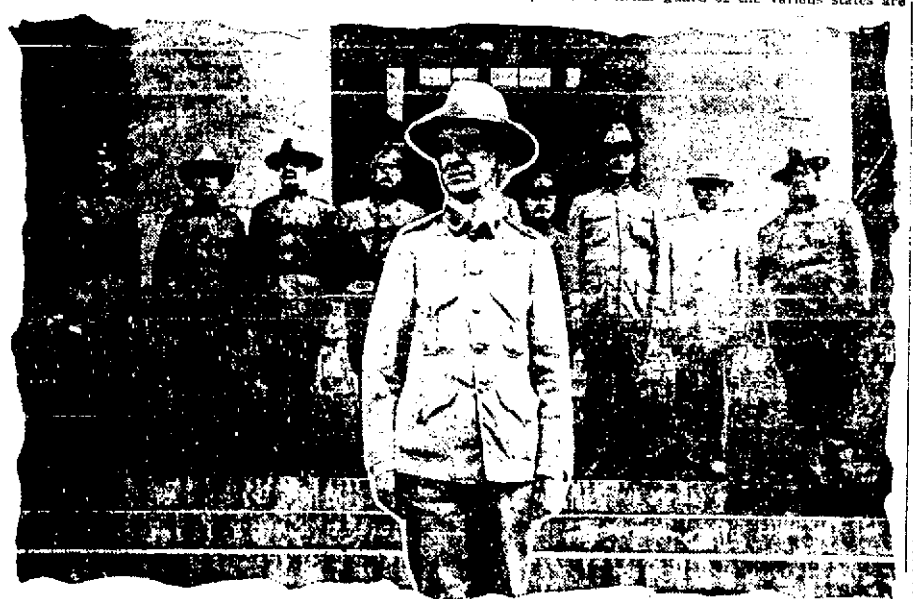

for active service and the army men who remember the almost equally discouraging conditions in 1898 give their unqualified approval and unhesitating praise to the provisions of the Dick law, introduced and pushed with vigor to a successful conclusion by the legislator who served against Spain as lieutenant colonel of the Eighth Ohio volunteers. Subsequently Lieutenant Colonel Dick became colonel of the regiment.

Major General-Senator Dick possesses one indispensable characteristic of the good soldier and the successful politician—that is, he never knows when he is liked. Not that he has been liked so many times since he took up the career of a leader of Ohio's Republican destinies, but, of course, like most of the prominent men of the exceedingly lively political commonwealth, he has known what it means to have a flicker following turn one down. But he has always "come back," and today there is no keener, shrewder, harder political fighter within the boundaries of the state. In one detail alone Dick has made a reputation second to none—that is, as a political prognosticator. He has been known to take a given township in a given county in any part of Ohio and predict with amazing almost uncanny, certainty how it would go in a primary or general election.

Dick's power of political prediction, joined to his industry and persuasiveness, was the quality in all probability that first brought him to the notice of the great ones in Ohio politics. The two men with whom he was most closely connected before his own star blazed forth on the state skies were President McKinley and Senator Hanna. The former placed Mr. Dick—he was young Mr. Dick then, only thirty-four years old—in charge of the Ohio campaign in 1892 after he had demonstrated his ability in Akron, his home city. Later Senator Hanna made Dick his lieutenant, and it is the senatorial tone of the "kingmaker" which Dick is wearing now.

Senator Dick was born in Akron, Nov. 3, 1858. His father was a German-miller. After receiving a public school education and working at the banking and grain commission businesses Mr. Dick turned his attention to the law and was admitted to the bar in 1883. Before that time he had engaged in politics, receiving an election as auditor of Summit county in 1886 and continuing in that office until 1893. Subsequently he became secretary of the Republican national committee delegate to Republican national conventions, member of the house of representatives and senator. His continuous connection with the national guard dates back to 1874.

WALTER P. HUDSON.

MAJOR GENERAL DICK AND STAFF.

ceeds on the main line as Senator Charles Dick of Ohio. If Dick were an Englishman he would be known as Major General the Honorable Charles William Frederick Dick. But he is not a Britisher, only a plain—very plain, in fact—Ohioan, who shoulduster on the title of United States senator by adding to it that of major general in the Ohio national guard.

Come to think of it, major generals are scarce in the senate these days. Dick is the only one at present now in active service, and his title is only a militia one, after all. Pressing him

Dick is the only one of the ninety-two, who saw service in the war with Spain. But he was only a lieutenant colonel then, not a major general. For one man to be at the same time a lawmaker and a frequent occupier of the law is not a frequent occurrence. That is what makes Senator Dick's recent action in donning a uniform and leading his troops in person during the Columbus street car trouble so interesting an event. He is no mere "old soldier" either. He knows all about the handling of men from long experience.

TURNING TO THE HOLY LAND FOR FOOD

FOR many decades we Americans have drawn spiritual sustenance from the tales and traditions, the legends and precepts that sprang from the soil of the Holy Land. Now it appears that we are to derive from the same soil the means of bodily nourishment. In pursuit of the policy of ransacking the earth for varieties of plants and animals that may be adapted to profitable reproduction in the United States the department of agriculture recently

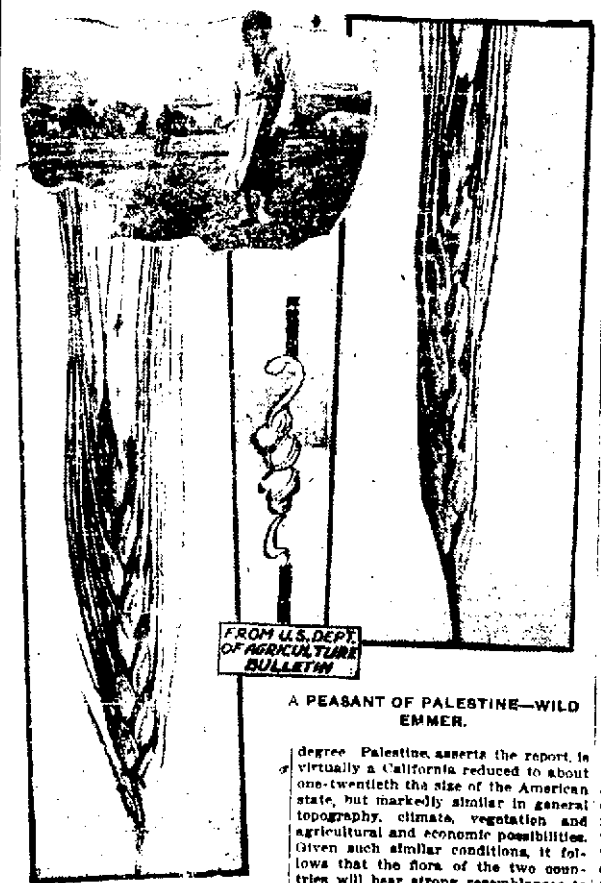

turned its searchlight on Palestine. The result of its researches was made known recently in a pamphlet entitled "Agricultural and Botanical Exploration of the Holy Land," from which most of the facts detailed herein are taken. In presenting to the public the results of its explorations the department draws some very interesting analogies between Palestine and California. It is stated that the topography of the American state and the ancient historic land is similar to a very high

out by the researches and the conclusions of Aaron Aaronsohn, the department's investigator, who is director of the Jewish agricultural experiment station at Haifa, Palestine. "This analogy of the flora of Palestine with that of California justifies the expectations of the best results from their introduction into the last named state," says Mr. Aaronsohn.

Especially interesting in this connection is Mr. Aaronsohn's account of his delvings into the history and cultivation of the wild emmer, believed by scientists to be the ancestor of modern wheat, the greatest of the world's cereals, and its important relatives, such as rye, barley, etc. From time dating back before the dawn of history emmer has grown on the rocky slopes of the Palestinian mountains and hills, affording the natives a large percentage of their foodstuffs. There seems to be no doubt, says Mr. Aaronsohn, that by the selection and crossbreeding of this wild cereal, which prefers poor, rocky, shallow, dry soil and thrives without any cultivation, we shall be able to produce new races which will be very persistent and very hardy. In this way we can extend the cultivation of wheat to regions where it is at present impossible on account of the low quality of the soil and the severity of the climate. "The world's total production of wheat will be very materially augmented," says the report.

Mr. Aaronsohn has not confined his investigations in Palestine to the wild emmer. His researches have extended into every variety of plant life in the Holy Land, with a view to its adaptation to American soil and climate. Among other good things he found there is the chick pea, which he calls "one of the most valuable legumes grown in Palestine." In good years this yields twelve bushels to the acre and sells for as much as wheat, and often more. It is there, says the report, a remunerative crop and excellently adapted for use as a rotation crop before wheat. It is asserted that the chick pea will do well in the dry farming regions of the United States. In a division of the report, entitled "Economic Plants Worthy of Introduction into the United States," many varieties of fruit are enumerated. There are, it is said, several "old types" which are excellent for food, and many that some valuable results by hybridization and selection, but also some new fruit varieties which would be worth trying in the United States. Among them are the almond, the apricot, the quince, the pomegranate, the olive and the fig.

degree Palestine asserts the report is virtually a California reduced to about one-twentieth the size of the American state, but markedly stiffer in general topography, climate, vegetation and agricultural and economic possibilities. Given such similar conditions, it follows that the flora of the two countries will bear strong resemblances to each other. This inference is borne
